FOREWORD

The Rwanda Basic Education Board (REB) is honoured to present the **Physical Education and Sports Teacher's Guide for Primary Six.** This guide is designed to support the effective implementation of the Competence-Based Curriculum (CBC), ensuring consistent and learner-centred teaching practices that align with Rwanda's vision of empowering pupils to reach their full potential, actively participate in society and pursue meaningful careers.

Education plays a pivotal role as Rwanda advances toward building a knowledge-based economy. Teachers are central to this transformation, guiding pupils to connect classroom knowledge with real-life experiences, thus fostering individual growth and national development.

This Teacher's Guide is a comprehensive resource for teaching **Physical Education and Sports at Primary Six**. The subject is an integral part of the CBC, aimed at equipping pupils with essential knowledge, skills, values and attitudes necessary for becoming responsible and competent citizens. This subject encourages pupils to develop problem-solving abilities and contribute positively to their communities.

This guide focuses on engaging pupils in meaningful, activity-based learning experiences, whether individually or collaboratively, where they can explore, discover and construct knowledge. Unlike traditional approaches where learning is often passive and teacher-centred, the Competence-Based Curriculum promotes active, pupil-driven engagement. Teachers encourage pupils to participate in activities that allow them to apply what they learn, to develop key competences and build values that empower them to positively impact their lives and society.

To support this active learning approach, teachers are encouraged to:

- Plan lessons effectively and prepare relevant materials;
- Facilitate group discussions and collaborative activities;
- Apply active teaching strategies such as inquiry, research, investigations and both group and individual tasks;
- Create opportunities for pupils to develop competences like critical thinking, problem-solving, creativity, innovation, communication and teamwork;
- Recognise and encourage pupils' contributions;
- Guide pupils in refining their ideas;
- Promote self, peer and group assessments using appropriate CBC-based assessment methods.

This teacher's guide is divided into 4 sections:

Part I: Highlights the structure of this book and gives you general methodological guidance.

Part II: Sample lesson plans as reference for lesson preparation.

Part III: Content map showing unit names, key unit competence and number of periods per each unit.

Part IV: Detailed teaching guidance for each concept given in the Teacher's Guide..

I sincerely thank everyone who contributed to the development and refinement of this teacher's guide. Special recognition goes to the REB team who coordinated the entire process, as well as to education development partners, teachers and all individuals who supported the process from start to end. Your continued suggestions and feedback are highly valued and will help improve future editions of this textbook.

Dr. MBARUSHIMANA Nelson
Director General of REB.

ACKNOWLEDGEMENT

I would like to extend my sincere appreciation to everyone who contributed to the refinement of the **Physical Education and Sports Teacher's Guide for Primary Six.** This achievement would not have been possible without the active involvement of various education stakeholders.

Special thanks go to the Rwanda Basic Education Board (REB) staff and subject experts for their valuable work on this teacher's guide.

I am also deeply grateful to the education development partners whose support was instrumental throughout the process. In particular, I acknowledge University lecturers, Teachers, Partners and all stakeholders for their contributions in editing of this guide.

Ms. MURUNGI Joan,
Head of Curriculum, Teaching and Learning Resources Department/REB

BIBLIOGRAPHY 187

PART I: GENERAL INTRODUCTION

1. Introduction to the teacher's guide

This book is a teacher's guide for the Primary Six. Physical Education and Sports subject for schools in Rwanda. It is to be used to help teachers to implement the competence-based curriculum for the Physical Education and Sports syllabus.

This is a **guide** that teachers can refer to when preparing their lessons. Teachers may use the guidance provided, but they should also be creative and consider their own class contexts when preparing their lessons.

This teacher's guide has three main parts:

Methodological guidance for the teacher

This section guides the teacher on:

- Developing pupils' competences;
- Integrating cross-cutting issues;
- Teaching pupils with special educational needs;
- Ensuring gender inclusion;
- Planning a lesson, using active and techniques for teaching PES and
- Carrying out appropriate assessment of learning.

A sample lesson plan

The sample lesson plan is a guide for teachers in developing their own lesson plans.

Unit development

This is the main part of the guide, because it shows the teacher how to teach the content of each unit and lesson.

Each unit begins with the unit title, and the key competences that are taught in the unit. Then the rest of the unit is presented:

- The knowledge, skills, attitudes and values that the pupils should successfully learn in the unit.
- A list of the lessons in the unit, the learning objectives of each lesson and the number of class periods to be used for each lesson.
- A list of key vocabulary words for the unit.
- The **recommended approach** to teaching each lesson in the unit, including a list of teaching and learning materials for the lessons.

- Recommended questions and activities for the end of unit assessment. A list of additional activities that can be given to less able pupils (remedial activities), normally-learning pupils (consolidation activities) and advanced pupils (extension activities). These activities could be carried out during class time or as after-school activities.

2. Methodological guidance for the teacher

2.1. Developing competences

PES follows the approach of the Competence-Based Curriculum (CBC), in which pupils learn actively and collaboratively. Also, PES pupils are tested for what they can do, not only what they know. Pupils gain knowledge, skills and appropriate attitudes and they demonstrate them in their games and exercises.

In PES, pupils also develop **generic** competences which are useful in many situations:

Generic competences	Ways of developing generic competences
Critical thinking	These learning activities require pupils to think strategically and quickly as they engage in sports and games. Pupils must also analyse their own performance and the performance of others, especially in team games.
Research and problem solving	These activities lead pupils to use what they have already learned as a basis for learning new activities and solving challenges–on the field and in life.
Cooperation and managing relationships	Pupils learn to work well with others on their teams, using the abilities of each person to build strong and positive relationships with each other.
Innovation and creativity	These activities give the pupils opportunities to learn new activities, invent new games and movements and develop new game strategies.
Communication	In team sports and games, pupils learn to communicate clearly and confidently with each other. In discussing PES class activities, pupils also gain experience in expressing themselves.
Lifelong learning	These games and activities should help the pupils to make a practice of regular physical exercise and care for their physical health, throughout their lives.

2.2. Integrating cross-cutting issues in the curriculum

Competence-based learning also addresses specific *cross-cutting issues* into the teaching and learning process. Cross-cutting issues are aspects of life that are relevant to many curriculum subjects and they should be made part of those subject lessons.

Some cross-cutting issues may seem specific to particular learning areas or subjects, but the teacher needs to address all of them whenever they come up. The pupils should also be encouraged to talk about these cross-cutting issues, in the classroom and outside the classroom, so that they can develop positive attitudes and values related to these issues. The teacher must introduce them at the most appropriate age and grade level.

Below are examples of how crosscutting issues can be addressed:

Cross-Cutting Issue	Ways of addressing cross cutting issues
Comprehensive Sexuality Education: The Comprehensive Sexuality Education program aims to provide pupils, adolescents and youth with age-appropriate, culturally and gender-sensitive knowledge, skills and values. It helps them make responsible decisions about sexual and social relationships. It also supports understanding and expressing feelings, values and attitudes to promote behaviors that reduce risks and enhance well-being.	The teacher can lead pupils to discuss the following situations: alcohol abuse; unwanted pregnancies; home violence etc, to advise pupils on how they can fight against them. Give pupils an opportunity to give examples of cases of abuse or violence they know. Give the pupils contacts where to report in case they are abused.
Genocide Studies: The study of the 1994 Genocide against the Tutsi helps pupils understand it as the worst crime committed against the Tutsi in the 1994. It teaches why the genocide happened and emphasizes the importance of preventing such atrocities in the future. The story of recovery and national unity in Rwanda serves as a foundation for rebuilding the nation. Educating pupils on fighting genocide denial and its ideology is crucial.	Teachers use simple methods to teach primary pupils about the 1994 genocide against the Tutsi, starting by asking what they know about the 1994 genocide against the Tutsi. Upper primary pupils discuss 1994 genocide against the Tutsi in pairs or groups, share their ideas and ask questions.

This knowledge equips pupils to help prevent future genocides.	Teachers clearly explain what the 1994 genocide against the Tutsi is, why it happened in 1994 and why it must never happen again. Lessons include Rwanda's recovery, national unity and the importance of peace, with possible visits to 1994 genocide against the Tutsi memorial sites for older pupils.
Environment and Sustainability: Integration of studies around the environment, climate change and Sustainability in the curriculum make pupils understand the need to protect the environment.	Teachers should use real-life examples and pupils' experiences to explain environmental issues like soil erosion, effects of tree cutting and flooding, while encouraging responsible waste disposal and care during practical activities.
Financial Education: The integration of Financial Education into the curriculum is to teach young pupils the use of money; teach them to develop the culture of saving and how to use money responsibly.	Teachers should guide pupils to discuss the importance of money, saving through methods like saving boxes or bank accounts, and spending wisely on essential needs. Pupils should also learn to use materials and tools carefully to make them last longer and avoid unnecessary replacements.
Gender education: At school, gender roles should be understood as roles that complement each other in a family, in a community or the nation.	Teachers should address gender issue through assigning leading roles in groups to both girls and boys; provide equal participation in the lesson to avoid any gender stereotype in the learning process. Give pupils time to talk about different gender roles they know from their homes and how they complement each other. Let pupils discuss why these roles are beneficial for everyone.

Inclusive Education: Inclusion is based on the right of all pupils to a quality and equitable education that meets their basic learning needs and understands the diversity of backgrounds and abilities as a learning opportunity.	Teachers should identify pupils with special needs and use adapted teaching and learning resources when available while conducting a lesson. Teachers must encourage inclusive participation and foster peer support for pupils with disabilities.
Peace and Values Education: Peace and Values Education (PVE) is the education that promotes social cohesion and positive values, including the culture of peace personal responsibility, empathy, critical thinking to build a more peaceful society.	Through a given lesson, a teacher should set a learning objective which address positive attitudes and values, e.g: encourage pupils to discuss positively, listen to each other's ideas, take turns and be able to come up with meaning full positive ideas. The teacher leads pupils to discuss on the meaning peace and why it is important to have peace at home, at school and in the community. Encourage pupils to respect each other and to create good peaceful and friendly relations
Standardization Culture: Standardization Culture is about introducing a positive culture around the classroom that promotes respect of instructions, classroom rules; good health, cleanliness, self-development self-respect; dignity and the respect of other people and other people's culture.	Lessons that involve making things should emphasize quality work and using the right materials properly. Engaging pupils with practical activities and word problems helps them to understand their role and recognize how a culture of standardization contributes to health, the economy, industry and overall well-being.

Impact of Social Media: Teaching the impact of social media fosters digital literacy, creativity and collaboration while providing access to diverse learning resources. It promotes critical thinking and responsible online behavior. However, balanced use is essential to avoid distractions and mental health issues. This prepares pupils for effective digital engagement in their academic and social lives.	To make digital learning safe, and engaging, the activities should be interactive, visual and story-based, while being culturally relevant and age-appropriate. Digital safety can be taught through child online protection clubs; edutainment and interactive multimedia textbooks; storytelling and games. Edutainment makes learning engaging and practical. Role-playing and puzzles help pupils practise safe internet habits and handle online risks. To set clear, age-appropriate rules for internet use, start by having open conversations about which websites and apps they want to use and explain the importance of safety.
Disaster Risk Reduction and Management: It builds essential awareness and skills for disaster preparedness. This helps pupils from being victims and teaches them the culture of staying safe. It nurtures critical thinking, problem-solving and social responsibility, empowering pupils as agents of change for sustainable development. This prepares future generations to adapt effectively to the problems brought by climate change.	Engaging pupils in projects to identify any local disasters that might have happened and to plan how to avoid such disasters in future. Using storytelling and role-playing based on community to present to the class what they can in case the disaster occurs again Forming disaster management clubs that promote peer learning and community outreach.

2.3. Attention to pupils' special educational needs in teaching and learning

Pupils with disabilities are often left out of sports activities, when they can only watch and not participate. However, sports can be very good for pupils who have physical, mental or emotional disabilities. PES teachers should focus on what pupils can do and adjust the difficulty of the games to help them. All pupils should be treated naturally and encouraged to participate.

For example:

- The rules of the game can be changed to make it easier for all pupils to play.
- The size of the field can be made smaller.
- Use playing equipment that is easier to handle.
- Use clear, simple language to explain new games or activities.

The teacher should work closely with the Special Educational Needs coordinator for the school, to help pupils with specific disabilities to learn well. Some strategies include:

- ***Visual disabilities:*** Pair the pupil with a partner, make the rules simpler, slow the ball down, use spoken cues more.
- ***Hearing disabilities:*** Use clear signs and gestures and pair the pupil with a partner who can communicate with him or her.
- ***Physical disabilities:*** Adjust the speed of the game, make the play area smaller, modify the game or activity so that the pupil with a wheelchair or assistive device can play.
- ***Mental (developmental) disabilities:*** Explain the signs and gestures being used, give the pupil time to watch and learn the game, make the game less fast or intense.

2.3.1. Gender inclusion

Due to the physical nature of PES, girls may feel excluded from games or lessons. The teacher should always try to motivate girls to participate in PES in these ways:

- Encourage girls to play and be part of the team. Praise the girls who join the game.
- Give girls the same opportunities as boys to be the team captain, referee or organiser of a game. (This can be done on a rotational basis).
- Give the same play time to boys and to girls and with the same equipment.
- Provide special exercises for girls if needed.
- Respect the opinions of the girls who are playing.
- Do not make fun of girls as they are playing or use words that will make them feel they are not good at the game or sport.
- Ask parents to support their girls when they play sports.

2.4. Using the active learning approach to teach a PES lesson

Pupils in the classroom learn in different ways. These are called **learning styles** and they include:

- ***Active or reflective:*** Some pupils learn by doing activities (active), others learn by thinking about them (reflective).
- ***Sensing or intuitive:*** Some like learning facts and steps (sensing), others like learning big ideas (intuitive).

- ***Visual or verbal:*** Some learn best by seeing pictures or demonstrations (visual), others by listening and speaking (verbal).
- ***Sequential or global:*** Some learn step-by-step (sequential), others understand better when they see the whole picture first (global).

In **Physical Education and Sports**, the best way to help most pupils is through **active learning**. Pupils learn better when they are involved in the activities such as:

- Doing sports and physical activities.
- Practicing skills like running, passing, jumping, throwing, shooting etc.
- Working with others in games.
- Thinking about how they play and how they can improve.

The teacher helps pupils learn actively by:

- Showing and explaining activities.
- Giving group and individual exercises.
- Encouraging pupils to think, solve problems and work together.
- Giving advice and support during practice.

The CBC encourages pupils to learn by doing. In PES, this means:

- Learning through games and sports situations.
- Practicing in real places like the playground or sports field, in school teams or in local community.
- Using what they learn in real life—for health, fun and teamwork.

Note to the Physical Education and Sports teacher

a. The use of locally made and low-cost materials

Physical Education and Sports (PES) teachers can use locally made, low-cost materials like stones, sticks, bottle tops, boxes and cloth to make PES lessons practical and fun. Pupils can help collect and make these, building creativity and problem-solving.

Examples:

- Stones as lane markers.
- Sticks as hurdles or relay batons.
- Bottle tops as score counters.
- Boxes as throwing targets.
- Cloth as beanbags, etc.

Safety for locally made and low-cost materials: Before using those local materials, check whether materials are clean, smooth and safe. Avoid sharp or dangerous items, place objects carefully, guide and supervise pupils during use.

b. The use of ICT and innovation integration during PES lessons

For examples:

- **Videos:** Show correct techniques and replay for better understanding.
- **Simulations/apps**: Demonstrate body movements or game tactics safely.
- **Online links**: Connect lessons with real-life sports and fitness tips.
- **Projectors/smartboards**: Display rules, diagrams and animations.
- **Recording and feedback**: Help pupils see and improve their performance.

2.4.1. Principles of teaching Physical Education and Sports

Physical Education and Sports (PES) develops the physical, mental and social aspects of pupils' lives.

- Physically, it makes them stronger and more coordinated.
- Mentally, it helps pupils with their focus and decision-making.
- Socially, it helps to build pupils' self-confidence and their ability to work and play with others.

A PES lesson should be planned ahead of time, so that the content of the lesson is clear, the activities are appropriate to the ages of the pupils, the teaching methods include behaviour management and the teacher is confident in giving the lesson.

A PES lesson should include these steps:

Before the lesson

The teacher should set up the court or the play area, making sure that the playground or field is large enough for the game or activity of the day. Any equipment that will be used, such as balls or ropes, should be available.

Starting the lesson

The teacher should start on time, even if some pupils are late.

During the lesson

- First, the teacher checks the health and readiness of the pupils for the lesson. The teacher then introduces the game or activity, to get the pupils interested.
- Second, warm-up exercises are done, like stretching, jogging and other ways to prepare the pupils' bodies for the activity.

- The main activity is a game or exercise that takes most of the 40-minute lesson time. The teacher should keep the instructions short and repeat them if needed. The teacher should show how the game or activity is done or ask a pupil who knows the game to show the other pupils how to do it.
- The game is followed by cool-down exercises.

Ending the lesson

- The closing discussion encourages pupils to talk about their experience in the game or exercise, to link their game or exercise to things they have done before and to think about how they could use what they have learned in the future.
- Finally, the equipment used in the game or exercise is collected and stored. Clean the equipment if needed and make sure that it is ready to use again, before putting it away.
- If any equipment is not in good condition and should be replaced, inform the school DOS or Headteacher.

2.5. Assessment

In PES, the teacher assesses not only pupils' physical skills, but also their emotional growth and social skills. Three kinds of pupil assessment are important in PES:

- ***Diagnostic assessment:*** Before the lesson, the teacher assesses the physical abilities of the pupils, including their basic skills (such as throwing, catching, running and team sports). This helps the teacher to know which pupils may need extra support.
- ***Formative assessment:*** During the lesson, the teacher observes the pupils in games and exercises. The teacher looks for progress in physical skills, teamwork and self-confidence.
- ***Summative assessment:*** At the end of a unit or a term, pupils are assessed in areas like cardiovascular endurance, muscle strength, flexibility, coordination , teamwork etc.

PART II: SAMPLE LESSON PLAN

School Name: ..... Teacher's name: .....

Term	Date	Subject	Class	Unit N°	Lesson N°	Duration	Class size
1	September, 2026	Physical Education and Sports	P6 A	5	1 of 4	40 min	45
Type of Special Educational Needs and number of learners				Two learners with physical disability			
Unit title	BASIC FOOTBALL TACTICS						
Key Unit Competence	Develop Football skills and apply techniques and tactics of kicking, passing and using appropriate parts of the body during game situations.						
Title of the lesson	Kicking a moving or stationary ball						
Instructional objective	By using football ball, cones, goal posts, individually and in teams, pupil of P6 should be able to kick a stationary and moving ball perfectly.						
Plan for this Class (location: in / outside)	Safe playground						
Learning Materials (for all learners)	Sport facilities, balls, whistle, cones and bibs, goalposts.

<table>
<tr><td rowspan="2">Timing for each step</td><td colspan="2">Description of teaching and learning activity</td><td rowspan="2">Competences and cross-cutting issues to be addressed</td></tr>
<tr><td colspan="2">Pupils in groups safely practice football shooting skills during a normal game. The teacher supports them by giving guidance, encouraging teamwork and helping them improve their understanding of basic shooting techniques.</td></tr>
<tr><td></td><td>The teacher's activities</td><td>Pupils' activities</td><td></td></tr>
<tr><td>Introduction:

Opening discussions:1’</td><td>• Check the pupils’ state and sports uniform, and request pupils to clear up the playground to set it free from dangerous things like stones, thorns, ...
• The teacher requests pupils to brainstorm about shooting technique in Football.

What techniques do you use in Football when you want to overcome the opponent?</td><td>• Respond to the teacher’s questions and provide their contribution to cleaning the playground.
• Pupils discuss about shooting techniques using Think-Pair-Share.

Example of questions

Answers:
• Passing using the head
• Passing using the foot</td><td>Peace and values education: it is developed through following the instructions given by the teacher and working together with others peacefully while playing

Communication:

Pupils give and follow instructions during games. They discuss strategies and cooperate with teammates. They express feelings and feedback respectfully after activities.

They use both verbal and non-verbal communication (e.g.: signals, gestures, eye contact) to coordinate during play.</td></tr>
</table>

Warm-up: 2'	• Let pupils perform warm-up and stretching exercises with minimal guidance, and request them to do so. • Request pupils to start a warm-up activity like jumping or running with the help of a voluntary student.	• Jogging around the ground while maintaining a medium speed for one minute, raise and rotate hands according to the teacher's signals. • Perform warm-up with balls and personally reflect on the lesson of today concerning the normal play they usually do. 	**Peace and values education:** it is developed through following the instructions given by the teacher and working together with others peacefully
Stretching: 2'	• Ask one pupil to lead stretching exercises and provide support on the safe start of the lesson activities. • Openly give pupils a clear welcome in the lesson and activities of today	• Perform general stretching exercises focusing on the body parts used in football passes. • Thank the teacher and get ready to participate in the activities during the lesson	

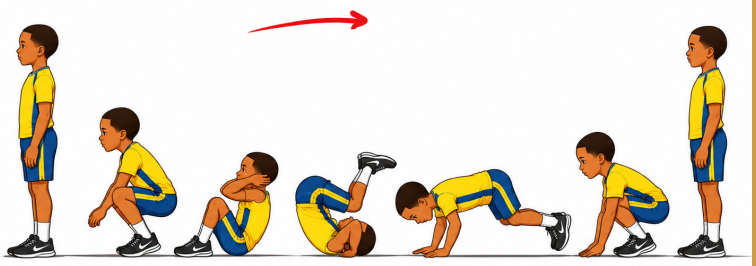
Main activity: 30'	• Explain the techniques of kicking the ball carefully, either a moving or stationary one, with minimal demonstration. Show how to execute a moving and stationed ball kick step by step. • Give instructions to follow while playing. • Let pupils practise the exercises of kicking the moving and stationed ball in football independently. • Provide necessary support where pupils are not doing the right kicks of the ball. • Remember to support learners with disabilities and special educational needs while supporting individuals. Let all groups perform as much as possible. • Organise a competition between groups in a short game time. • Assess techniques of kicking the moving and steady ball in a game situation. • Assess every pupil by calling them one by one to practise kicking the ball.	• Carefully follow what the teacher is explaining and demonstrating and observe and follow the steps explained by the teacher carefully. • Listen carefully to the instructions given to be followed while playing. • Practise openly and independently the exercises of kicking the ball. • Do their best to perform the exercises of kicking the ball and asking for help where necessary. • Practising the kicking exercises provided by the teacher. • Pupils will start by kicking the ball over the given distance using the inside of the foot. • After mastering the techniques, they may switch to using the outside part of the foot and try to do it as the teacher instructed.	**Gender education:** It is integrated into the lesson where both girls and boys perform the predetermined activity of ball kicking together and equally. **Inclusive education:** Is addressed through adapting an impaired learner to use their able-bodied part to perform passing exercises

		In groups pupils perform exercises of kicking the ball technically • During the kicking exercises, pupils with disability perform exercises of passing the ball technically	
Cool-down :2' **Summary and reflection :3'**	• Let pupils perform cool-down exercises. **Summary and reflection questions:** • What did you do to perform kicking steady ball exercises? • What are the challenges/ advantages you face while performing those exercises? • Usually, how will you use your techniques to achieve your work?	• Move slowly, relaxing arms and legs in different directions according to the teacher's instructions **Answers:** • We worked together. • We followed the instructions. • Fair play **Answers:** • We did not pass with techniques. • We did not follow the instructions	**Communication:** it is developed through answering questions verbally **Environment and sustainability:** it is developed through respecting the playing environment and removing all used materials and ensuring their safe keeping of materials.
		Answers: • Following instructions. • Respecting rules. • Working together	
The teacher self-evaluation			

PART III: CONTENT MAP

Physical Education and Sports Primary 6 (SINGLE SHIFT)			
Unit	**Unit title**	**Key unit competence**	**Number of periods per unit (2 periods per a week)**
1	**MOTOR CONTROL**	Refine and increase participation in physical exercises and improve body control.	6 periods
2	**BODY CONTROL AND BALANCE**	Create simple character and narrative through movement in response to arrange of stimuli	6 periods
3	**GYMNASTICS EXERCISES**	Safely execute basic Gymnastic movements such as forward roll, backward roll, body balance position and group movement sequences.	6 periods
4	**ATHLETICS EXERCISES**	Jump, run and throw from different positions.	10 periods
5	**BASIC FOOTBALL TACTICS**	Develop Football skills and apply techniques and tactics of kicking, passing the ball and using appropriate parts of the body during game situation.	10periods
6	**BASIC VOLLEYBALL TACTICS**	Improve techniques of playing Volleyball tactically in the game situations.	10 periods
7	**BASIC BASKETBALL TACTICS**	Perform defensive and offensive techniques and tactics of Basketball in the game situations, using both individual and collective strategies.	10 periods
8	**BASIC HANDABALL TACTICS**	Use Handball techniques and tactics effectively in the game situations.	8 periods
	TOTAL		**66**

PART IV: DEVELOPMENT OF UNITS 1 – 8



UNIT 1

MOTOR CONTROL

Key Unit Competence

Refine and increase participation in physical exercises and improve body control.

At the end of this unit, the pupil should be able to:
Knowledge and understanding • Explain the importance of warm-up, stretching and relaxation exercises. • Describe how these exercises help improve health and prevent injury.
Skills • Perform gymnastic exercises correctly using proper technique. • Demonstrate control and coordination during movements.
Attitudes and values • Participate actively in all exercises. • Show collaboration and respect toward teammates.

1.1. Prerequisite (Knowledge and understanding, skills, attitude and values)

Pupils will learn better if they already know how to perform exercises that strengthen the heart and lungs, such as jogging and breathing exercises and also know how to walk slowly with short steps, jump and move smoothly and follow the teacher's instructions.

1.2. Guidance on introductory activity

Opening discussions

The teacher asks the following questions to the pupils:

- What is motor control? Motor control is the ability to control and coordinate body movements using the brain, muscles and senses.
- Which activities require good motor control? Some activities that require good motor control are running, jumping, balancing, throwing, catching, kicking, gymnastics and playing different sports.
- Why is motor control important? Motor control is important because it helps us perform movements accurately, maintain balance, improve coordination, prevent injuries and perform better in physical activities and sports.

Pupils discuss and share their ideas. The teacher explains to the pupils that good motor control enables them to move with confidence, accuracy and coordination during games and sports. It also helps them learn new skills more easily and perform physical activities safely. The teacher guides the discussion and then leads pupils into warm-up and stretching exercises before the practical activities.

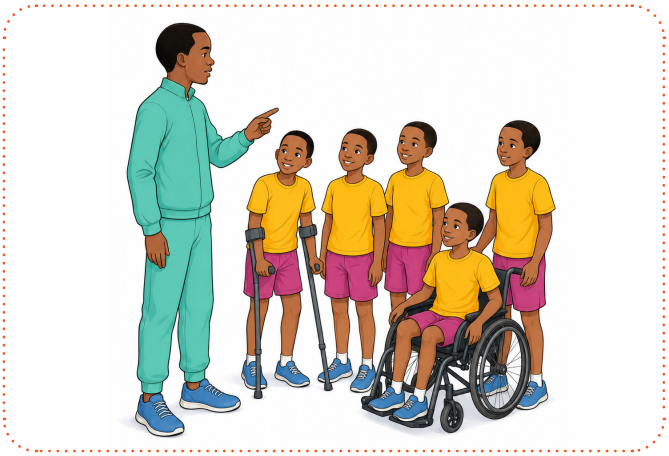


Fig.1.1: *Pupils following the teacher's instructions*

The teacher checks uniforms, gives instructions and rules, while pupils recall past activities. Groups are formed, boundaries are set and the teacher leads a warm-up and stretching exercises.

Warm-up and stretching exercises

The PES the teacher should explain why warming up and stretching are important before sports. The teacher shows how to do the warm-up and stretching, then explains it again. Pupils watch and try it slowly and carefully. The teacher checks if they understand, encourages them with kind words and sets a time limit for the warm-up and stretching.

Under the teacher's guidance, pupils do the following exercises:

Warm-up exercises

- Light jogging around the activity area.
- High knees and heel kicks.
- Side shuffles and skipping.
- Simple balance and coordination movements.
- Use some of the following stretching exercises below.

Some other stretching exercises to be used are given below:

Calf stretch	Shoulder stretch	

Hip flexor stretches	
Quad stretch and standing forward bend	Lower back stretch	
Cat cow stretch	Abdomen stretch	
The teacher says that you are going to play a special version of "Simon says" that focuses on slow, controlled and accurate movements.

Play the game:

Use motor control-friendly commands such as: Simon says touch your toes slowly, Simon says balance on one foot for 5 seconds, Simon says move your arms in slow circles, Simon says walk in a straight line with heel-to-toe steps.

Progression: start with easy commands, then gradually increase the complexity by adding multi-step or balance-based instructions. This activity introduces pupils to the concept of motor control—coordinating the body effectively during movement. The teacher should continue with the main part of the lesson.

1.3. Generic Competencies

- **Critical thinking and problem-solving:** Analyse and refine body movements, coordination and exercise techniques to improve body control, physical fitness and performance during physical activities.
- **Cooperation, interpersonal management and life skills:** Work effectively with others during physical activities, follow safety rules, demonstrate leadership, discipline, responsibility and respect for others.
- **Lifelong learning:** Develop a lifelong habit of regular physical exercise and recognise its importance in maintaining physical fitness, health and overall well-being.

1.4. Basic Values

- **Self-reliance:** Taking responsibility for personal improvement by participating actively in physical exercises, controlling body movements and developing personal fitness skills independently.
- **Hard work:** Applying consistent effort and regular practice to improve body control, coordination, flexibility, strength and performance in physical activities.
- **Commitment and resilience:** Continuing to practise despite challenges, learning from mistakes and showing determination to improve physical abilities and movement skills.

1.5. Cross Cutting Issues

- **Gender equality:** Developed through encouraging equal participation of boys and girls in physical exercises, coordination activities and body control practices.
- **Peace and values education:** Developed through promoting discipline, cooperation, respect, responsibility, self-confidence and self-control during physical activities.
- **Inclusive education:** Developed through adapting motor control activities to support pupils with different abilities and ensuring equal and safe participation for all pupils.

1.6. List of lessons and learning objectives

#	Lesson title	Learning objectives	Number of periods
1	Exercises which develop the circulatory and respiratory system muscles (running and jumping).	To improve fitness through varied-speed movements, muscle-building activities like running and jumping and by enhancing endurance and relaxation.	2
2	Rolling exercises in Gymnastics.	To do rolling exercises on the ground correctly.	2
3	End of unit practical assessment.	To do exercises that develop circulatory and respiratory system muscles and rolling exercises.	2

Lesson 1: Exercises which develop the circulatory and respiratory systems' muscles (running and jumping)

a. Learning objectives

By the end of this lesson, the pupil will be able to improve fitness through varied-speed movements, muscle-building activities like running and jumping and exercises that enhance endurance and promote relaxation.

b. Teaching and learning resources

Sport facilities, mat, whistle, rope, lanes, balls, bench, stopwatch and tape measure , cones or other materials that can be used during this exercise.

c. Prerequisites (Knowledge and understanding, skills, attitude and values)

Pupils should already know how to perform basic aerobic and muscular exercises and be able to rotate various parts of the body, such as the neck, shoulders, knees and spine.

d. Introduction

The teacher should go straight to the main part of this lesson because opening discussions and warm-up were conducted during introductory part.

e. Main activity

The PES the teacher asks pupils to listen carefully and gives clear instructions. The teacher or some pupils show how to do the activity. Then, the pupils start with a set time. The teacher moves around to help, gives praise to the pupils. If needed stop the game or exercise 1 minute and remind instructions to pupils and then continue the game or exercise.

Activity 1.1: Running exercises (150 meters of distance running).

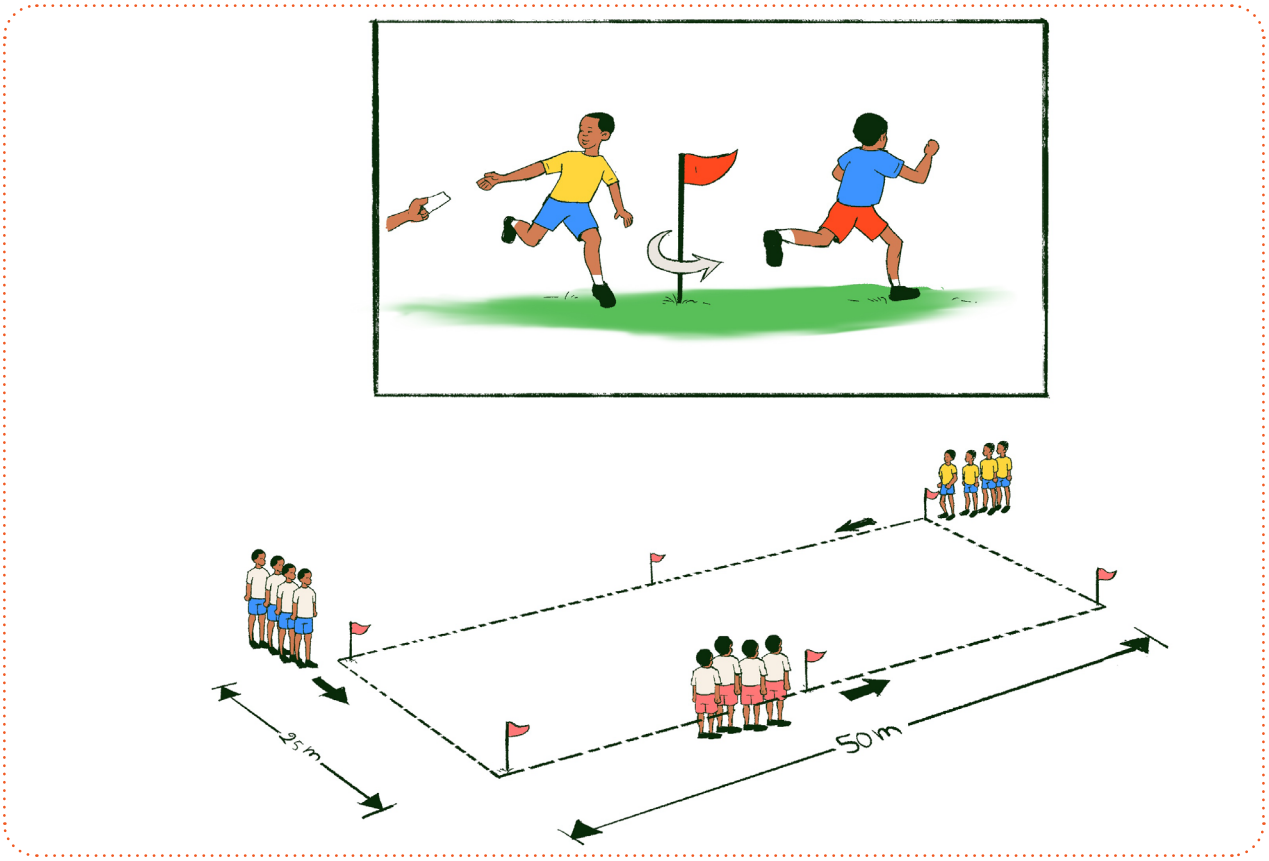

Fig.1.2: *Pupils performing running exercises*

Process:

- Teams run a 150-meter course for 8 minutes.
- Each member runs as many full laps as possible within the time limit.
- For each round, runners carry a card (or similar item) and hand it back to the team before the beginning of the next round.
- A whistle is blown to signal the start, the final minute (at the 7th minute) and the end (at the 8th minute).

Scoring:

- The teacher collects and counts the returned cards.
- Only fully completed rounds count toward the score.
- Teams are ranked based on their completion time.
- The fastest team is the winner.

Activity 1.2: Jumping exercises

The Pupils should perform different types of jumping exercises over adapted obstacles, considering their ability and progression. They practise variations such as jumping over a rope and doing consecutive tuck jumps. The teacher should always observe pupils' coordination ability and encourage them to improve their skills throughout the activity.

The teacher corrects the body position for jumping as the following:

- Feet together.
- Standing nice and tall.
- Elbows close to the body.
- Thumbs pointing outward.
- The rope was placed on the ground.

Progression and variations:

As pupils improve in jumping over the rope, the teacher should encourage them to increase the speed of spinning the rope. Pupils should also practice different variations, such as side jumps to the right and left, as well as forward and backwards jumps over the rope.

Successive tuck jumps:

Pupils should practise successive tuck jumps by doing many repetitions. The number of repetitions should match the ability and fitness level of each pupil.

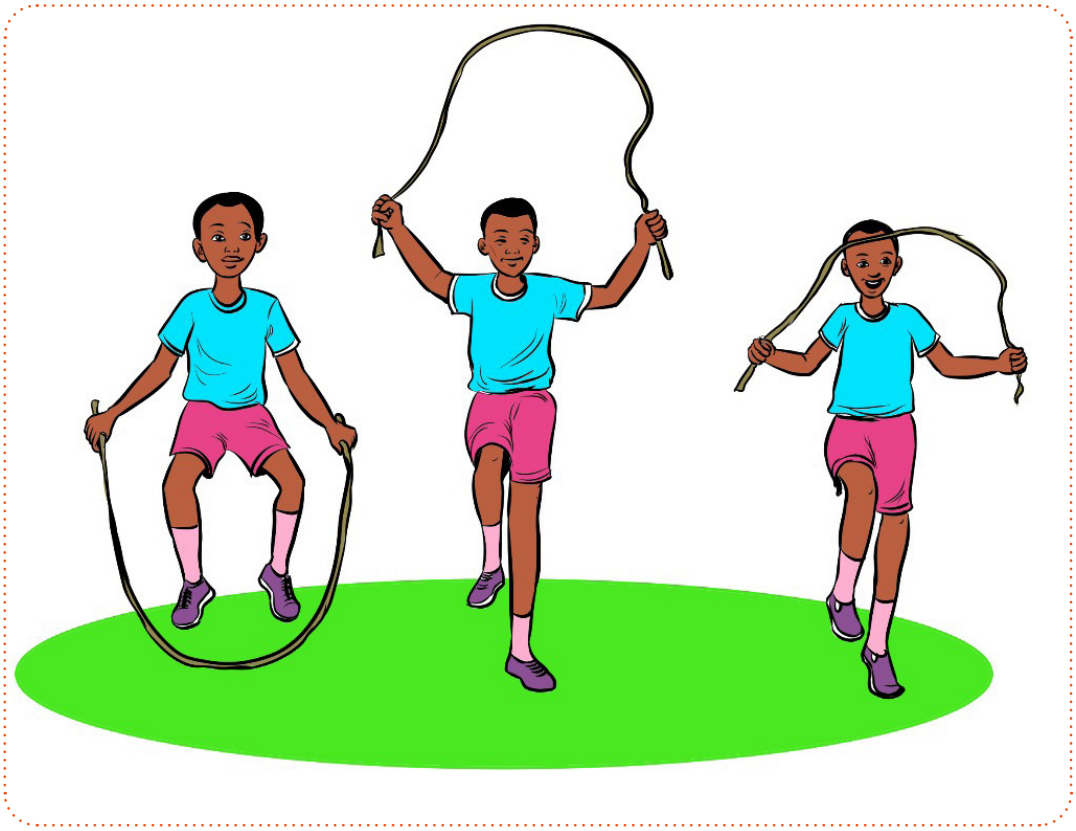

***Fig.1.3**: Pupils jumping over the rope*

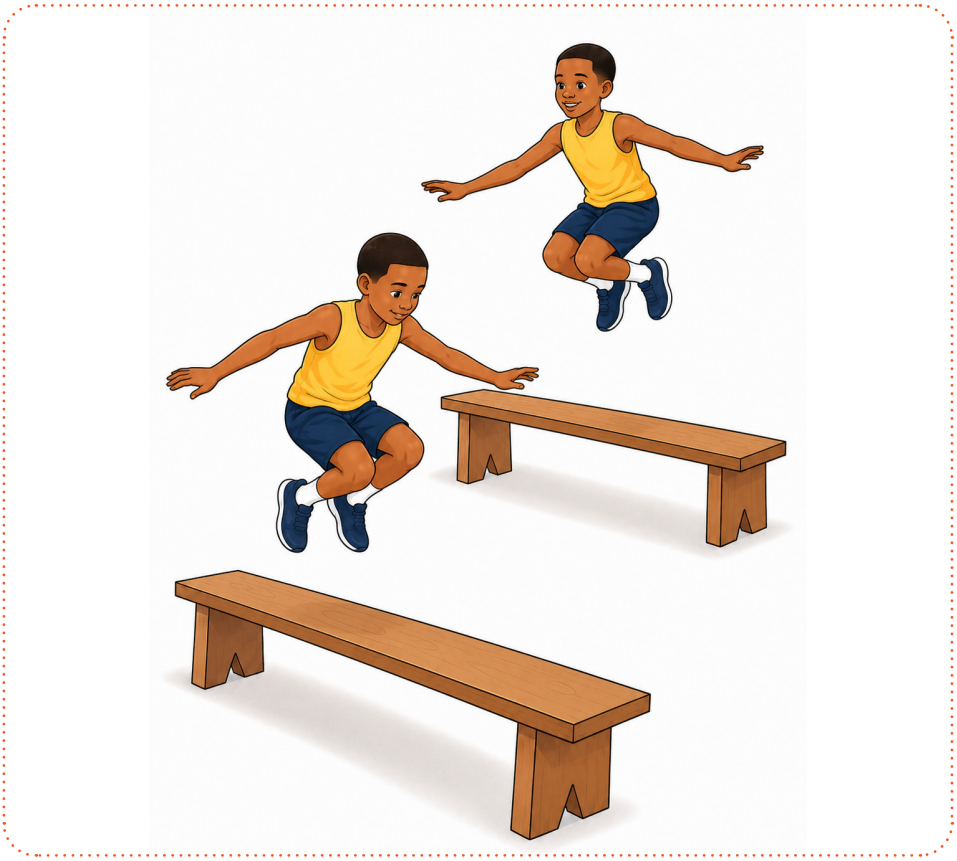

***Fig.1.4**: Pupils jumping over the bench*

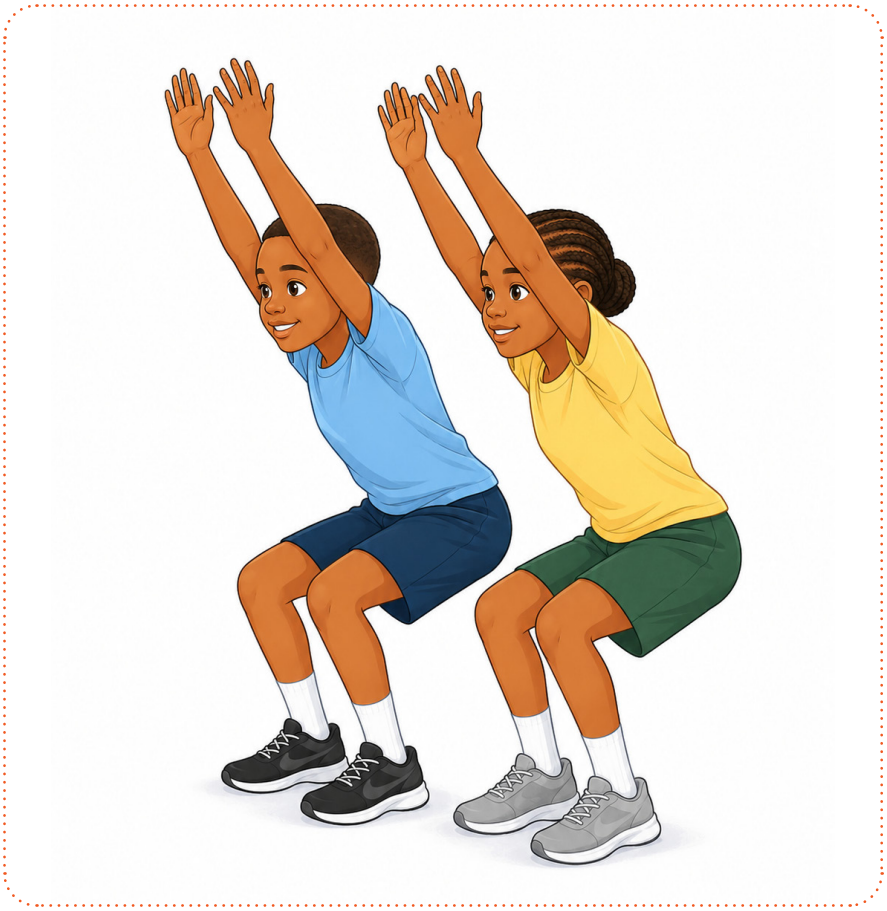

Fig.1.5: *Pupils performing successive tuck jumps*

Cool-down exercises

The PES teacher explains why cool-downs are important after sport. The teacher shows how to do the cool-down, then asks pupils to follow along. While they do it, the teacher gives praise like "Well done!" and sets a time limit for the cool-down.

During cooling down exercises, the teacher must ensure that all pupils maintain the correct posture and demonstrate the correct body position. Pupils should perform the following exercises:

- Walking slowly.
- Balancing legs and arms with slow movements.
- Supine shoulder flexion stretches the muscles of the shoulders and back.

Summary and reflection

The PES the teacher reviews what pupils did in the lesson, asks how they feel, and finds out what they enjoyed most. One or two pupils share their ideas. The teacher thanks everyone and ends the lesson.

Reflection questions

- **How did you feel during the exercises? What muscles were most used?** I felt strong and a little tired. My arms, legs and stomach muscles worked the most.
- **How does this lesson relate to past physical activities?** It used similar movements like running, jumping and stretching. It helped improve the skills I practised before.
- **How will you stay fit in your daily life?** By exercising regularly, like running, jumping and stretching. By playing sports and moving actively every day.

Keywords

The teacher reads them aloud, explains them and tells the pupils to repeat after him/her: ***running*** *(moving quickly on your feet),* ***jumping or tuck jump*** *(jumping and bringing your knees up toward your chest),* ***lap*** *(one complete round around a track or area),* ***coordination*** *(using different parts of your body together smoothly and efficiently).*

Lesson 2: Rolling exercises in Gymnastics

a. Learning objectives

By the end of this lesson, the pupil should be able to perform exercises individually that involve manual support, circular body movements, forward rolls and backward rolls with safety and control.

b. Teaching and learning resources

Sport facilities or natural grass area, carpet or mat, whistle, balance bars, benches, rope and other supportive materials.

c. Prerequisites (Knowledge and understanding, skills, attitude and values)

Pupils will understand this lesson if they are already familiar with the basic techniques of forward and backwards rolling and can perform basic body rotation exercises. They should also be able to safely stretch the cervical area, pelvic guard, scapular guard and the backbone.

d. Introduction

Opening discussions

The PES the teacher brings all pupils together and asks if they like playing games or doing physical exercises. Pupils give examples of games they play or physical exercises they do. The teacher explains that in this lesson, they will all play safely, share fairly and learn that games are good for both boys and girls.

The teacher begins by checking pupils' readiness. Pupils gather in a semi-circle formation. The teacher asks them to recall and demonstrate previously learned Gymnastics movements and discuss safety measures in Gymnastics. One pupil is selected to lead warm-up and stretching exercises. The teacher observes and gives demonstrations or corrections where is necessary.

Warm-up and stretching exercises

The PES the teacher should explain why warming up and stretching are important before sports. The teacher shows how to do the warm-up and stretching, then explains it again. Pupils watch and try it slowly and carefully. The teacher checks if they understand, encourages them with kind words and sets a time limit for the warm-up and stretching.

The teacher explains and demonstrates how to perform the following exercises:

- *Jumping rope:* Pupils begin by jumping rope at a slow pace and gradually increase the speed of spinning as their bodies warm-up.
- *10 jumping jacks:* Pupils jump to a position with their legs spread wide and arms touching overhead, then return to a standing position with feet together and arms at the sides.

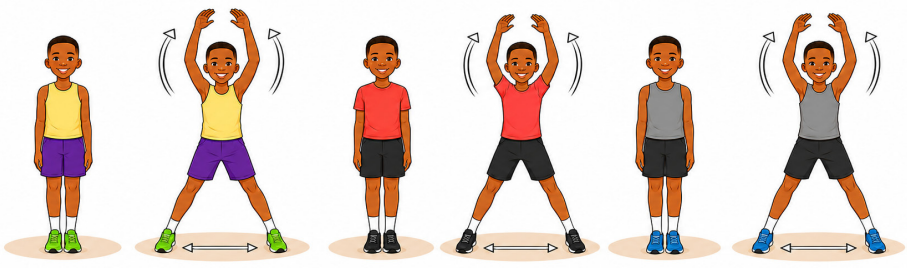

Fig.1.6: *Pupils doing legs spread wide*

- *10 body weight squats:* Pupils bend their knees and lower their body as if sitting on a chair, then return to a standing position. The teacher demonstrates proper squat form to ensure correct posture and safety.

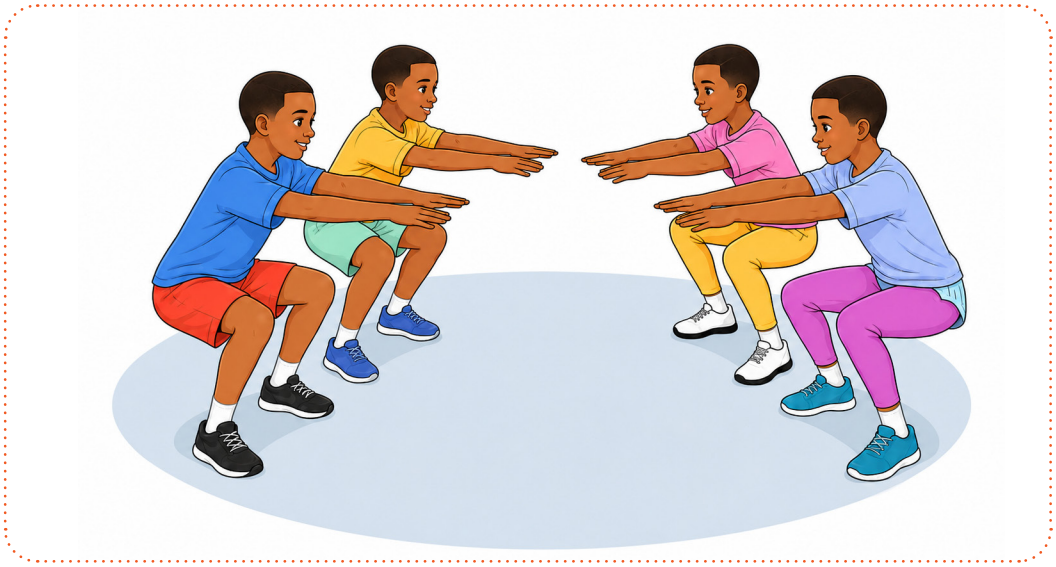

Fig.1.7: *Pupils doing body squats*

- *5 lunges (each leg):* Pupils step forward with one leg, bend both knees to lower their bodies, and then return to the starting position. The exercise is repeated on each leg. The teacher demonstrates the correct form for balance and alignment.

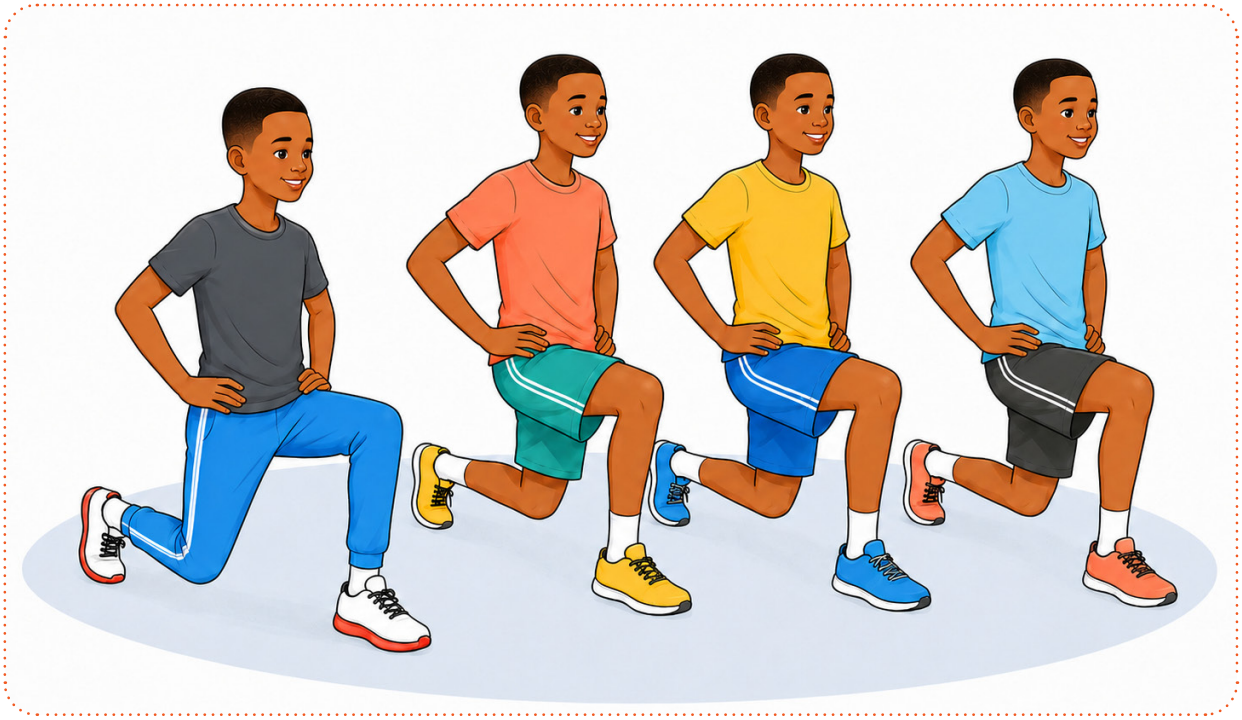

Fig.1.8: *Pupils doing lunges exercise*

Stretching exercises

- The pupils gather in a semi-circle formation. The teacher selects one pupil to lead the class in full-body stretching. They use stretching exercises learned in previous lessons to prepare their muscles for rolling movements.
- They stretch the following parts of the body: shoulders, triceps, biceps, wrists, quadriceps, calves, hamstrings, hips, groin, upper back, neck and jaw.

e. Main activity

The PES the teacher asks pupils to listen carefully and gives clear instructions. The teacher or some pupils show how to do the activity. Then, the pupils start with a set time. The teacher moves around to help, gives praise to the pupils. If needed stop the game or exercise 1 minute and remind instructions to pupils and then continue the game or exercise.

Activity 1.3: Forward Roll

The teacher explains technical steps for performing a forward roll:

- Begin standing with arms overhead.
- Squat down with feet flat.
- Place hands on the mat in front.
- Tuck their chin to their chest to protect their neck.
- Push off gently with their legs to start rolling over their shoulders and upper back.
- Roll in a rounded shape.
- Finish seated and then stand up with arms raised for balance.

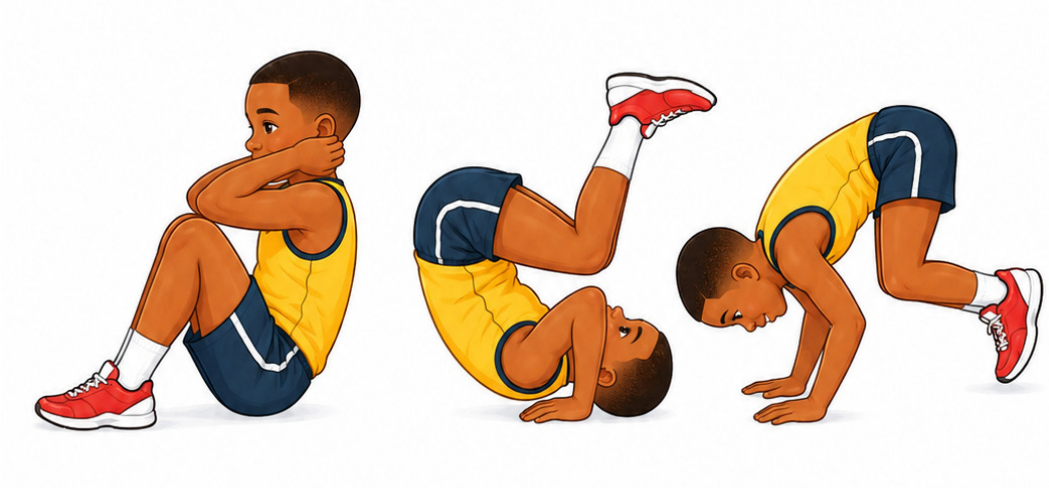

Fig.1.9: *Pupils performing a forward roll*

Activity 1.4: Backward roll

The teacher should ask pupils to respect the following:

Technical steps for performing a backwards roll:

- Start standing with feet shoulder-width apart and arms raised overhead.
- Squat down, keeping feet flat and tuck their chin to your chest.
- Sit back onto the mat and roll over their hips and back (not the head).
- Place their hands by their ears with fingers pointing toward their shoulders.

- Push against the floor with your hands and kick your legs overhead.
- Roll over their shoulders until their feet touch the ground.
- Stand up smoothly with arms overhead to show control and balance.

Variation of the game:

The pupils collaborate in pairs or small groups to perform synchronised forward or backwards rolls. The focus is on teamwork, rhythm and creating smooth, coordinated movement sequences.

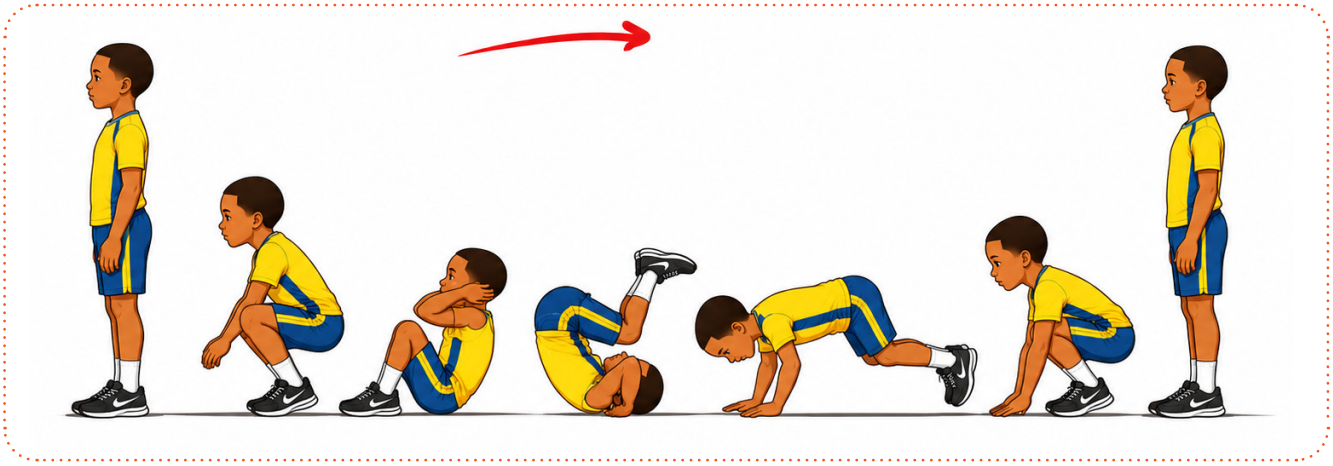

Fig.1.10: *Pupils doing backwards Roll*

Cool-down exercises

The PES the teacher explains why cool-downs are important after sport. The teacher shows how to do the cool-down, then asks pupils to follow along. While they do it, the teacher gives praise like "Well done!" and sets a time limit for the cool-down.

During the cool-down, one pupil can lead the exercise with the teacher support. Pupils lie flat on their backs and then lift into a sit-up, hugging their legs briefly before slowly lowering back to the mat. Pupils Walk slowly to help their heart rate and breathing return to normal after exercise.

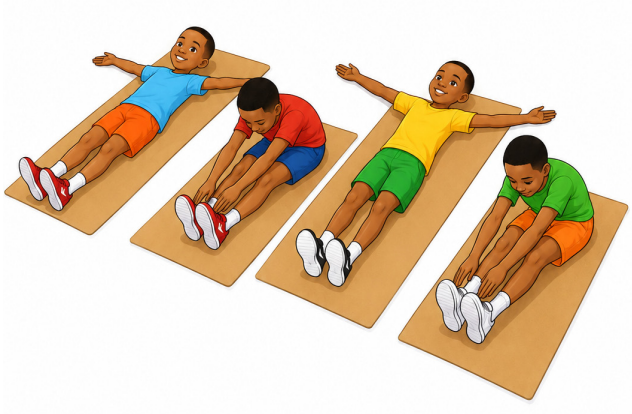

Fig.1.11: *Pupils doing tuck-up exercise*

Summary and reflection

The PES the teacher reviews what pupils did in the lesson, asks how they feel and finds out what they enjoyed most. One or two pupils share their ideas. The teacher thanks everyone and ends the lesson.

Reflection questions

- **What did you notice while doing rolls?** My body needed balance and control to roll smoothly. Rolling made me feel flexible and strong.
- **How is this lesson linked to your previous gymnastics learning?** It uses similar skills like bending, stretching and controlling your body. It helps improve the techniques I practised before.
- **Where can you use these rolling skills in real life?** To fall safely without hurting yourself. To move easily in sports or play activities.

Keywords

The teacher reads them aloud, explains them and tells the pupils to repeat after him/her: ***forward roll*** *(rolling your body forward on the ground from head to feet),* ***backwards roll*** *(rolling your body backward on the ground from feet to head),* ***squat*** *(bending your knees and lowering your body while keeping your feet flat),* ***lunge*** *(stepping forward with one leg and bending both knees to lower your body),* ***tuck jump*** *(jumping and bringing your knees up toward your chest while in the air).*

Talent Watch

During this unit, the teacher should help pupils discover their sports talents by watching how they perform, encouraging them, helping them join school teams or clubs and guiding them to improve.

1.7. End of unit practical assessment

The PES teacher observes the pupils during the activity or game and gives positive feedback like “Good job!”, “Well done!” or “That’s great!”. She/he helps pupils who are struggling or need support. She/he should remind pupils to be careful, slow down or try harder if needed and praises the whole group for their effort and participation.

Under the teacher's guidance, pupils do the following exercises:

Warm-up exercises

- Light jogging around the activity area.
- High knees and heel kicks.
- Simple balance exercises (standing on one foot).
- Gentle ball bouncing and catching.

Stretching exercises

- Arm swings and shoulder rotations.
- Leg swings and gentle lunges.
- Wrist, ankle and body twists.

Activity 1.5

a. Finger-to-nose test

Instructions:

- The teacher should ask the pupil to close their eyes.
- Extend both arms straight out.
- Then, touch the tip of their nose with their right index finger, return and then the left index finger.
- Repeat 3 times per hand.

Assessment criteria: Look for smoothness, accuracy and tremors.

b. Ball bounce and catch

Instructions:

The teacher should:

- Give the pupil a tennis ball.
- Ask them to bounce it with one hand and catch it with the same hand.
- Switch hands.
- Count how many successful bounces or catches they can make in 30 seconds per hand.

Assessment criteria: Consistency, control and switching hands.

c. Obstacle course

The teacher should:

- Set up cones, hurdles, balance beams and crawling tunnels.
- Let pupils run, jump, balance and crawl through the course.

Assessment criteria: Movement efficiency, timing, balance and how well they make transitions between movements.

d. Heel-to-toe walk

The teacher should:

- Ask the pupil to walk in a straight-line heel-to-toe, hands should be on the hips, do 10 steps forward, turn and come back.

Assessment criteria: Number of missteps or losses of balance.

e. Standing balance test

- The teacher asks the pupil to stand on one leg for as long as possible (maximum 60 seconds).
- Pupils repeat with eyes closed.

Assessment criteria: Time held, body sway, hopping or touching down.

Cool-down exercises

Under the teacher's guidance, pupils do the following exercises:

Slow walking and deep breathing.

Gentle stretching of arms, legs, shoulders and back.

Relaxing the body after the assessment.

Sample of an assessment checklist

Criteria	Yes	No	Comments
Understands and follows the instructions for each activity.			
Touches the nose accurately with both hands during the finger-to-nose test.			
Bounces and catches the ball consistently with both hands.			
Completes the obstacle course with good balance and coordination.			
Walks heel-to-toe in a straight line with few or no missteps.			
Maintains balance while standing on one leg.			
Changes smoothly between different movements.			
Participates actively and safely throughout the assessment.			

Sample of an assessment rubric

Criteria	Excellent	Good	Satisfactory	Needs improvement
Finger-to-nose test	Touches the nose accurately and smoothly with no tremors.	Touches the nose accurately with minor errors.	Completes the task with some difficulty or hesitation.	Has difficulty touching the nose accurately or maintaining control.
Ball bounce and catch	Bounces and catches the ball consistently with both hands.	Performs most bounces and catches successfully.	Performs some successful bounces and catches.	Has difficulty bouncing and catching the ball.
Obstacle course	Completes the course smoothly with excellent balance and coordination.	Completes the course with minor mistakes.	Completes the course with some difficulty.	Has difficulty completing the course or maintaining balance.
Heel-to-toe walk	Walks the full distance with no loss of balance or missteps.	Walks with one or two minor missteps.	Walks with several missteps but completes the task.	Frequently loses balance or cannot complete the walk correctly.
Standing balance test	Maintains balance for a long time with excellent body control.	Maintains balance with slight body sway.	Maintains balance for a short time with some hopping or touching down.	Has difficulty maintaining balance and frequently loses position.

1.8. Additional activities

1.8.1. Remedial activities

Activity 1.6

The teacher asks pupils to do the following exercises:

- Pupils walk in a circle with their partner, swinging arms and gently jogging in place.
- Pupils jog slowly in place while their partner watches and gives feedback (e.g: Stand tall, arms move with legs).
- One pupil jumps forward (small hop) and freezes on landing, trying to stay balanced.
- Partner checks for posture (knees bent, arms out for balance) and gives a thumbs-up or suggestions.

The teacher lets pupils switch roles after 1 to 2 minutes

1.8.2. Consolidation activities

Activity 1.7

Pupils could do the following activities:

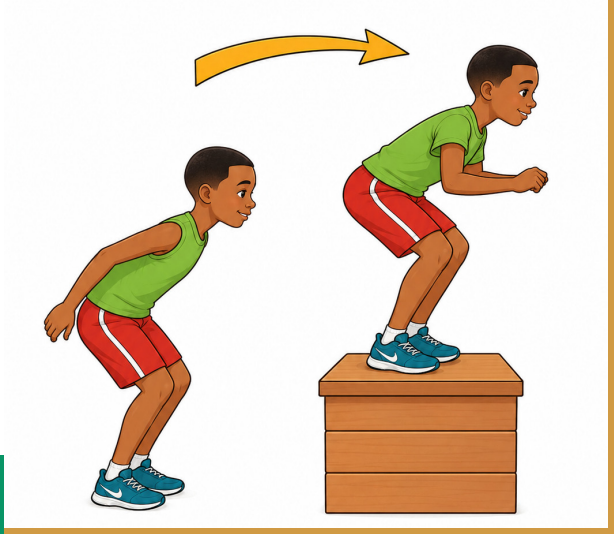
- *Station 1 (Obstacle course):* Include crawling, balancing, jumping and directional movement.
- *Station 2 (Dribble and stop (ball control):* Dribble a ball and stop it on command using hands (Basketball) or feet (Football).
- *Station 3 (Mirror movement game):* Work in pairs where one leads and the other mirrors the movements.
- *Station 4 (Throw, clap and catch):* Throw a ball up, clap once (or more) and catch it to improve timing and coordination.
- *Station 5 (Jump and land):* Practice jumping forward, turning in the air and landing softly with balance.

1.8.3. Extension activities

Activity 1.8

Pupils could do the following activities:

- *Sequence movement challenge:* Create and perform a sequence of movements (e.g: jump, roll and balance pose) smoothly.
- *Agility ladder exercises:* Use a floor ladder for quick step patterns (in-in-out-out, zigzag, etc.).
- *Reaction ball catch:* Use a reaction ball that bounces unpredictably to improve reflex and coordination.
- *Dance or Gymnastics routine:* Pupils choreograph and perform a short routine combining balance, control and flow.
- *Target games with strategy:* Throwing balls to knock down objects with point values – requires both control and decision-making.



UNIT 2

BODY CONTROL AND BALANCE

Key Unit Competence

Create a simple character and narrative through movement and dance in response to a range of stimuli.

At the end of this unit, the pupil should be able to:
Knowledge and understanding
• Explain the concept of body control and balance in movement. • Demonstrate body control and balance during physical activities.
Skills
• Perform movements with control and balance. • Move with awareness of space, rhythm and body coordination.
Attitudes and values
• Show self-confidence and creativity during activities. • Listen to instructions carefully. • Follow safety guidelines at all times.

2.1. Prerequisite (Knowledge and understanding, skills, attitude and values)

Pupils will learn more effectively in this unit if they can respond to the teacher's instructions, perform simple actions and movements with consistency, fluidity, clarity and demonstrate attitudes such as flexibility, coordination and balance.

2.2. Guidance on introductory activity

Opening discussions

The teacher asks the following questions to the pupils:

- **What is body control and balance?** Body control is the ability to move the body in a coordinated and controlled way, while balance is the ability to keep the body steady when standing still or moving.
- **Which activities require good body control and balance?** Some activities that require good body control and balance are running, jumping, landing, turning, gymnastics, dancing, Football, Basketball and Volleyball.
- **Why are body control and balance important?** Body control and balance are important because they help us perform movements correctly, improve sports performance, prevent falls and injuries and increase confidence during physical activities.

Pupils discuss and share their ideas. The teacher explains to the pupils that good body control and balance are essential for performing physical activities safely and effectively. They help pupils maintain correct posture, change direction quickly and perform different movement skills with confidence. The teacher guides the discussion and then leads the pupils into warm-up and stretching exercises before the practical activities.

The teacher lets pupils do the following activities:

In pairs, one pupil moves slowly (balancing, stretching), the other copies and they switch roles after.

Activity 2.1: Let pupils rotate through 3 stations (2 mins each):

Pupils do the following activities:

- *Heel-to-toe walk:* Walk straight, putting one foot in front of the other like walking on a tightrope.
- *Stand on one foot:* Lift one foot and balance, then switch to the other foot.
- *Freeze in a pose:* When someone says "freeze," hold a balance position (like standing on one leg) without moving.

The teacher should continue with the main part of lesson one.

2.3. Generic Competencies

- **Creativity and innovation:** Create and perform movement and dance sequences that express simple characters, stories and ideas in response to different stimuli.
- **Communication in the official language:** Express ideas through movement, explain dance sequences, give and follow instructions and discuss the meaning of performances with others.

- **Cooperation, interpersonal management and life skills:** Work collaboratively during movement and dance activities, respect others' ideas, demonstrate teamwork, discipline and confidence during performances.

2.4.Basic Values

- **Self-reliance:** Developing confidence and independence in creating movements, expressing ideas through dance and controlling body movements.
- **National and cultural identity:** Appreciating and promoting Rwandan culture through creative movements, traditional dances and activities that express cultural values.
- **Solidarity and democracy:** Working cooperatively with others, sharing ideas, respecting different expressions and creating movement sequences together.

2.5. Cross Cutting Issues

- **Genderequality:** Developed through encouraging equal participation of boys and girls in movement creation, dance activities and expression of ideas without discrimination.
- **Peace and values education:** Developed through promoting cooperation, respect, creativity, confidence, teamwork and appreciation of others' performances during movement activities.
- **Inclusive education:** Developed through adapting movement and dance activities to support pupils with different abilities and ensuring that all pupils participate actively and confidently.

2.6. List of lessons and learning objectives

#	Lesson title	Learning objectives	Number of periods
1	Exercises and games that promote fair play and emotional control.	To develop fair play, respect, self-control and cooperation through guided exercises and team-based games.	2
2	Exercises of playing in groups using movement creations and coordination.	To develop movements and sequences, enhancing their balance, coordination, creativity and teamwork skills.	2
3	End of unit practical assessment.	To assess pupils how they can create a simple character and narrative through movement and dance in response to a range of stimuli.	2

Lesson 1: Exercises and games that promote fair play and emotional control

a. Learning objectives

By the end of this lesson, the pupil should be able to develop fair play, respect, self-control and cooperation through guided exercises and team-based games

b. Teaching and learning resources

Sport facilities, armbands, beanbags (or rolled-up socks), a rug, a towel or a natural grass area.

c. Prerequisites (Knowledge and understanding, skills, attitude and values)

Pupils will perform better if they listen to the teacher, complete simple warm-up exercises and practise slow breathing to relax their muscles. This helps them stay calm, strong and ready to learn.

d. Introduction

The teacher should go straight to the main part of this lesson because opening discussions and warm-up were conducted during introductory part.

Activity 2.2 : Balance tag game

Game instructions:

- The teacher sets up a safe play area.
- 2 to 3 pupils are chosen as catchers and wear armbands.
- When tagged, pupils freeze and hold a balance position (e.g: Standing on one foot).
- Hold the position for 5 seconds before rejoining the game.
- Rotate catchers after a few minutes and emphasise gentle tagging.

Variations of the game:

The teacher can:

- Increase the balance hold time.
- Ask pupils to balance like animals (e.g: stalk, stand, etc).

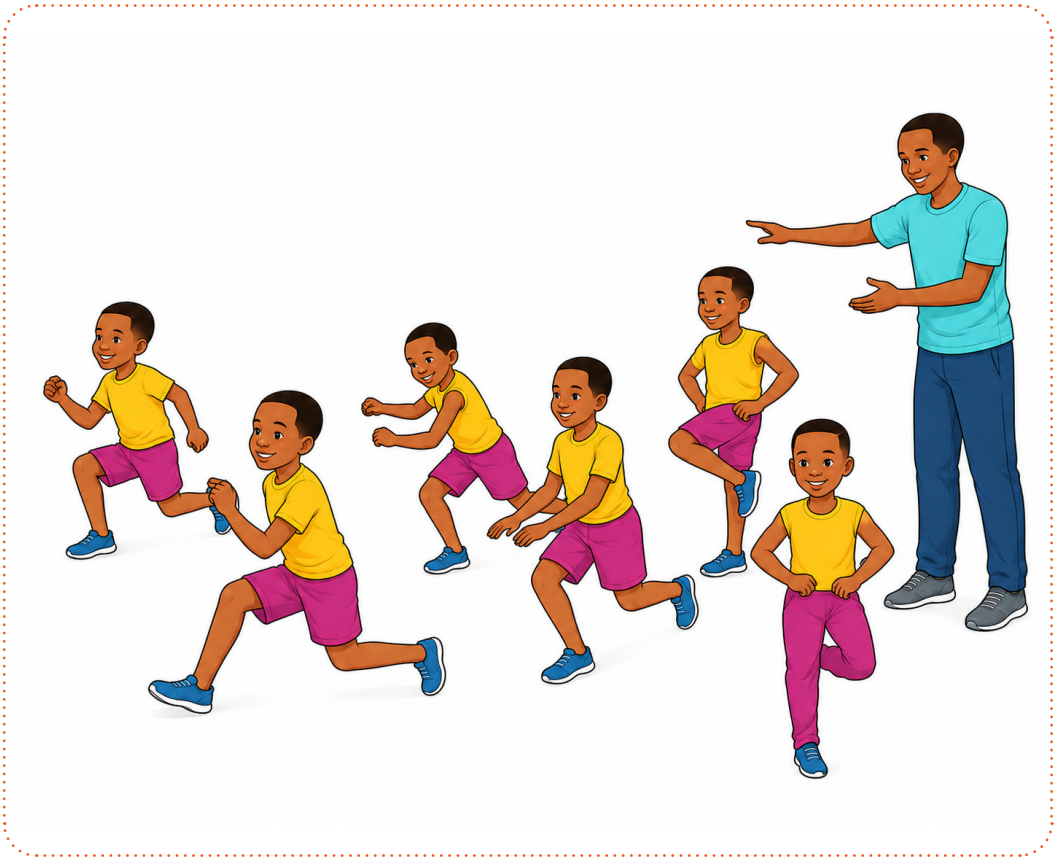


Fig.2.1: *Pupils doing balance like a monkey on one foot*

e. Main activity

The PES the teacher asks pupils to listen carefully and gives clear instructions. The teacher or some pupils show how to do the activity. Then, the pupils start with a set time. The teacher moves around to help, gives praise to the pupils. If needed stop the game or exercise 1 minute and remind instructions to pupils and then continue the game or exercise.

Activity 2.3: Rhythm to Gymnastic movement

For this lesson, the teacher should use structured games that help pupils develop intellectual and social skills while building positive relationships with others. These activities focus on self-control, teamwork and fairness in game play.

Name of the Game 2.1: Frozen tag game

Organisation and game instructions:

- Select one pupil to be "it." This person will tag other pupils. If the group is large, select multiple "it" players.
- When the pupil is tagged, they must freeze and stand with their legs apart.
- To be unfrozen, another pupil must crawl through the frozen pupil's legs.

- The game ends when all players are frozen.
- The last pupil to be frozen becomes “it” in the next round.
- Make sure the playing area is safe and free from obstacles.

Variation of the game:

After being unfrozen, pupils must stay connected to the person who freed them (e.g: holding hands) while avoiding being tagged again.

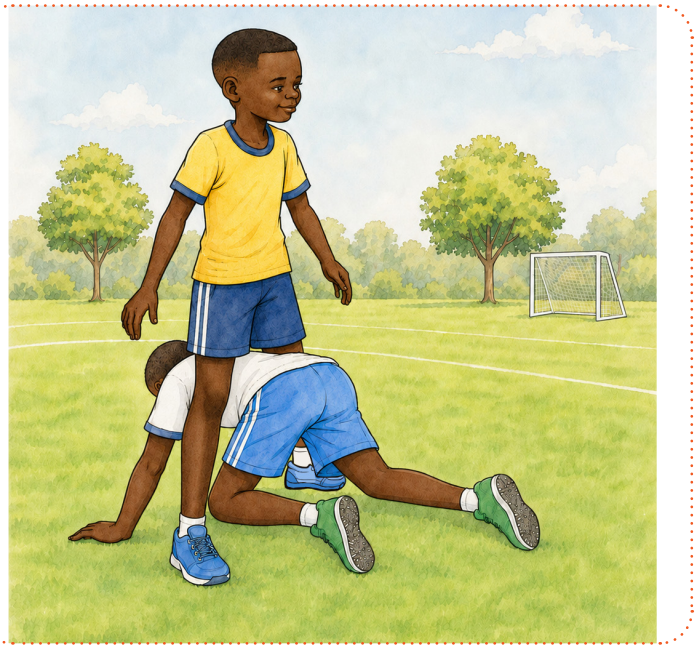

Fig.2.2: *Pupils doing unfreeze the frozen*

Name of the Game 2.2: Frozen beanbag game

Organisation and game instructions

Th e teacher should:

- Clearly define the play area and ensure it is free from obstacles.
- Give each pupil a beanbag (or a similar soft object).
- Ask pupils to place the beanbag on their heads and move freely around the area.

The teacher explains that:

- Pupils may move at their own pace, trying not to let the beanbag fall.
- If the beanbag falls, the pupil is “frozen” and must stand still.
- Another pupil can unfreeze them by bending down, picking up the beanbag and gently placing it back on their head, without dropping their beanbag.

The game continues until the teacher ends it.

Observation tips: The teacher should check if pupils are actively helping each other, staying respectful and moving across the whole play area with control and kindness.

Variations of the game

The teacher can:

- Ask pupils to balance two beanbags for more challenges.
- Encourage faster movement while maintaining control.
- Introduce safe obstacles (e.g: cones or low bars) for pupils to step over or around to increase focus and body control.

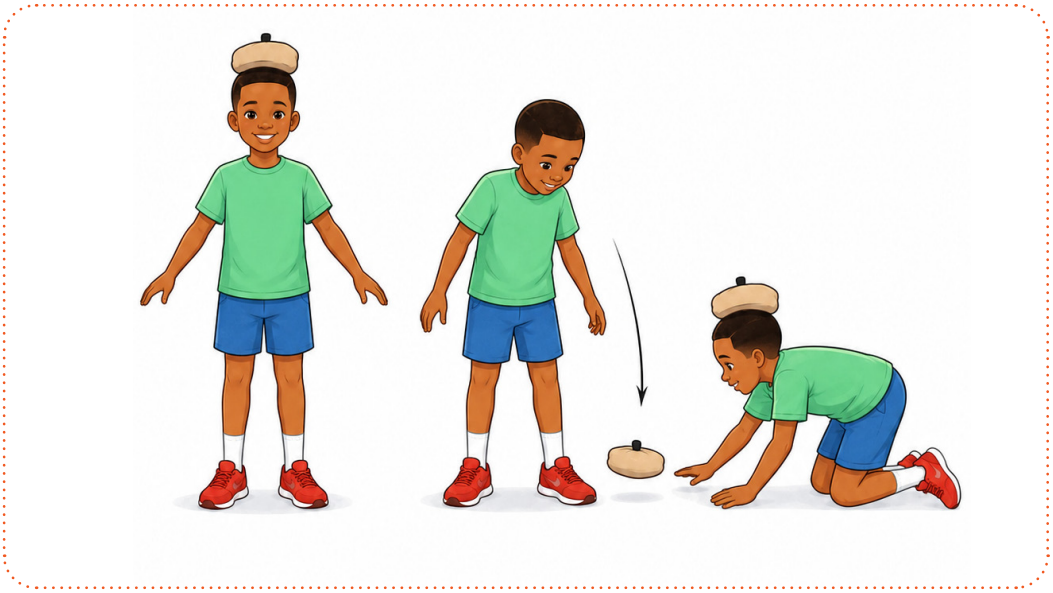

Fig.2.3: *Pupils doing a frozen beanbag game*

Name of the Game 2.3: Lazy day rest game

Organisation and game instructions:

The teacher should:

- Ask pupils to lie on their backs with legs slightly apart and arms resting at their sides.
- Ensure there is enough space between pupils to move without disturbing each other.
- Instruct pupils to slowly contract and relax specific muscles as guided:

Examples: Take a deep breath, hold it, then relax. Pull your toes toward and then away from your body, hold and relax. Pull in your belly, hold and relax. Make a tight fist with your hands, hold and relax. Smile and gently turn your head from side to side, then repeat.

- Continue guiding pupils through slow, calm muscle contractions until they are fully relaxed.
- Observe their behaviour: They should move slowly, stay calm, avoid sudden stretches and not disturb others.

Cool-down exercises

The PES the teacher explains why cool-downs are important after sport. The teacher shows how to do the cool-down, then asks pupils to follow along. While they do it, the teacher gives praise like "Well done!" and sets a time limit for the cool-down.

Under the teacher's guidance, pupils do the following exercises:

- Slow walking and deep breathing.
- Gentle stretching of arms, legs and back.
- Relaxing the body after the activities.

Summary and reflection

The PES the teacher reviews what pupils did in the lesson, asks how they feel and finds out what they enjoyed most. One or two pupils share their ideas. The teacher thanks everyone and ends the lesson.

Reflection questions

- **What was the most difficult part of the games for you and why?** The most difficult part was running fast without bumping into others because I had to watch the ball and other players at the same time.
- **How did the Frozen Tag game help you improve your cognitive, social and emotional control?** Cognitive: I had to think quickly about where to run or who to tag. Social: I worked with my friends and followed the rules. Emotional: I learned to stay calm when I was tagged or frozen.
- **What is something you can do in your daily life to improve your cognitive, social and emotional control?** Pay attention in class and think before I act. Be kind and share with friends. Stay calm when I feel upset or frustrated.

Keywords

The teacher reads them aloud, explains them and tells the pupils to repeat after him/her: ***fair play*** *(playing honestly and respecting others),* ***balance rag*** *(an activity or tool used to practise balance),* ***frozen tag*** *(a game where players tagged must stay still until freed by others),* ***frozen beanbag*** *(a game where players hold or place beanbags without moving, often while following rules).*

Lesson 2: Exercises of playing in groups using movement creations and coordination

a. Learning objectives

By the end of this lesson, the pupil should be able to work together in groups to create movements and sequences, improving their balance, coordination, creativity and teamwork skills.

b. Teaching and learning resources

Sport facilities, radio, drums, drumsticks, piano, rope, CD player, balls, ladder and stairs.

c. Prerequisites (Knowledge and understanding, skills, attitude and values)

This lesson will be more successful if pupils are already able to perform various aerobic exercises with growing coordination, flexibility and balance.

d. Introduction

Opening discussions

The PES the teacher brings all pupils together and asks if they like playing games or doing physical exercises. Pupils give examples of games they play or physical exercises they do. The teacher explains that in this lesson, they will all play safely, share fairly and learn that games are good for both boys and girls.

The teacher asks questions to help pupils to think about working together and using their bodies for movement. This helps them remember past exercises and get ready for group activities.

Warm-up and stretching exercises

The PES the teacher should explain why warming up and stretching are important before sports. The teacher shows how to do the warm-up and stretching, then explains it again. Pupils watch and try it slowly and carefully. The teacher checks if they understand, encourages them with kind words and sets a time limit for the warm-up and stretching.

Pupils start with light jogging and simple rhythm movements like clapping or skipping to improve coordination. Then, they do full-body stretches to get ready for group and creative activities, focusing on areas like arms, legs, back, hips, neck and jaw.

e. Main activity

The PES the teacher asks pupils to listen carefully and gives clear instructions. The teacher or some pupils show how to do the activity. Then, the pupils start with a set time. The teacher moves around to help, gives praise to the pupils. If needed stop the game or exercise 1 minute and remind instructions to pupils and then continue the game or exercise.

The teacher explains that coordination is the ability to choose the right muscle at the right time with the right intensity to achieve smooth and effective movement.

Activity 2.4: Jumping rope for coordination

The pupils use jump ropes and perform the following variations to improve coordination:

- Run in place while spinning the rope.
- Hop on one foot.
- Alternate kicking one foot while jumping.
- Cross the rope in front of the body while jumping.
- Experiment with advanced footwork by trying to jump after spinning the rope twice or three times.
- The teacher demonstrates and encourages pupils to explore these movements at their own pace, offering support where needed.

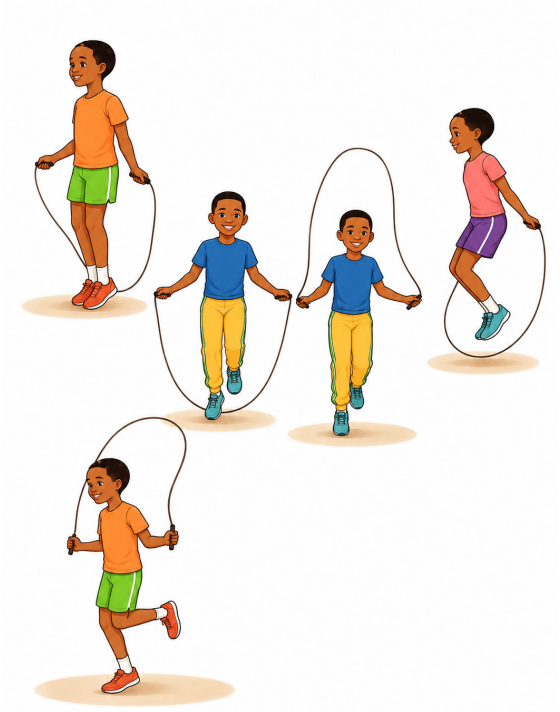

Fig.2.4 :Pupils doing jumping over the rope

Activity 2.5: Lateral plyometric jumps

Instructions:

- Place a plyometric box (or any safe 20 cm high platform) in front of the pupil.
- Stand with feet shoulder-width apart and get into a squat position.
- From the squat, jump laterally (side-to-side) over the box using full body effort
- Land softly and immediately prepare to jump back in the opposite direction.

Teaching points:

The teacher should:

- Remind pupils to bend their knees during landing to reduce impact.
- Emphasise controlled movement and balance on landing.
- Start slowly and then build speed with rhythm or music if available.

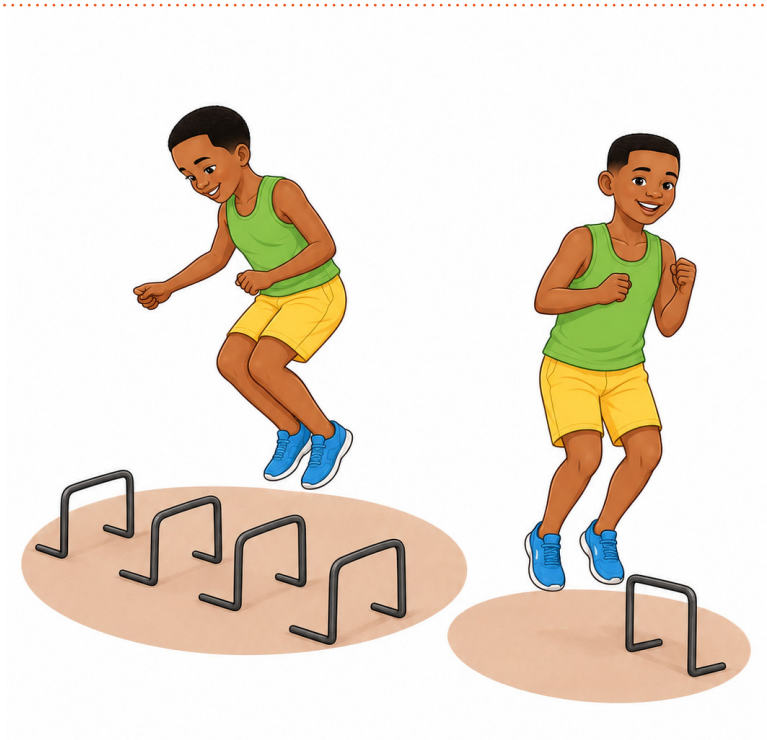

Fig.2.5: *Pupils doing lateral plyometric jumps*

Activity 2.6: Speed ladder agility exercises

The teacher instructs pupils to:

- Place an agility ladder flat on the ground (or use tape or chalk to create one).
- Take turns moving through the ladder using various footwork patterns to improve coordination, rhythm, balance and agility.

The teacher explains to the pupils that ladder exercises help develop several key physical skills, including stride length, running speed and agility. They are especially useful for improving movement patterns used in sports and daily activities.

Examples of footwork patterns that pupils can practice:

One foot per box, two feet per box, lateral steps and in-in and out-out

Variations of the game:
The teacher encourages pupils to challenge themselves with the following ladder exercise variations:

- *Ladder linear run:* Move forward or backwards through the ladder.
- *High knees or jumping strides:* Emphasise power and rhythm.
- *Lateral quick steps:* Move side to side through each square quickly.
- *Backwards jumps:* Hop backwards from square to square.
- *Lateral single-leg hops:* Hop sideways on one foot through the entire ladder.

Teaching points:

- Start slow for accuracy, then gradually increase speed.
- Use rhythm or music to guide tempo.
- Focus on control, posture and smooth transition

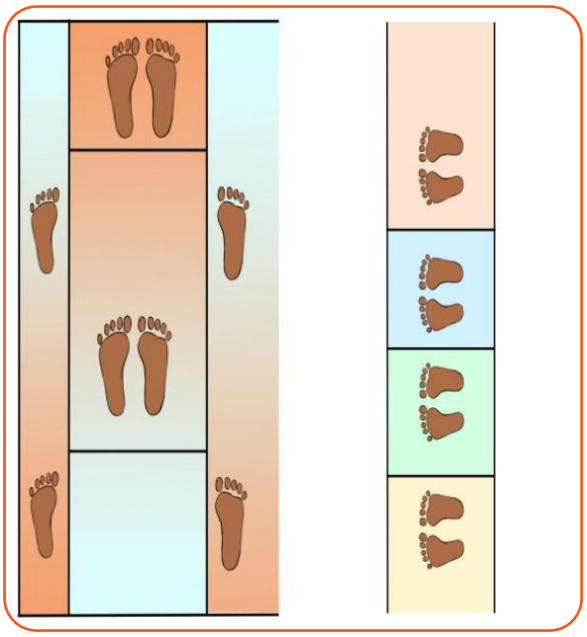

***Fig.2.6** :Different footwork and movements*

Cool-down exercises

The PES the teacher explains why cool-downs are important after sport. The teacher shows how to do the cool-down, then asks pupils to follow along. While they do it, the teacher gives praise like "Well done!" and sets a time limit for the cool-down.

The teacher guides the pupils through a cooling-down routine to help the body to relax after intense activity. This includes light movements and muscle stretching.

Summary and reflection

The PES the teacher reviews what pupils did in the lesson, asks how they feel, and finds out what they enjoyed most. One or two pupils share their ideas. The teacher thanks everyone and ends the lesson.

Reflection questions

- **What was the most difficult movement for you and how did you feel during it?** The tuck jump was the hardest because I had to lift my knees high. I felt a little tired but excited to try again.
- **How did today's lesson relate to other movement activities you've done in past lessons?** It used similar skills like jumping, balancing and rolling. It helped improve my coordination and control from previous lessons.
- **What can you do at home to continue improving your body coordination and control?** Practise balance exercises, jumping and stretching daily. Play games or activities that make you move carefully and stay steady.

Keywords

The teacher reads them aloud, explains them and tells the pupils to repeat after him/her: ***plyometric box*** *(a box used for jumping exercises to build power and strength),* ***squat position*** *(bending your knees and lowering your body while keeping your feet flat),* ***ladder agility*** *(using a ladder on the ground to practise quick foot movements and coordination),* ***coordination*** *(using different parts of your body together smoothly),* ***rhythm*** *(moving your body in a regular, timed pattern),* ***balance and agility*** *(staying steady while moving and changing direction quickly).*

Talent Watch

During this unit, the teacher should help pupils discover their sports talents by watching how they perform, encouraging them, helping them join school teams or clubs and guiding them to improve.

2.7. End of unit practical assessment

The PES teacher observes the pupils during the activity or game and gives positive feedback like "Good job!", "Well done!" or "That's great!". She/he helps pupils who are struggling or need support. She/he should remind pupils to be careful, slow down or try harder if needed and praises the whole group for their effort and participation.

Under the teacher's guidance, pupils do the following exercises:

Warm-up exercises

- Light jogging around the activity area.
- High knees and heel kicks.
- Side shuffles and skipping.
- Simple balance and coordination movements.

Stretching exercises

- Leg swings and gentle lunges.
- Arm swings and shoulder rotations.
- Ankle rotations and body twists.

Activity 2.7:

* ***Group movement sequence***

The teacher asks pupils to work in small groups to create a short movement routine.

They must:

- Move together using coordinated steps, turns or shapes.
- Use rhythm or music if available.
- Show emotions or story elements (e.g: Moving like animals, telling a mood like joy or calm).
- Present the sequence to the class.

The teacher asks pupils to:

- Stand on one leg for 30 seconds (switch legs).
- Perform a simple foot coordination pattern (e.g: Forward-backwards tap, rope skipping, ladder run).
- Respond to verbal cues (e.g: freeze, balance, turn).

Observations of the teacher during group games:

- The teacher observes pupils' participation during team activities .
  - Ability to move in rhythm with others.
  - Respect for rules and teammates.
  - Emotional control when tagged, losing or making mistakes.

Evaluation criteria assessment:

- Ability to perform controlled, creative movement.
- Consistency in balance and coordination.
- Respectful, fair and calm participation.
- Ability to express ideas through movement within a group.

* ***One-leg stand (Stork balance test)***

- *Setup:* Stand on one leg with the non-supporting foot resting against the knee of the supporting leg. Hands on hips.
- *Goal:* Maintain balance as long as possible without moving the standing foot.

Assessment criteria:

- *< 10 seconds:* Needs Improvement.
- *10 to 20 seconds:* Developing.
- *20 seconds:* Good control.

* ***Agility ladder exercises***

- *Setup:* Use an agility ladder or chalk lines.
- *Goal:* Perform exercises like lateral steps, hopscotch and in-and-out hops.

Assessment criteria: Watch for foot control, rhythm and balance.

Balance and catch

- *Setup:* Balance on one leg while catching and throwing a light ball (e.g: a tennis ball).
- *Goal:* Maintain balance while focusing on hand-eye coordination.

Assessment criteria: Count consecutive catches without losing balance.

* Obstacle course with a balance focus

- *Setup:* Create a mini obstacle course (balance beam, hopscotch, cones to weave through, etc.).
- *Goal:* Navigate the course smoothly without touching the ground outside the path.

Assessment criteria: Track time and number of balance faults (stepping off, touching cones, etc.).

Cool-down exercises

Under the teacher's guidance, pupils do the following exercises:

- Slow walking and deep breathing.
- Gentle stretching of arms, legs, shoulders and back.
- Relaxing the body after the assessment.

Sample of an assessment checklist

Criteria	Yes	No	Comments
Understands and follows the activity instructions.			
Performs coordinated and creative movements with the group.			
Moves in rhythm with others.			
Maintains good balance during one-leg standing and movement activities.			
Demonstrates good coordination during agility, balance and catching activities.			
Completes the obstacle course safely and efficiently.			
Responds correctly to verbal cues (freeze, balance and turn).			
Expresses ideas or emotions through movement.			
Respects teammates, follows rules and shows fair play.			
Participates actively and maintains emotional control through-out the activities.			
Understands and follows the activity instructions.			
Performs coordinated and creative movements with the group.			

Sample of an assessment rubric

Criteria	Excellent	Good	Satisfactory	Needs improvement
Movement sequence	Performs coordinated, creative and well-controlled movements with the group.	Performs coordinated movements with few mistakes.	Performs basic movements with some support.	Has difficulty coordinating movements with the group.
Balance and coordination	Maintains excellent balance and coordination throughout all activities.	Maintains good balance with minor errors.	Maintains balance with some difficulty.	Frequently loses balance or coordination.
Agility and movement control	Completes agility exercises and obstacle course smoothly with excellent control.	Completes activities with good control and few errors.	Completes activities with some hesitation or mistakes.	Has difficulty completing activities safely and correctly.
Expression and rhythm	Expresses ideas or emotions clearly and moves confidently in rhythm.	Shows good expression and rhythm most of the time.	Shows limited expression or rhythm.	Has difficulty expressing ideas or moving in rhythm.
Respect and teamwork	Always follows rules, cooperates with others and shows emotional control.	Usually follows rules and works well with others.	Sometimes follows rules and cooperates with reminders.	Rarely follows rules, cooperates or controls emotions.

2.8. Additional Activities

2.8.1. Remedial activities

Activity 2.8: Exercises for keeping balance

Instructions:

The pupils will perform simple balance exercises that help them improve body stability, posture and focus.

Steps:

- Stand on one foot and hold the position for up to 30 seconds.
- Repeat the same exercise on the other foot.

Challenge and progression:

Once pupils can maintain balance for 30 seconds without support, introduce the following variations to increase the difficulty:

- Close their eyes while standing on one foot.
- Swing the raised foot slowly forward and backwards while maintaining balance.
- Try the exercise on soft ground for more challenge.

Teaching points to considered by the teacher:

- Encourage pupils to stay focused on one spot (visual focus point).
- Remind them to keep their core tight and body relaxed.
- Allow pupils to help each other with encouragement, not physical support, to keep it pupil-centred.

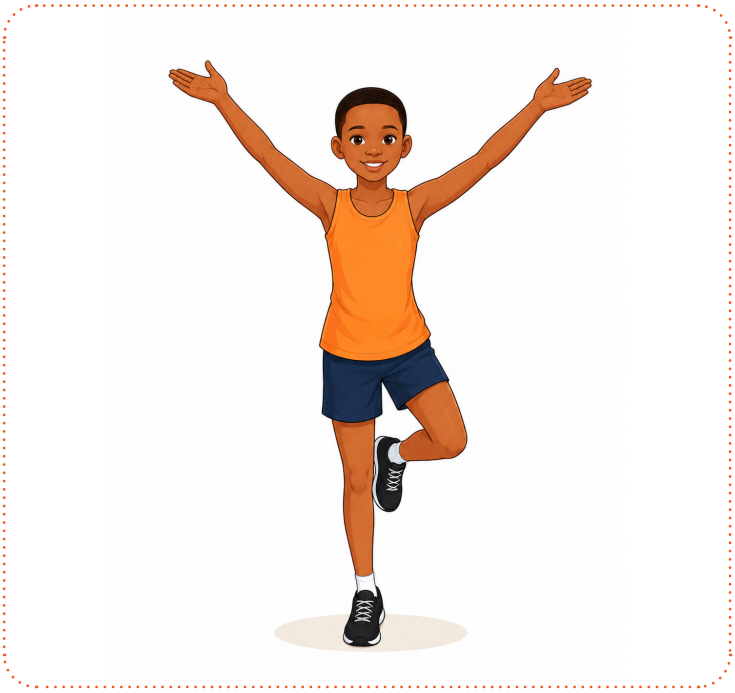

Fig.2.7: *The pupil doing standing one leg up*

Activity 2.9: Animal walks

- *Bear walk, crab walk, frog jump:* Improve coordination and strength.
- *One-leg stand with support:* Stand on one leg while holding a wall or chair for support.
- *Mirror movements (Slow):* Pupils copy the teacher or a peer's slow movement for better control.

2.8.2. Consolidation activities

Activity 2.10: *The teacher tells the pupils:*

Pupils do the following exercises:

- To stand with their feet hip-width apart. Reach one leg forward and slowly lower their body as if they are going to tap the floor in front of them. Keep their arms straight and extended forward.
- Not to bend their back. Lower their body until they are almost sitting on the heel of their back leg, then come back up with control.

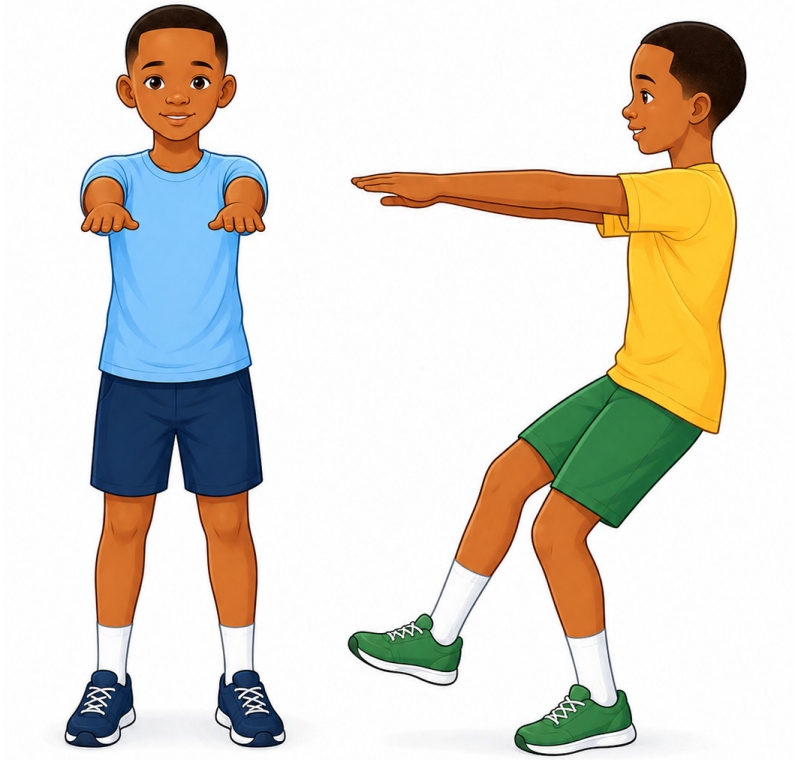

Fig.2.8: *Pupils doing reach out one leg and go down*

2.8.3. Extension activities

Activity 2.11: Plyometric jump box exercises

Instructions:

- Use a safe, sturdy plyometric box or platform.
- Pupils take turns jumping onto and off the box using explosive power and controlled landings.
- Start with a moderate height to ensure safety and confidence.

The teacher tells pupils to:

- Stand facing the box with feet shoulder-width apart.
- Bend their knees into a squat position.
- Swing their arms and jump explosively onto the box, landing softly with knees slightly bent.
- Step or hop down carefully and reset.

Activity 2.12: Lateral jumps

- The pupils stand sideways to the box and jump over it laterally (side-to-side), landing softly and maintaining balance.
- They repeat in both directions.

Teaching points to consider:

- Remind pupils to always land with bent knees.
- Focus on soft, controlled landings to reduce injury risk.
- Promote group encouragement and support between turns.

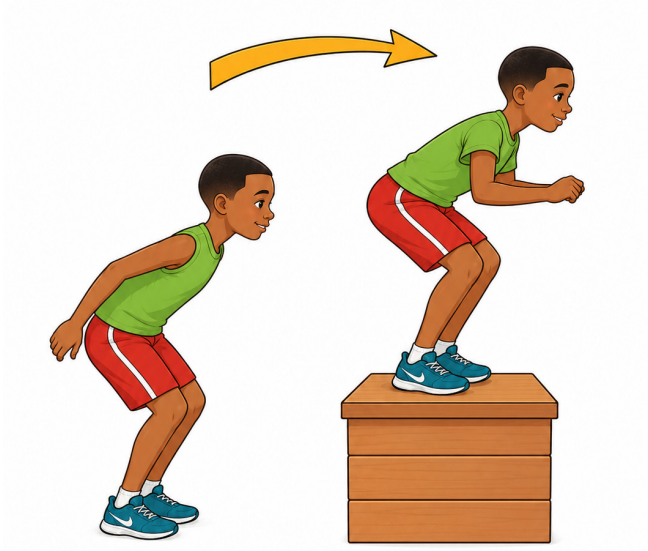

Fig.2.9: *Pupils doing lateral jump*

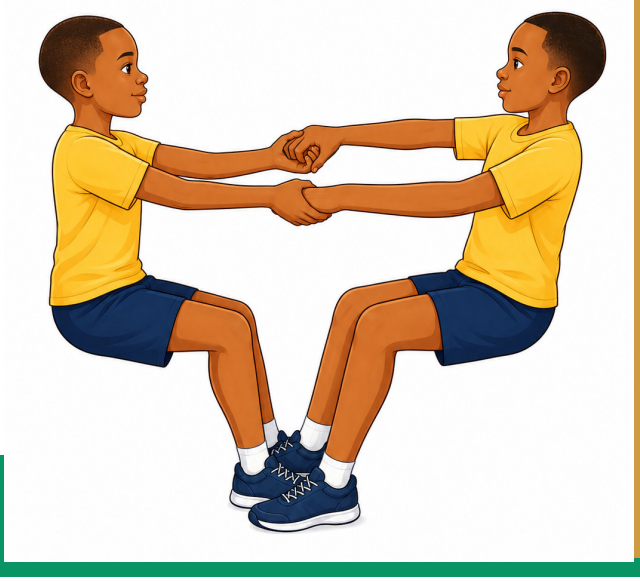

UNIT 3

GYMNASTICS EXERCISES

Key Unit Competence

Safely execute basic Gymnastic movements such as forward roll, backwards roll, body balance positions and group movement sequences.

At the end of this unit, the pupil should be able to:
Knowledge and understanding • Identify and demonstrate the correct body posture needed for rolling. • Explain the importance of warming up and stretching before any exercise.
Skills • Use proper landing techniques during jumps or rolls. • Maintain body tension for control and stability. • Demonstrate safe and balanced movement throughout activities.
Attitudes and values • Work cooperatively with others. • Show resilience during challenges. • Demonstrate confidence and stay motivated in all activities.

3.1. Prerequisite (Knowledge and understanding, skills, attitude and values)

Pupils will perform better in this unit if they can follow instructions, perform basic physical and body rotation activities and apply flexibility exercises learned in previous grades.

3.2. Guidance on introductory activity

Before starting lesson one, the teacher tells pupils that they are going to study Gymnastics. He/she informs them that they will work on moving with control, balance and flexibility.

The following movements will be performed: Stand tall, bend forward, squat, star shape, tight shape, arm circles and moving slowly with balance. The following questions will be asked:

- **What body parts did you use?** I used my arms, legs, back and core (stomach muscles) to support my body and make movements.
- **Why is balance and flexibility important in Gymnastics?** Balance helps me stay steady and not fall, while flexibility helps me bend, stretch and move easily during gymnastics.

The teacher should continue with the main part of lesson one.

3.3. Generic Competencies

- **Critical thinking and problem-solving:** Analyse and refine body positions, balance, coordination and movement techniques to perform Gymnastics skills safely, correctly and confidently.
- **Cooperation, interpersonal management and life skills:** Work collaboratively during Gymnastics activities, follow safety rules, support classmates and demonstrate discipline, responsibility and teamwork.
- **Creativity and innovation:** Create and perform simple group movement sequences by combining rolls, balances and body positions with confidence and control.

3.4. Basic Values

- **Safety and responsibility (Dignity and integrity):** Following safety rules, using Gymnastics equipment correctly, respecting others and performing movements responsibly.
- **Self-reliance:** Developing confidence and independence in performing forward rolls, backward rolls, balance positions and movement sequences.
- **Commitment and resilience:** Continuing to practise, learning from mistakes and showing determination to improve Gymnastics skills and body control.

3.5. Cross Cutting Issues

- **Gender equality:** Developed through encouraging equal participation of boys and girls in Gymnastics exercises, body balance activities and group movement sequences.
- **Peace and values education:** Developed through promoting discipline, cooperation, respect, confidence, responsibility and safety awareness while performing Gymnastics movements.
- **Inclusive education:** Developed through adapting Gymnastics activities to support pupils with different abilities and ensuring safe and active participation for all pupils.

3.6. List of lessons and learning objectives

#	Lesson title	Learning objectives	Number of periods
1	Individual Gymnastic exercises.	To do simple Gymnastics moves like rolls, balances, and stretching exercises with good control, accuracy and safety.	2
2	Collective Gymnastic exercises.	To do easy Gymnastics in groups. They will work together, move in time and stay safe.	2
3	End of unit practical assessment.	To assess the execution of Gymnastics movement and other forms of physical activity.	2

Lesson 1: Individual Gymnastic exercises

a. Learning objectives

By the end of this lesson, the pupil should be able to do simple Gymnastics moves like rolls, balances and stretching exercises with good control, accuracy and safety.

b. Teaching and learning resources

Sport facilities or natural grass, mat or carpet, whistle, balance bars, benches, rope and any safe gymnastic props.

c. Prerequisites (Knowledge and understanding, skills, attitude and values)

Pupils will understand this lesson better if they have already practised basic forward and backwards rolls, rotation exercises and safe stretching of the neck, hips, shoulders and back muscles. These activities were introduced in primary five, unit three: Basic Gymnastics skills.

d. Introduction

The teacher should continue with the main part of the lesson, hence opening discussion, warm-up and stretching exercises have been done in the introductory activity.

e. Main activity

The PES the teacher asks pupils to listen carefully and gives clear instructions. The teacher or some pupils show how to do the activity. Then, the pupils start with a set time. The teacher moves around to help, gives praise to the pupils. If needed stop the game or exercise 1 minute and remind instructions to pupils and then continue the game or exercise.

The teacher informs pupils that they are going to create their own short Gymnastics routines focusing on balance, control and flexibility. Each move is explained step by step. A skilled pupil may show an example of the movements. If not, the teacher will guide and assist. Quick pupils are encouraged to support their classmates.

Activity 3.1: Sequence with body position

The teacher asks pupils to create and perform a simple sequence of movements by combining different body positions used in Gymnastics as observed below. After showing a sequence, the pupil describes and name it. E.g: Partner balance lean, partner toe to toe pull, partner bridge pose etc. (Refer examples provided in the lesson two).

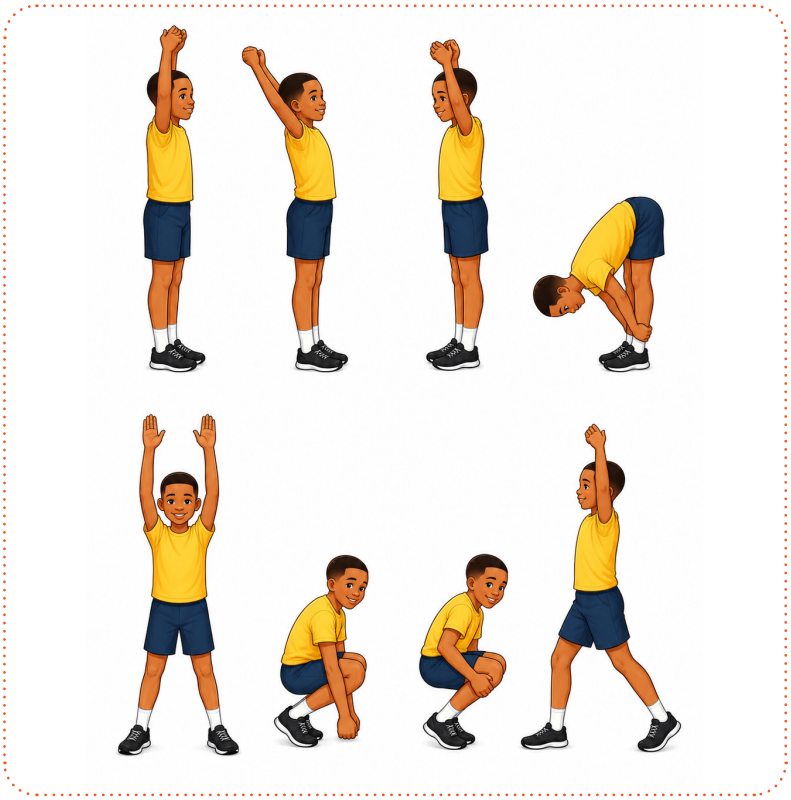

Fig.3.4: *Pupils showing Gymnastic body position*

Activity 3.2: Sequence of taking weight

The teacher requests pupils to create a sequence of Gymnastic movements that involve supporting or shifting their body weight using different parts of the body (e.g: hands, arms and feet).

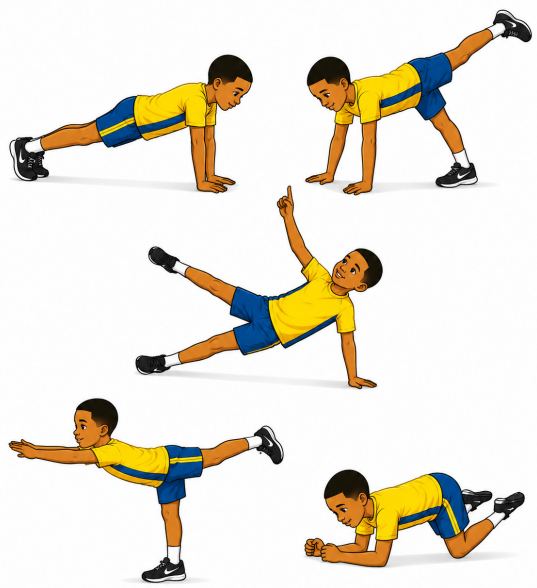

Fig.3.5: *Pupils showing sequence of taking weight*

Activity 3.3: Aesthetics basics

In pairs, pupils explore how to perform Gymnastic movements with grace, expression, and smooth transitions, focusing on the quality of movement rather than difficulty. The teacher guides and support them during the activity.

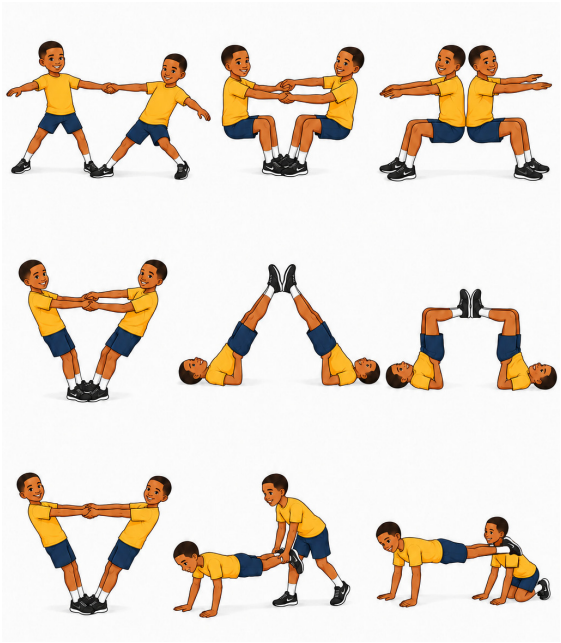

Fig.3.6: *Pupils practising aesthetics basics*

Cool-down exercises

The PES the teacher explains why cool-downs are important after sport. The teacher shows how to do the cool-down, then asks pupils to follow along. While they do it, the teacher gives praise like "Well done!" and sets a time limit for the cool-down.

After completing the gymnastics activities, the teacher selects one pupil to lead the cool-down. The teacher provides guidance and ensures all movements are performed safely and correctly. These exercises help the body relax, reduce muscle tension and prevent injury.

- *Foot balancing:* Stand on one foot, focusing on a spot to improve balance and calm the mind.
- *Touching toes:* Gently stretch by reaching toward your toes to loosen the back of the legs.
- *Slow walking:* Walk slowly with steady breathing to relax the body and reduce heart rate.

Summary and reflection

The PES the teacher reviews what pupils did in the lesson, asks how they feel and finds out what they enjoyed most. One or two pupils share their ideas. The teacher thanks everyone and ends the lesson.

Reflection questions

- **What skill did you practice most during the Gymnastics sequences?** Rolling and balancing were practised the most. Jumping and bending exercises were also used a lot.
- **What was difficult for you when performing or creating the movements?** It was hard to keep balance during some exercises. Some movements needed a lot of strength or flexibility.
- **Where can you use these Gymnastic skills in daily life or other sports?** To move safely and avoid injuries during play or sports. To improve strength, balance and coordination for other activities.

Keywords

The teacher reads them aloud, explains them and tells the pupils to repeat after him/her: ***rolls*** *(moving your body on the ground forward or backward in a controlled way),* ***balances*** *(holding my body steady in one position without falling),* ***jumping jacks*** *(a full-body exercise where you jump while spreading my legs and arms, then return to the starting position),* ***lunges*** *(stepping forward and bending my knees to lower my body while keeping balance),* ***gymnastic routine and aesthetics basics*** *(a sequence of movements done smoothly and beautifully, focusing on form, style and control).*

Lesson 2: Collective Gymnastic exercises

a. Learning objectives

By the end of this lesson, the pupil should be able to perform simple Gymnastics individually or in pairs.

b. Teaching and learning resources

Playground or soft mat area, gym carpet, whistle, portable Bluetooth speaker (for music, optional), cones or markers to organise safe spacing and radio.

c. Prerequisites (Knowledge and understanding, skills, attitude and values)

Pupils will better understand this lesson if they can follow the teacher's instructions, perform basic individual gymnastic movements such as forward roll, bridge and balance (as learned in primary five, unit three) and show basic control, trust and cooperation when working with a partner.

d. Introduction

Opening discussions

The teacher begins by checking if pupils are ready and then leads a discussion using questions about performing gymnastics individually or with a partner, the importance of trust and communication and which moves require balance or support. Following the discussion, one pupil leads a short warm-up and stretching exercises with the guidance from the teacher.

Warm-up and stretching exercises

The PES the teacher should explain why warming up and stretching are important before sports. The teacher shows how to do the warm-up and stretching, then explains it again. Pupils watch and try it slowly and carefully. The teacher checks if they understand, encourages them with kind words and sets a time limit for the warm-up and stretching.

Under the teacher's guidance, pupils do the following exercises:

Warm-up exercises

- Light jogging around the activity area.
- Skipping and gentle jumping.
- Arm and leg movements to prepare the body.
- Simple group movements following rhythm or teacher's instructions.

Stretching exercises

- Arm swings and shoulder rotations.
- Leg swings and gentle lunges.
- Body twists and gentle stretches.

e. Main activity

The PES the teacher asks pupils to listen carefully and gives clear instructions. The teacher or some pupils show how to do the activity. Then, the pupils start with a set time. The teacher moves around to help, gives praise to the pupils. If needed stop the game or exercise 1 minute and remind instructions to pupils and then continue the game or exercise.

Activity 3.4: Partner balance lean

Pupils stand facing forward, holding hands. They lean sidewards, keeping their arms straight and maintaining balance.

Competences to be developed: balance, coordination and trust.

Fig.3.7: *Pupils performing partner balance lean*

Activity 3.5: Partner seated squat hold

Pupils be in a squat position, supporting each other's weight and maintaining balance by holding their arms together as shown on the image below.

Competences to be developed: leg strength, teamwork and posture control.

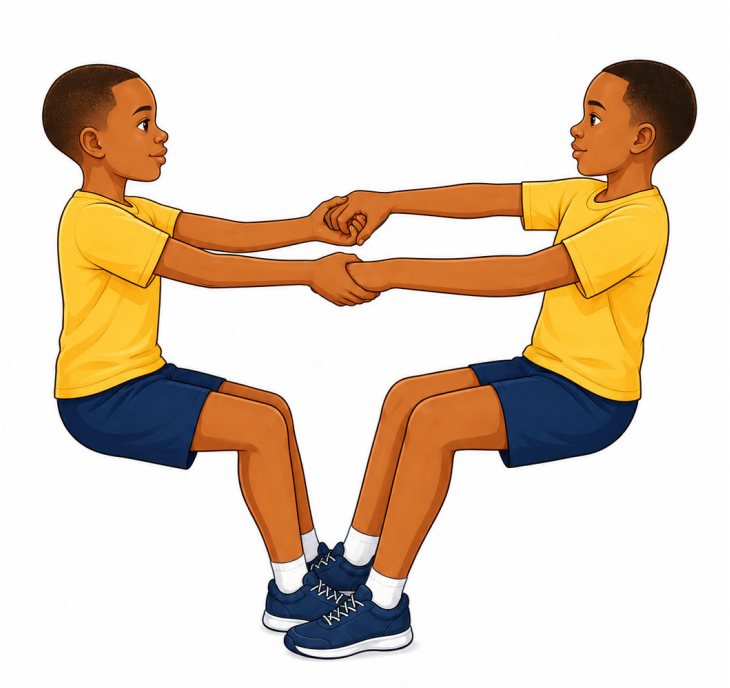

Fig.3.8: *Pupils performing partner seated squat hold*

Activity 3.6: Partner back-to-back sit

Pupils sit back-to-back, extend their arms and try to stand up together without using their hands.

Competences to be developed: synchronisation, leg power and communication.

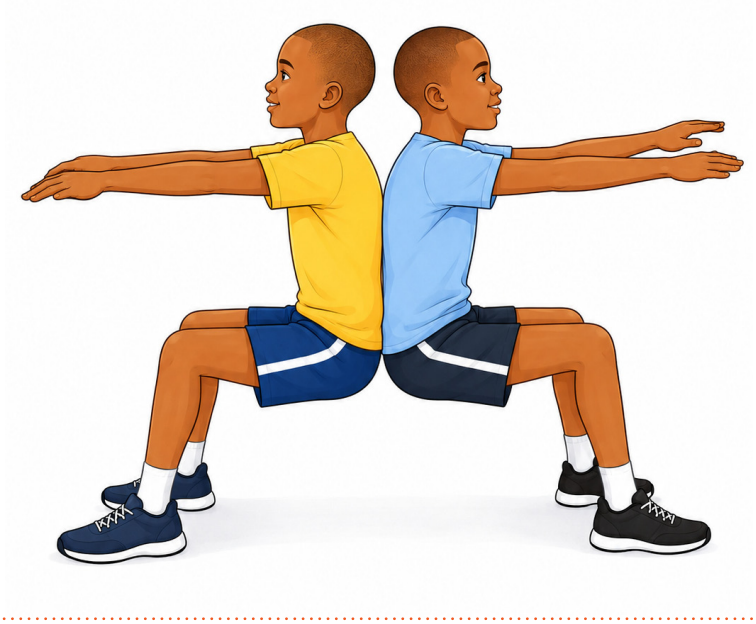

Fig.3.9: *Pupils performing partner back-to-back sit exercise*

Activity 3.7: Partner toe-to-toe pull

Pupils stand on the ground, feet touching, holding each other's hands. They pull against each other and try to lift their upper body while maintaining contact.

Competences to be developed: core strength, balance and flexibility.

Fig.3.10: *Pupils performing partner-to-toe pull exercise*

Activity 3.8: Partner leg raise pyramid

Pupils lie on their backs, feet touching in the air to form a triangle shape.

Competences to be developed: core control, leg strength and spatial awareness.

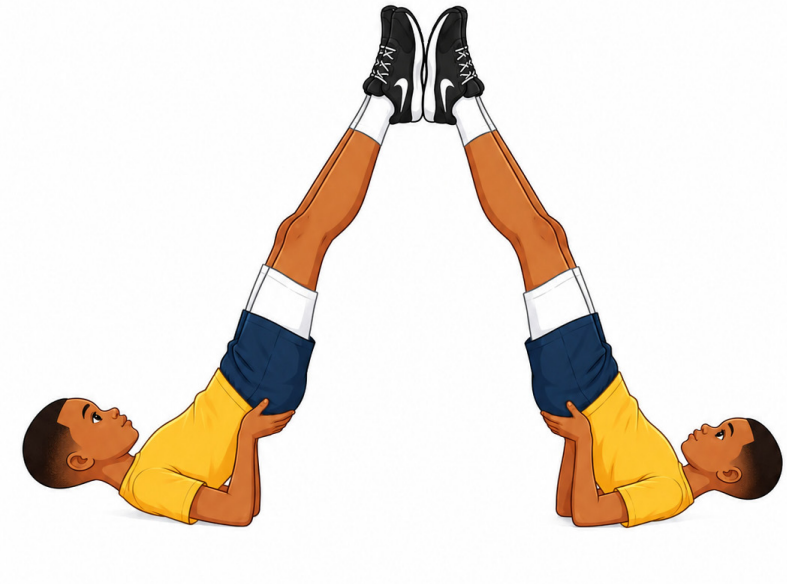

Fig.3.11: *Pupils performing partner leg raised pyramid*

Activity 3.9: Partner bridge pose

Pupils lie back-to-back and raise their hips into a bridge position at the same time.

Competences to be developed: back and glute strength, timing and stability.

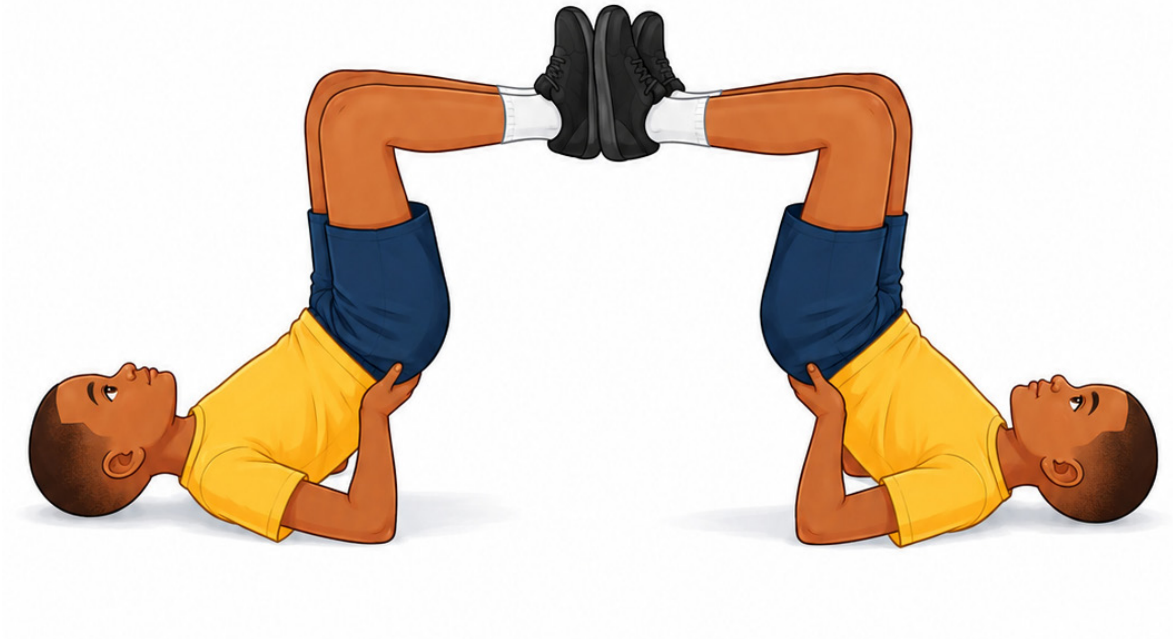

Fig.3.12: *Pupils performing partner bridge pose exercise*

Activity 3.10: Partner triangle balance

Pupils face sideways in a wide-legged stance and lean forward while holding hands, forming a triangle shape.

Competences to be developed: balance, coordination and flexibility.

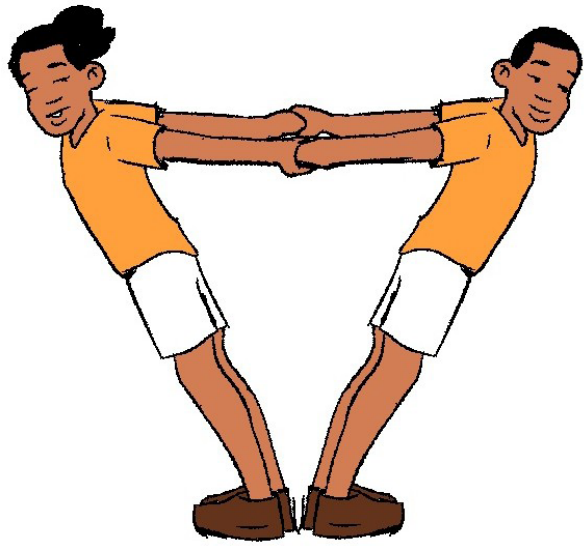

Fig.3.13: *Pupils performing partner triangle balance exercise*

Activity 3.11: Partner plank hand tap

Pupils hold a front plank facing each other and take turns tapping each other's hands while maintaining form.

Competences to be developed: core strength, coordination and upper body endurance.

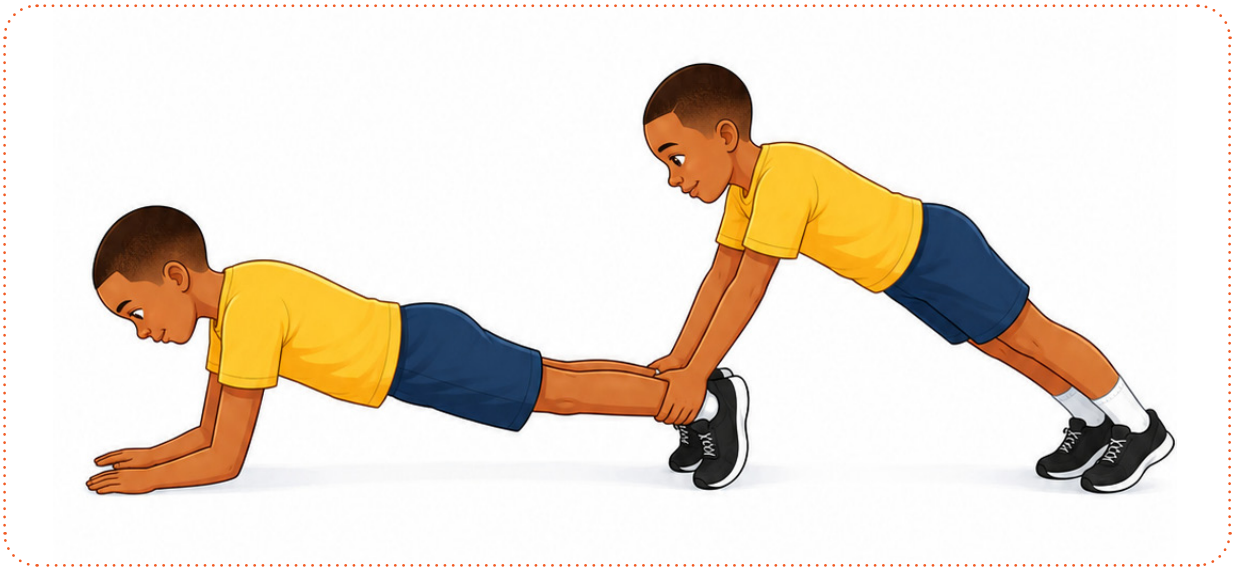

Fig.3.14: *Pupils performing partner plank hand tap exercise*

Activity 3.12: Partner crawl, push pose

One pupil holds a plank position while the other crawls underneath or performs a movement that challenges timing and coordination.

Competences to be developed: teamwork, control and strength.

Fig.3.15: *Pupils performing partner crawl push pose exercise*

Cool-down exercises

The PES the teacher explains why cool-downs are important after sport. The teacher shows how to do the cool-down, then asks pupils to follow along. While they do it, the teacher gives praise like "Well done!" and sets a time limit for the cool-down.

Under the teacher's guidance, pupils do the following exercises:

- Slow walking and deep breathing.
- Gentle stretching of arms, legs and back.
- Relaxing the body after collective Gymnastic activities.

Summary and reflection

The PES the teacher reviews what pupils did in the lesson, asks how they feel and finds out what they enjoyed most. One or two pupils share their ideas. The teacher thanks everyone and ends the lesson.

Reflection questions

- **What was the most fun or difficult part of working with your partner in Gymnastics today?** The most fun part was helping each other do rolls and balances. The difficult part was keeping balance together during some exercises.
- **How did you and your partner help each other to do the exercises better?** We supported each other when trying hard movements. We gave tips and encouraged each other to improve.
- **How can teamwork and balance help you in sports or other group activities?** They help everyone work together to achieve goals. They make activities safer and more successful.

Keywords

The teacher reads them aloud, explains them and tells the pupils to repeat after him/her: ***balance*** *(keeping your body steady without falling),* ***lean*** *(tilting your body forward, backward or sideways),* ***grace*** *(moving smoothly and beautifully),* ***back-to-back sit*** *(sitting with a partner back-to-back for support and balance),* ***flexibility*** *(the ability to stretch your body easily),* ***stability*** *(staying steady and controlled in one position),* ***pose exercises*** *(holding a position to practise strength, balance and form).*

Warm-up and stretching exercises

Under the teacher's guidance, pupils do the following exercises:

Warm-up exercises

- Light jogging around the activity area.
- Skipping and gentle jumping.
- Simple balance movements and body control exercises.
- Arm and leg movements to prepare for Gymnastics.

Stretching exercises

- Arm swings and shoulder rotations.
- Leg swings and gentle lunges.
- Back stretches and body twists.
- Flexibility movements for safe rolling and poses.

Talent Watch

During this unit, the teacher should help pupils discover their sports talents by watching how they perform, encouraging them, helping them join school teams or clubs and guiding them to improve.

3.7. End of unit practical assessment

The PES teacher observes the pupils during the activity or game and gives positive feedback like “Good job!”, “Well done!”, or “That’s great!”. She/he helps pupils who are struggling or need support. She/he should remind pupils to be careful, slow down, or try harder if needed and praises the whole group for their effort and participation..

Activity 3.13

* ***Individual performance***

The pupils perform a short individual Gymnastics sequence including:

- One rolling movement (e.g: forward roll and backwards roll).
- One balance or flexibility pose.
- One controlled transition or stretch.

* ***Partner or group performance***

The pupils work in pairs or small groups to:

- Choose 2 to 3 collective gymnastics exercises (from those practised in the lesson).
- Create a smooth sequence that demonstrates coordination, cooperation and safety.
- Present their routine to the class.

Observation checklist to lead the teacher: As pupils perform, the teacher observes and assesses:

- Body control and balance.
- Proper technique and form.
- Respect for safety rules.
- Cooperation and teamwork (in group tasks).

Evaluation criteria:

- Correct execution of movements.
- Safe body posture and transitions.
- Active and respectful group participation.
- Ability to reflect on their learning.

Cool-down exercises

Under the teacher's guidance, pupils do the following exercises:

- Slow walking and deep breathing.
- Gentle stretching of arms, legs and back.
- Relaxing the body after Gymnastics performance.

Sample of an assessment checklist

Criteria	Yes	No	Comments
Understands and follows gymnastics instructions and safety rules.			
Performs rolling movements correctly and safely.			
Maintains body control and balance during poses and movements.			
Uses correct techniques and body posture during exercises.			
Performs smooth transitions between movements.			
Creates and presents a coordinated sequence with others.			
Cooperates and communicates well with group members.			
Shows confidence and active participation during performance.			
Reflects on learning and identifies areas for improvement.			

Sample of an assessment rubric

Criteria	Excellent	Good	Satisfactory	Needs improvement
Execution of movements	Performs rolls, balances and transitions correctly with excellent control and technique.	Performs movements correctly with minor mistakes.	Performs basic movements but needs some correction.	Has difficulty performing movements correctly.

Body control and balance	Maintains strong body control, balance and stable postures throughout the sequence.	Maintains balance with few mistakes.	Sometimes loses balance or control.	Frequently loses balance and body control.
Safety and posture	Always uses safe body positions and transitions.	Usually follows safety rules with few reminders.	Sometimes needs reminders about safety and posture.	Does not consistently follow safety rules.
Cooperation and teamwork	Works very well with others, supports teammates and performs a coordinated group routine.	Cooperates well and contributes to the group.	Participates with some support from others.	Has difficulty cooperating or participating in group work.
Performance and reflection	Presents confidently and explains learning clearly.	Presents well and identifies some learning points.	Presents with limited confidence and reflection.	Needs support to present and reflect on learning.

3.8. Additional activities

3.8.1. Remedial activities

Pupil could do the following activities:

Activity 3.14: Balancing

- Walk along a low line (tape or chalk on the floor).
- Hold a static balance (e.g: flamingo stance) for 5 seconds with support.
- Use balance beams at floor level for safety.

Activity 3.15: Rolling

- Practice rolling forward and backwards on a mat.
- Assisted with log roll or egg roll (sideways and forward rolls with help).
- Focus on the tuck position before attempting a full roll.

Activity 3.16: Jumping

- Jumping with both feet over small obstacles (e.g: foam blocks).
- Two-foot take-off and landing on a soft mat.
- Practice the 'bend, swing, jump and land' sequence with cues.

Activity 3.17: Body shapes

- Practice making basic shapes: tuck, star, straight and pike on the floor.
- Use mirror or peer feedback to correct positions.
- Hold each shape for 3 to 5 seconds.

3.8.2. Consolidation activities

Pupil should do the following activities:

Activity 3.18: Balancing

- Walk across a low beam with arms out for balance.
- Perform a balance sequence (e.g: front balance → side balance → arabesque).
- Try holding balances for 10 seconds.

Activity 3.19: Rolling

- Perform forward rolls independently on a mat.
- Add basic transitions (roll → stand → balance).
- Sequence: roll → shape → jump.

Activity 3.20: Jumping

- Perform straight jumps, star jumps and tuck jumps from a raised surface (e.g., low box).
- Focus on soft landing and correct body posture.
- Combine jump + roll or jump + balance.

3.8.3. Extension activities

Activity 3.21: Balancing

The teacher asks pupils to do the following:

- Balance on one foot on an unstable surface (e.g: foam mat, balance disc).
- Combine balance with movement (e.g: balance → step → turn → balance).
- Create a balance sequence with levels and directions.

Activity 3.22: Rolling

The teacher asks pupils to do the following:

- Perform a forward roll to a standing jump.
- Learn backwards rolls with proper hand placement.
- Combine different rolls: forward → log → backwards (with safety mats).

Activity 3.23: Jumping

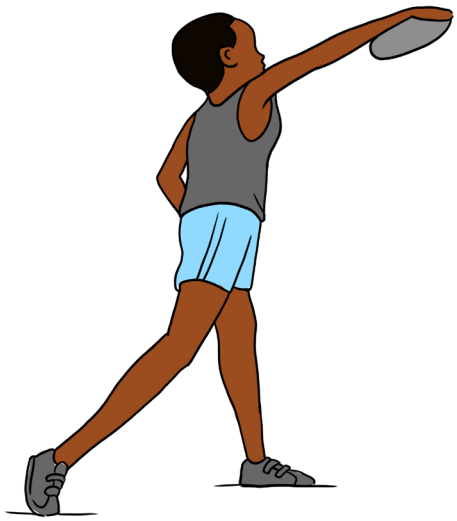
The teacher asks pupils to do the following:

- Jump with a half-turn or full-turn.
- Perform split leaps or straddle jumps (on the floor or trampoline).
- Jump onto, over and off apparatus (e.g: springboard, vault).

Activity 3.24: Body shapes

The teacher asks pupils to do the following:

- Explore inverted shapes (e.g: shoulder stand, headstand with support).
- Choreograph a mini routine using body shapes, transitions and music.
- Add arm positions and facial expressions for performance focus.



UNIT 4

ATHLETICS EXERCISES

Key Unit Competence

Jump, run and throw objects/implement from different positions.

At the end of this unit, the pupil should be able to:
Knowledge and understanding
• Explain basic principles such as speed, force and coordination.
Skills
• Show progress in power, rhythm and timing during activities. • Demonstrate proper techniques of running, jumping and throwing.
Attitudes and values
• Follow instructions carefully. • Display sportsmanship during activities. • Demonstrate cooperation and respect towards others.

4.1. Prerequisite (Knowledge and understanding, skills, attitude and values)

The pupils are likely to perform better in this unit if they have previously practised sprinting, distance running with obstacles, triple jump basics and short-distance object throwing in primary five, unit four, as these skills provide a foundation for refining running, jumping and throwing techniques in primary six.

4.2. Guidance on introductory activity

Before the first lesson, the teacher introduces the athletics unit with a brief, hands-on warm-up activity called the Athletics station warm-up. Acting as a facilitator, the teacher sets up three stations:

- *Running station:* jog for 1 minute.
- *Jumping station:* do 10 jumps over a rope or cone.
- *Throwing station:* throw a light object as far as possible.

Pupils rotate through each station in small groups. Afterwards, the teacher facilitates a discussion with reflective questions such as:

- **Which station did you enjoy the most and why?** I enjoyed the jumping station because it was fun to jump high and far. I liked the throwing station because I could see how far I could throw.
- **Why do we need to improve how we run, jump and throw?** To become stronger, faster, and better at sports. To use these skills safely in games and daily activities.

This activity encourages pupils to think about the skills they will develop during the unit. Immediately, the teacher starts the main activity for lesson one.

4.3.Generic Competencies

- **Critical thinking and problem-solving:** Analyse and adjust running, jumping and throwing techniques to improve performance, accuracy, speed and safety during Athletics activities.
- **Cooperation, interpersonal management, and life skills:** Work with others during Athletics activities, respect rules, demonstrate teamwork, discipline, leadership and fair play.
- **Lifelong learning:** Develop the habit of regular participation in Athletics activities and appreciate their importance for improving physical fitness, health and overall well-being.

4.4. Basic Values

- **Hard work:** Applying effort and regular practice to improve running speed, jumping ability, throwing techniques and overall Athletic performance.
- **Self-reliance:** Taking responsibility for personal improvement by practising Athletics skills independently, developing confidence and applying correct techniques.
- **Dignity and integrity:** Respecting athletics rules, using equipment responsibly, accepting results fairly and demonstrating honesty and good behaviour during activities.

4.5. Cross Cutting Issues

- **Gender equality:** Developed through encouraging equal participation of boys and girls in running, jumping and throwing activities with equal opportunities to improve Athletic skills.

- **Peace and values education:** Developed through promoting discipline, cooperation, respect for rules, fair play, confidence and responsibility during Athletics activities.
- **Inclusive education:** Developed through adapting Athletics activities to support pupils with different abilities and ensuring safe, active and equal participation for all pupils.

4.6. List of lessons and learning objectives

#	Lesson title	Learning objectives	Number of periods
1	Sprint running exercises with sprint (100 m- 400 m).	To perform running sprints with proper technique.	2
2	Running exercises with jumping obstacles: 1500m–3000m.	To perform resistance running exercises with proper technique.	2
3	Triple jump exercises.	To perform triple jumping exercises with proper technique.	2
4	Throwing objects for a short distance by using throwing implements (objects).	To perform short-distance throws with proper technique and tools.	2
5	End of unit practical assessment.	To assess pupils' ability of performing exercises using techniques of jumping, running and throwing objects in different positions.	2

Lesson 1: Sprint running exercises (100m–400m)

a. Learning objectives

By the end of this lesson, the pupil should be able to perform individually or in groups sprints by using proper technique with maximum speed.

b. Teaching and learning resources

Sport facilities or running track, cones, whistle, stopwatch, ground markers, starting blocks and starter.

c. Prerequisites (Knowledge and understanding, skills, attitude and values)

Pupils will better understand this lesson if they have previously practised basic sprinting and body posture control during acceleration and speed phases in primary five, unit four (Athletics).

d. Introduction

The teacher should continue with the main part of the lesson, hence opening discussion, warm-up and stretching exercises have been done in the introductory activity.

e. Main activity

The PES the teacher asks pupils to listen carefully and gives clear instructions. The teacher or some pupils show how to do the activity. Then, the pupils start with a set time. The teacher moves around to help, gives praise to the pupils. If needed stop the game or exercise 1 minute and remind instructions to pupils and then continue the game or exercise.

The teacher introduces pupils to preparatory sprint exercises and techniques designed to improve speed and running form. Then, pupils practice sprinting individually while the teacher provides guidance and corrective feedback where necessary. Then she/he tells pupils that they are going to focus on sprint running (short-distance running performed at maximum effort between 100 m– 400 m).

The teacher explains sprint techniques and demonstrates how to perform them:

- Proper sprint starts.
- Arm movement and knee lift.
- Long and fast steps.
- How to accelerate and keep top speed.
- Staying relaxed, especially in the upper body.

Activity 4.1: Speed practice

The pupils try the following running:

- **Basic running skills:** jogging, posture and simple exercises.
- **Acceleration practice:** short 20–30m sprints at low effort.
- **Controlled short sprints:** 50m runs at faster speed.
- **Speed endurance:** 80–100m sprints with strong finish.
- **Longer intervals:** 150–200m runs for rhythm and breathing.
- **Full distance practice:** 100m at top speed, 400m with pacing.

The teacher support pupils in the following ways:

- Watch and correct the form.
- Give feedback.
- Motivate and ensure safety.

Fig.4.1: *The pupil performing speed up exercise*

Activity 4.2: Cone sprint exercise

The teacher does the following:

- Place 3 cones in a line, 10 meters apart.
- Sprint from cone 1 to cone 2, then run backward to cone 1.
- Sprint to cone 3, then backpedal to cone 1.
- Keep a low posture, change directions quickly and backpedal safely.

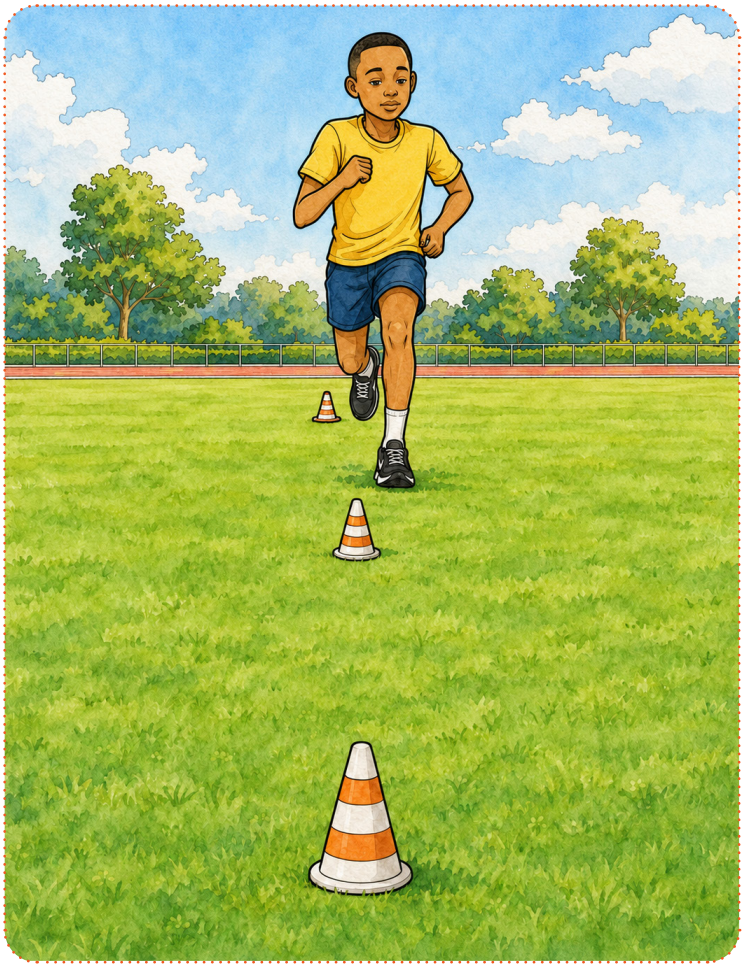


Fig.4.2: *The pupil doing sprinting using cones exercise*

Activity 4.3: Sprint start commands

- The teacher request pupils to do the following:
  - Practise sprint starts with proper signals: “On your marks,” “Set” and “Go.”
  - Focus on smooth acceleration, upright posture and controlled arm movement.
  - Include short sprints, reaction exercise and start position practice.
- The teachers should guide form, correct technique and ensure safety throughout.

Starting position:

The teacher helps pupils to do practise on the starting blocks (If available) or use ground to teach pupils how to start the race.

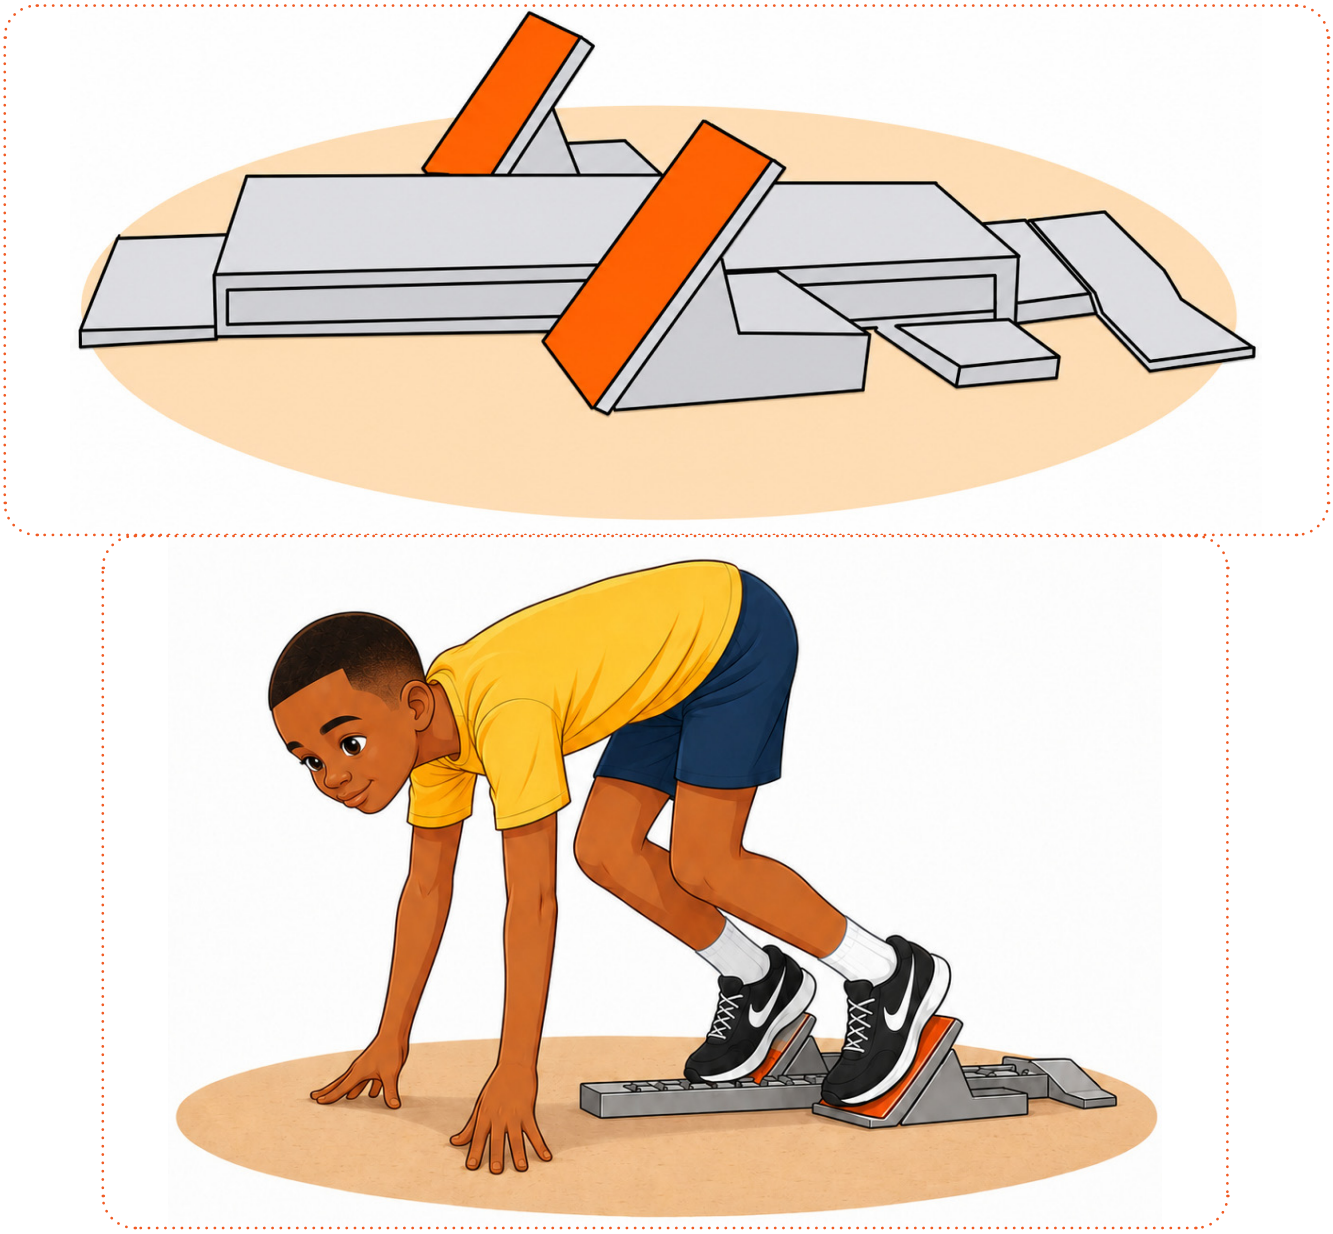

Fig.4.3: *Pupil using starting block in sprint races*

Fig.4.4: *Pupil showing position on starting line*

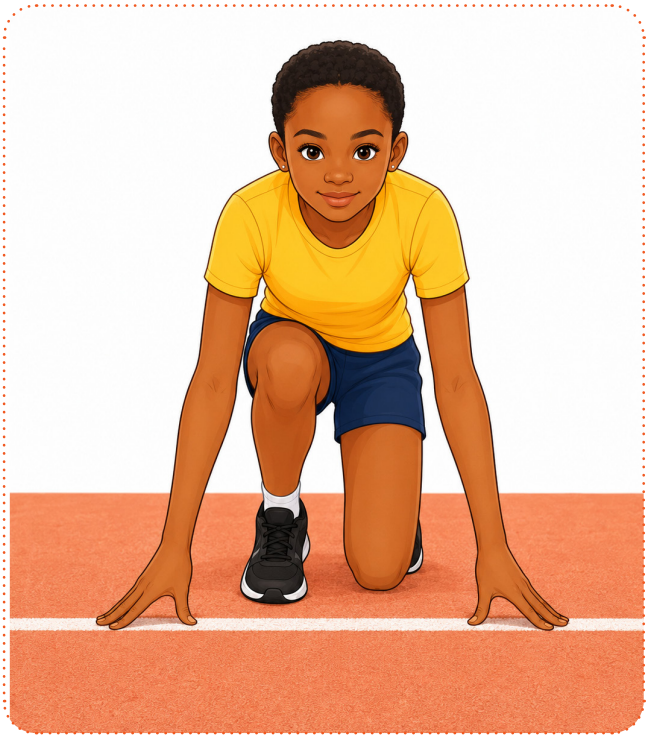

Fig.4.5: *Pupil showing on your marks position*

Teaching the "set" position

For this step, the teacher facilitates pupils in the following ways, tells pupils to:

- Lift their hips above their shoulders, press their feet down, lean forward slightly and stay balanced.
- Keep arms straight, fingers wide, hold breath and focus ahead.
- Check alignment, posture and foot placement of pupils.
- Ensure calmness and reduce stress while waiting for the signal to start.
- Start running when the signal 'Go' is announced.

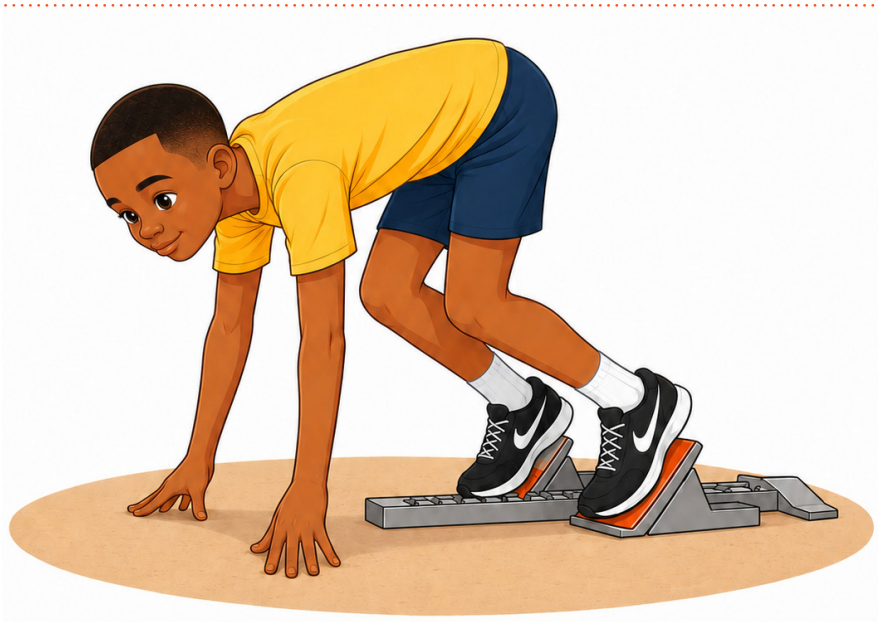

Fig.4.6: *Pupil showing set position*

Activity 4.4 : Body lean for running posture

The teachers tell pupils to do the folllowing:

- Lean forward from your ankles, keep their head in line and don't bend at the waist.
- Stand up slowly as they go faster.
- Show the right way, give simple tips, watch and help fix mistakes.

Fig.4.7: *Pupil showing running behaviour during sprint*

Activity 4.5: Eye position (Where to look when sprinting)

The teachers ask pupils to do the following:

- Keep their head still and eyes straight ahead. Do not look down or up.
- Relax your face and jaw.
- Focus on something ahead, especially near the finish.
- Eyes forward, chin down.

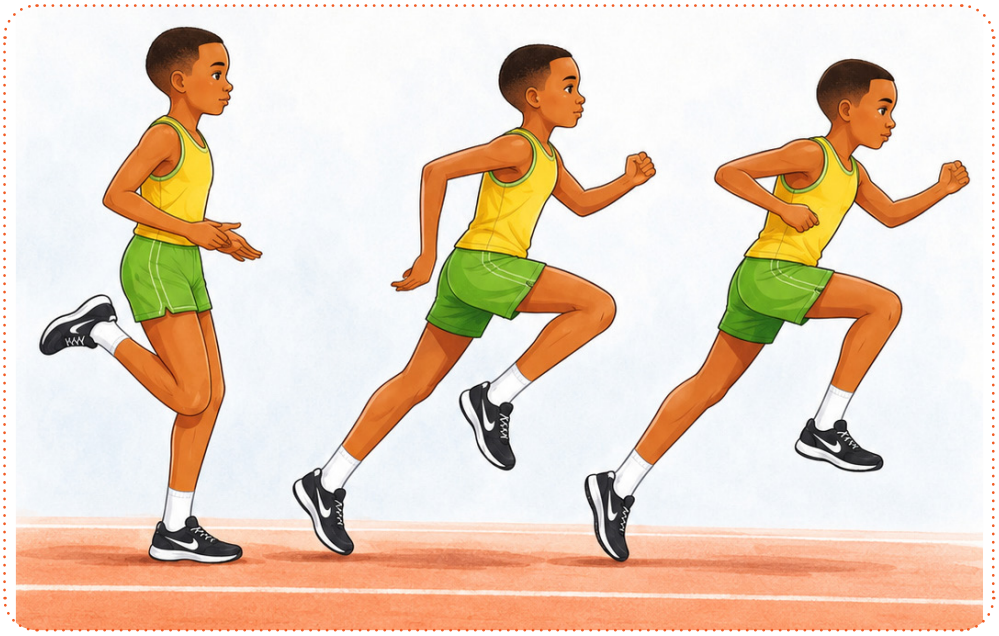

Fig.4.8: *Pupils showing how to use the elbow in running*

Activity 4.6: Elbow position (How to use arms when sprinting)

The teachers ask pupils to do the following:

- Keep elbows bent at 90° and swing arms forward and back, not side to side.
- The front arm goes to chin level and the back arm goes behind their hip.
- Keep their hands relaxed and imagine brushing their pockets with your thumbs.
- The teacher shows the right way and helps fix mistakes with simple cues.

Cool-down exercises

The PES the teacher explains why cool-downs are important after sport. The teacher shows how to do the cool-down, then asks pupils to follow along. While they do it, the teacher gives praise like "Well done!" and sets a time limit for the cool-down.

Under the teacher's guidance, pupils do the following exercises:

- Slow walking and deep breathing.
- Gentle stretching of legs, arms and back.
- Relaxing the body after the sprinting activity.

Summary and reflection

The PES the teacher reviews what pupils did in the lesson, asks how they feel and finds out what they enjoyed most. One or two pupils share their ideas. The teacher thanks everyone and ends the lesson.

Reflection questions

- **What was the most fun or difficult part of working with your partner in Athletics today?** The most fun part was trying balances and poses together. The difficult part was keeping steady during some exercises.
- **How did you and your partner help each other to do the exercises better?** We supported each other during hard movements. We encouraged and guided each other to improve.
- **How can teamwork and balance help you in sports or other group activities?** They help everyone work together to succeed. They make movements safer and more effective.

Keywords

The teacher reads them aloud, explains them and tells the pupils to repeat after him/her: ***sprint*** *(running very fast for a short distance),* ***on your marks–set–go*** *(commands used to start a race),* ***starting block or starting line*** *(the place where runners begin a race).*

Lesson 2: Running exercises with jumping obstacles: 1500m–3000m

a. Learning objective

By the end of this lesson, the pupil should be able to perform individually resistance running exercises with proper technique.

b. Teaching and learning resources

Sport tactilities or running track, cones, low hurdles or improvised safe obstacles (e.g: soft barriers), whistles, stopwatch, water bottles and starter.

c. Prerequisites (Knowledge and understanding, skills, attitude and values)

The pupils will better understand this lesson if they can perform basic endurance running (over 800m) while maintaining good posture and breathing rhythm and show basic coordination and strength to jump over low obstacles safely.

d. Introduction

Opening discussions

The PES the teacher brings all pupils together and asks if they like playing games or doing physical exercises. Pupils give examples of games they play or physical exercises they do. The teacher explains that in this lesson, they will all play safely, share fairly and learn that games are good for both boys and girls.

The teacher checks pupils' readiness and introduces the session's objectives in simple terms.

- **What do you think makes running 1500m or 3000m harder than sprinting?** Because it is much longer, it needs more endurance, breathing control and steady pace, not just speed.
- **Why do you think it is important to save energy when running for a longer time?** To avoid getting tired too quickly and to be able to finish strong.
- **How does jumping over obstacles while running affect your speed?** It makes you slower and more tired because you use extra energy and must adjust your steps.

The teacher explains that this type of running combines distance running with jumping over obstacles, similar in steeplechase, where athletes run long distances and jump over small fences and water.

Warm-up and stretching exercises

The PES the teacher should explain why warming up and stretching are important before sports. The teacher shows how to do the warm-up and stretching, then explains it again. Pupils watch and try it slowly and carefully. The teacher checks if they understand, encourages them with kind words, and sets a time limit for the warm-up and stretching.

Light jogging around the track (400m–600m).

- Gradually increase the pace for progressive activation.

After jogging, the pupils form a semi-circle for stretching. One pupil leads the stretches, focusing on muscles that are going to be used in running and jumping. Particular attention is given to stretching the hamstrings to prevent injury. Other key areas include the quads, calves, hips, shoulders, arms and lower back. The teacher helps make sure everyone stretches safely.

e. Main activity

The PES the teacher asks pupils to listen carefully and gives clear instructions. The teacher or some pupils show how to do the activity. Then, the pupils start with a set time. The teacher moves around to help, gives praise to the pupils. If needed stop the game or exercise 1 minute and remind instructions to pupils and then continue the game or exercise.

The teacher introduces middle-distance running with obstacles through practical exercises. Pupils progressively face higher and more challenging barriers.

Types of obstacles to be used

- The teacher sets up safe obstacles like cones, ropes and benches to help pupils practise running and jumping.
- The pupils start slowly with walking or jogging, then progress to running and jumping as they gain confidence.

Activity 4.7: Demonstration and safety check

- Before starting, the teacher or a capable pupil demonstrates proper jumping technique.
- The pupils should run at a steady pace, jump with one leg and land softly with bent knees.
- Ensure that the area is safe and clear for the activity.

Activity 4.8: Practise rounds (Running with obstacles)

- Pupils start with short runs (100–200m) and jump over low obstacles, gradually increasing distance and number of obstacles.
- The teacher observes and gives feedback on approach, jump and recovery.
- Obstacles are adjusted based on pupil ability for safety and success.
- The teachers also guide timing, breathing and leg movement while monitoring fatigue.

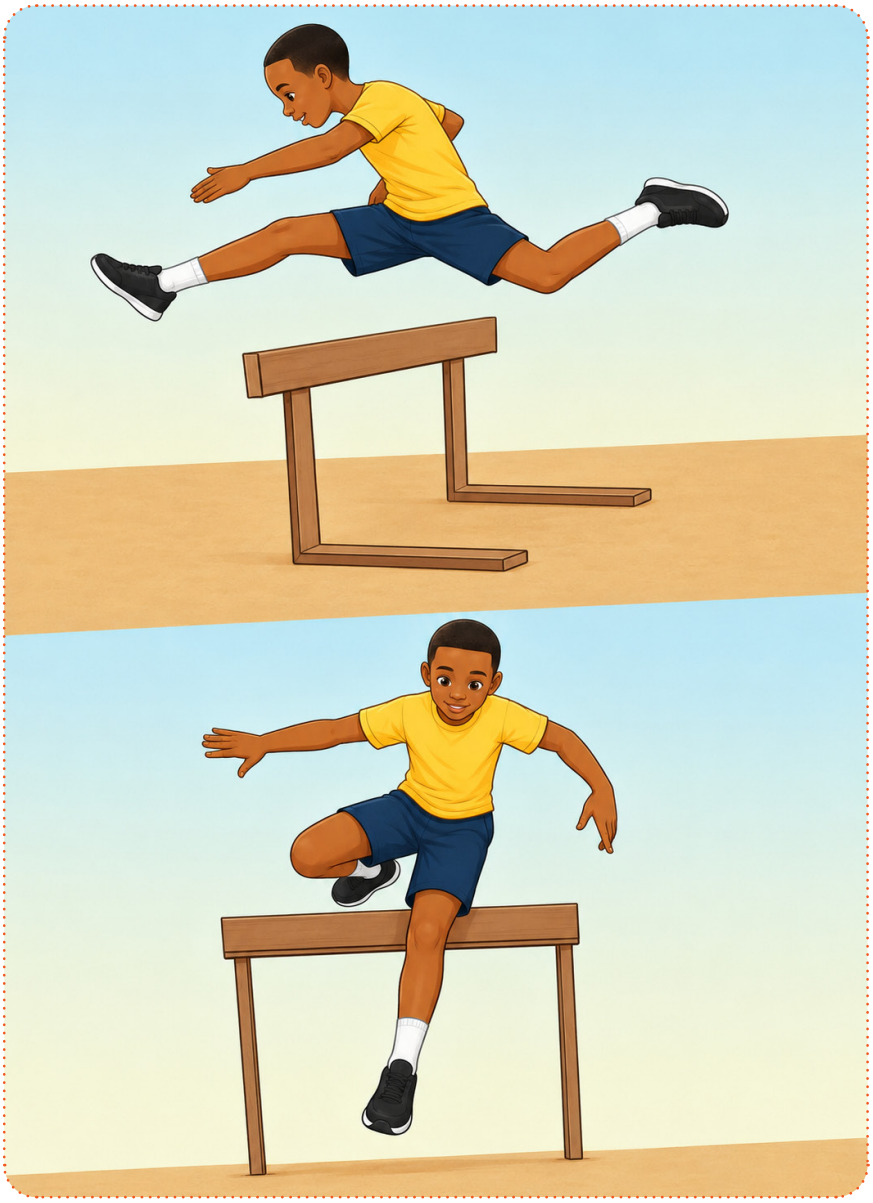

Fig.4.9: *Pupils performing running with jumping obstacles*

Activity 4.9: Obstacle jumping in long-distance running

The teacher explains to the pupils that during long runs with obstacles, they should focus on maintaining rhythm, not just speed.

Request them to:

- Keep a running pace and jump with their strong leg before the obstacle.
- Swing one leg first, then the other and land gently.
- Use soft, low items like cones or foam bars for safety.
- Practise on a 200–400m track with 3 to 5 jumps to build timing and rhythm.

Fig.4.10: *Pupils running over an obstacle*

Activity 4.10: Running rhythm and obstacle timing

The teacher should explain to the pupils that in real races, hurdles are spaced the same, but ours will be 100–200m apart.

Request them to do the following:

- Look ahead to see where the next obstacle is.
- Change their steps and breathing before and after each jump.
- Keep running without stopping after they jump.
- The teacher should set up the course and help they run it smoothly.

Fig.4.11: *Pupils running over huddles*

Cool-down exercises

The PES the teacher explains why cool-downs are important after sport. The teacher shows how to do the cool-down, then asks pupils to follow along. While they do it, the teacher gives praise like "Well done!" and sets a time limit for the cool-down.

Under the teacher's guidance, pupils do the following exercises:

- Slow walking and deep breathing.
- Gentle stretching of legs, arms and back.
- Relaxing the body after the running activity.

Summary and reflection

The PES the teacher reviews what pupils did in the lesson, asks how they feel and finds out what they enjoyed most. One or two pupils share their ideas. The teacher thanks everyone and ends the lesson.

Reflection questions

- **What was the hardest part about running long distances with obstacles?** The hardest part was keeping a steady pace while going over obstacles. It was difficult to stay strong and not get tired before finishing.

Keywords

The teacher reads them aloud, explains them and tells the pupils to repeat after him/her: ***jumping obstacles*** *(running while clearing objects (e.g., benches, small barriers or hurdles) placed on the track),* ***resistance running*** *(running against something that makes it harder, like carrying a weight, using a parachute or running against the wind),* ***race*** *(a competition to run faster than others over a set distance),* ***hurdles*** *(a type of race where athletes must run and jump over barriers placed at equal distances on the track).*

Lesson 3: Triple jump exercises

a. Learning objective

By the end of this lesson, the pupil should be able to perform individually triple jumping exercises with proper technique.

b. Teaching and learning resources

Track and field jumping area, jumping equipment, measuring tape, whistle, landing pit and mat.

c. Prerequisites (Knowledge and understanding, skills, attitude and values)

Pupils will better understand this lesson if they can perform basic jumping exercises (e.g: forward squat jump, jumping over obstacles) and execute long jump techniques by maintaining balance and coordination during flight and landing.

d. Introduction

Opening discussions (in semi-circle formation)

The PES the teacher brings all pupils together and asks if they like playing games or doing physical exercises. Pupils give examples of games they play or physical exercises they do. The teacher explains that in this lesson, they will all play safely, share fairly and learn that games are good for both boys and girls.

After checking readiness, the teacher discusses with pupils the safety measures of jumping to avoid accidents and injuries during take-off or landing.

Warm-up and stretching exercises

The PES the teacher should explain why warming up and stretching are important before sports. The teacher shows how to do the warm-up and stretching, then explains it again. Pupils watch and try it slowly and carefully. The teacher checks if they understand, encourages them with kind words and sets a time limit for the warm-up and stretching.

Same as in the previous lesson, pupils do the following:

- Light jogging followed by progressive acceleration.
- Dynamic movement to prepare joints and muscles for jumping.

Refer to unit one, lesson one in P6, let pupils stretch their muscles properly to reduce risk of injury like Slow walking ,deep breathing,gentle stretching of legs, arms and back. The teacher leads warm-up and stretching session or a selected pupil can lead.

e. Main activity

The PES the teacher asks pupils to listen carefully and gives clear instructions. The teacher or some pupils show how to do the activity. Then, the pupils start with a set time. The teacher moves around to help, gives praise to the pupils. If needed stop the game exercise 1 minute and remind instructions to pupils and then continue the game exercise.

The teacher should explain to the pupils that the triple jump involves three phases: the hop, the step and the jump. During the hop, the athlete takes off on one foot and lands on the same foot. In the step phase, they step onto the other foot and land on it. Finally, in the jump phase, the athlete jumps into the sandpit, landing with both feet. Remind them that the distance is measured from the take-off line to the nearest body mark in the sand.

Activity 4.11: Demonstration

- The teacher or a skilled pupil demonstrates each phase slowly.
- Emphasize control, rhythm and landing stability.
- Use markers or cones to show the transitions between phases.

Activity 4.12: Practice time

The teacher should request pupils to practise individually the following:

- First, break down the phases one at a time, then combine all phases into one flowing movement.
- The teacher provides guidance and corrections as needed.

Step-by-step breakdown of the triple jump:

Explains to the pupils that the triple jump is performed in one smooth, continuous motion: **hop →step → jump**.

Step 1: Run-up and hop phase

- Pupils take a 17–18 strides running start to build momentum.
- Take off from the dominant foot on the take-off board (this begins the hop).
- Pull the opposite foot behind the body while airborne.

Pupils should be reminded not to overstep the take-off board, as this results in a foul.

Step 2: Arm action during hop

The teacher explains to the pupils that they have to extend both arms forward, between their chests and chin. They should move their arms as if trying to grab something, but not too high or too low. Keep the arms in front, not behind, to stay balanced and keep moving smoothly.

Step 3: Landing the hop

- Tell pupils to land on the same (dominant) foot with the foot flat, not on the heel or toes.
- Remind them that after contact, they have to roll onto the balls of the foot to prepare for the step phase.

Step 4: Step phase

The teacher asks pupils to do the following:

- Start the step with the same (dominant) foot.

- Extend the back leg behind the body while keeping the heel up.
- Land with the back leg forward to transition into the final jump.
- Keep the knee high and parallel to the hips for proper form.
- The goal is to lift off quickly, maintaining a light and fast contact with the ground.

Step 5: Jump phase

The teacher asks pupils to take off using the opposite foot from the hop and step. As the pupil leaps toward the pit request them to:

- Bring both knees upward, parallel to the chest.
- Land on the heels with feet together.

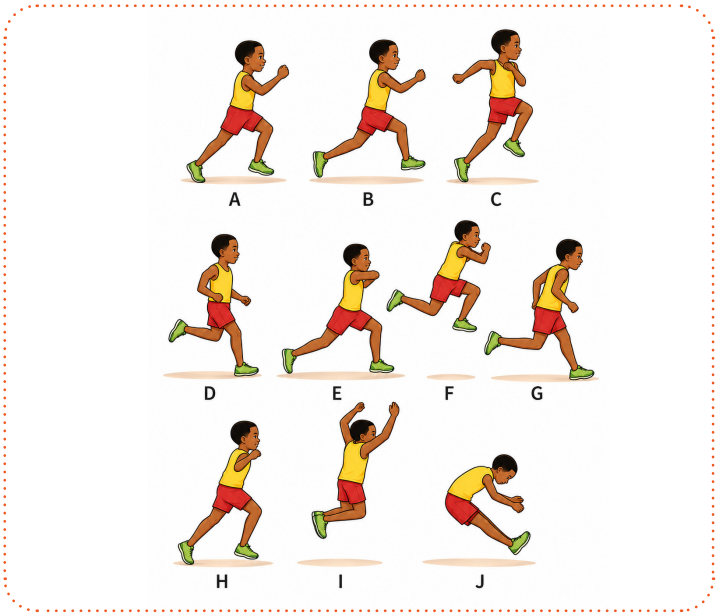

Fig.4.12: *Pupils showing steps of performing a triple jump*

Application activity 4.1

The teacher lets pupils perform multiple trials, practising each phase separately first, then putting it all together into one continuous jump. Provide verbal commands and corrections based on body posture, arm movement and take-off or landing technique.

Cool-down exercises

The PES the teacher explains why cool-downs are important after sport. The teacher shows how to do the cool-down, then asks pupils to follow along. While they do it, the teacher gives praise like "Well done!" and sets a time limit for the cool-down.

Under the teacher's guidance, pupils do the following exercises:

- Slow walking and deep breathing.
- Gentle stretching of legs, arms and back.
- Relaxing the body after the triple jump activity.

Summary and reflection

The PES the teacher reviews what pupils did in the lesson, asks how they feel and finds out what they enjoyed most. One or two pupils share their ideas. The teacher thanks everyone and ends the lesson.

Reflection questions

- **What are the steps or techniques used in the triple jump?** Hop, step and jump – moving forward in three connected jumps. Use good balance and strong take-off from each jump.
- **How is the triple jump measured?** Measure from the starting line to the closest landing point of your jump. Use a tape measure or marked track to check the distance.
- **Where can you use the jumping skills you learned today in daily life?** To jump over obstacles safely when playing or running. To improve strength, balance and coordination for sports or activities.

Keywords

The teacher reads them aloud, explains them and tells the pupils to repeat after him/her: ***triple jump*** *(a track and field event where you perform a hop, step and jump in one sequence),* ***take-off line*** *(the line from which you start your jump),* ***hop-step-jump*** *(the three connected movements used in the triple jump hop on one foot, step onto the other, then jump forward).*

Lesson 4: Throwing objects for a short distance by using throwing implements

a. Learning objectives

By the end of this lesson, the pupil should be able to perform short-distance throws individually with proper technique and tools.

b. Teaching and learning resources

Playground or track and field area, kids' and teens' javelins, measuring tape, baton and stick

c. Prerequisites (Knowledge and understanding, skills attitude and values)

Pupils will perform better in this lesson if they can:

- Throw moderately heavy objects using one hand.
- Maintain body balance during and after the throw.
- Understand the concept of force and direction in throwing.

d. Introduction

Opening discussions

After checking pupils' readiness, the teacher leads a brief discussion on safety measures for handling throwing equipment's. Clear rules are established for when and where pupils may throw and they are reminded to be aware of their surroundings.

Warm-up and stretching exercises

The PES the teacher should explain why warming up and stretching are important before sports. The teacher shows how to do the warm-up and stretching, then explains it again. Pupils watch and try it slowly and carefully. The teacher checks if they understand, encourages them with kind words and sets a time limit for the warm-up and stretching.

Refer to unit one for general stretching, but emphasize the upper body areas involved in throwing.

- Jogging with gradually increasing speed.
- Forward and backward runs while balancing arm movements.
- Dynamic stretches focused on shoulders, triceps, and biceps.

e. Main activity

The PES the teacher asks pupils to listen carefully and gives clear instructions. The teacher or some pupils show how to do the activity. Then, the pupils start with a set time. The teacher moves around to help, gives praise to the pupils. If needed stop the game exercise 1 minute and remind instructions to pupils and then continue the game exercise.

Activity 4.13: Introduction throwing

The teacher explains to the pupils that in athletics, there are different types of throwing events such as the Javelin throw and discus throw. The shot put and hammer throw are also included but are usually introduced in higher grades. Tell them that they are going to focus on javelin throwing and discus throw.

The teacher explains to the pupils the following steps to follow during javelin throw:

- Hold the javelin near the cord with a firm but loose hand; palm faces up or in.
- Take 5–7 steady steps to build speed while staying balanced.
- Stretch their throwing arm back, javelin straight, eyes looking forward.
- Step with the opposite leg, twist their body and throw at a 35–40° angle.
- Stay behind the line and stay balanced after the throw.
- Use soft javelins and practice each step with teacher's guidance.

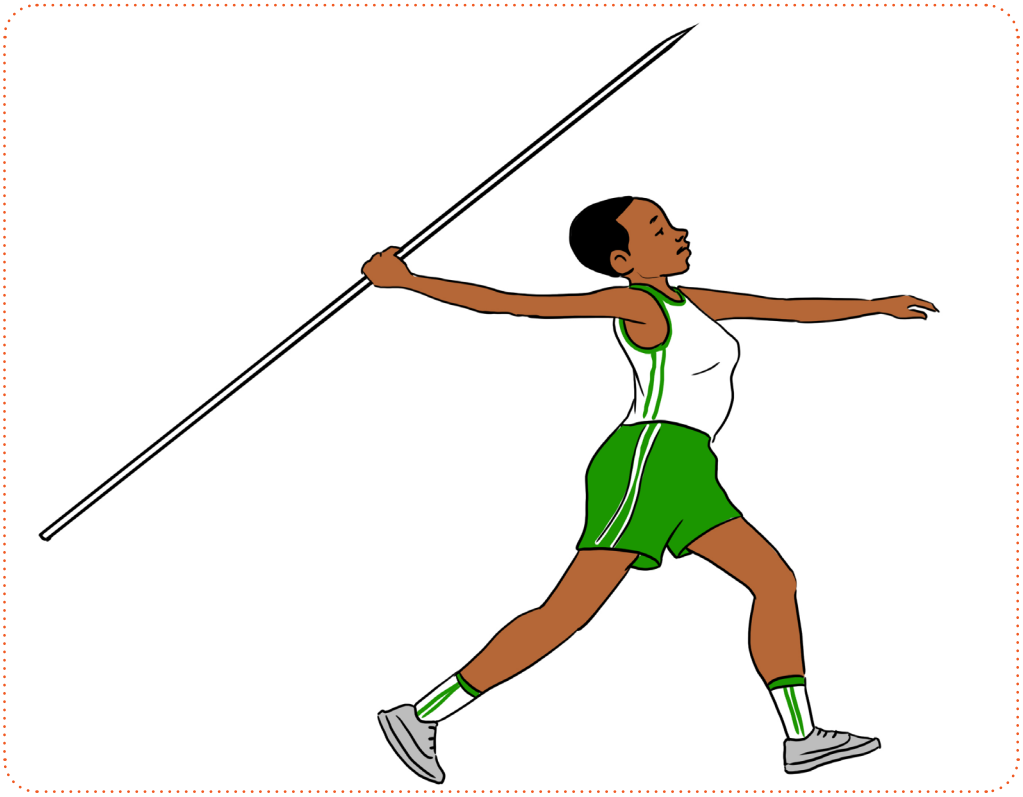

Fig.4.13: *The pupil practising javelin throw*

Phases of throwing

Gripping the javelin:

The javelin should rest in the fold of the hand. There are three easy ways to hold it: American, Finnish and "V" grip.

The teacher explains to the pupils that during this phase they should:

- *American grip (A):* Hold the cord between their thumb and first finger.
- *Finnish grip (B):* Put their first finger under the stick and grip the cord with their thumb and middle finger;
- *"V" grip (C):* Hold the stick between their first and middle fingers.

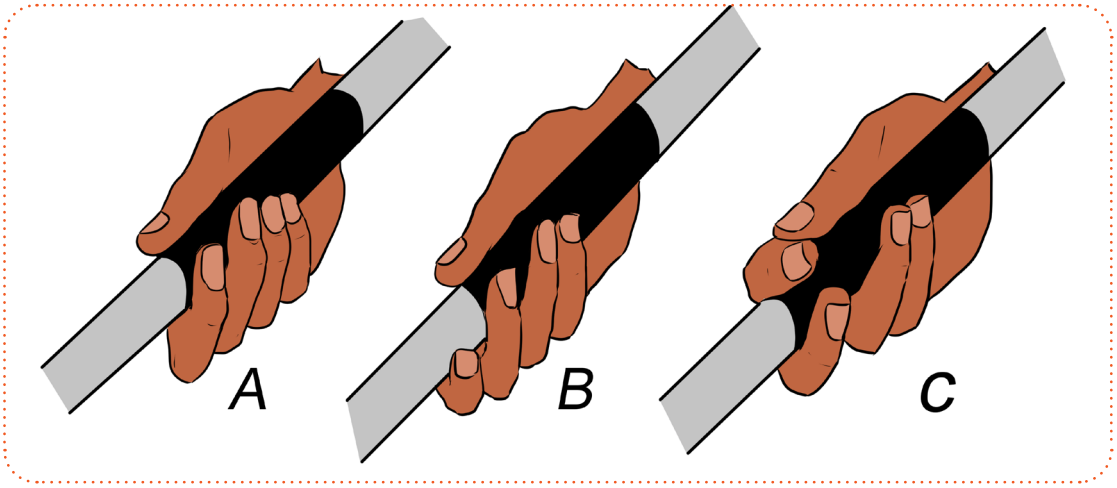

Fig 4.14: *Holding the javelin properly*

Phase 1: Approach phase

The teacher explains to the pupils that during this phase they should:

- *Hold the javelin near their head:* Pupils keep the javelin lifted above the shoulder, level with their head.
- *Start the approach:* Pupils begin their run-up with control and rhythm, keeping the javelin aligned.
- *Withdrawal:* Pupils pull the javelin back behind their head, keeping their throwing arm extended and relaxed.
- *Transition (cross-over):* Pupils lean the body slightly back by stepping their right foot (if right-handed) ahead of their centre of gravity. This sets up their body for explosive delivery.

Phase 2: Delivery phase

The teacher explains to the pupils that during this phase they should:

- Take a final stride with their left leg forward, aiming at the target.
- Align their shoulders and hips square to the target.
- As the left foot plants, drive their right leg and hips forward.
- Raise their throwing arm high and release the javelin smoothly upward.

Phase 3: Recovery

The teacher explains to the pupils that during this phase they should: Throw their arms move across their body and bring their back leg forward to stop without stepping over the line.

Understanding the javelin throwing field

Before practice, the teacher must explain the javelin area and safety rules.

- Javelin should be thrown forward only when it is safe, as directed by the teacher and no one must be in the landing area.
- The throw is made from a 30–36.5 meter long, 4-meter-wide runway and must land within a V-shaped zone.

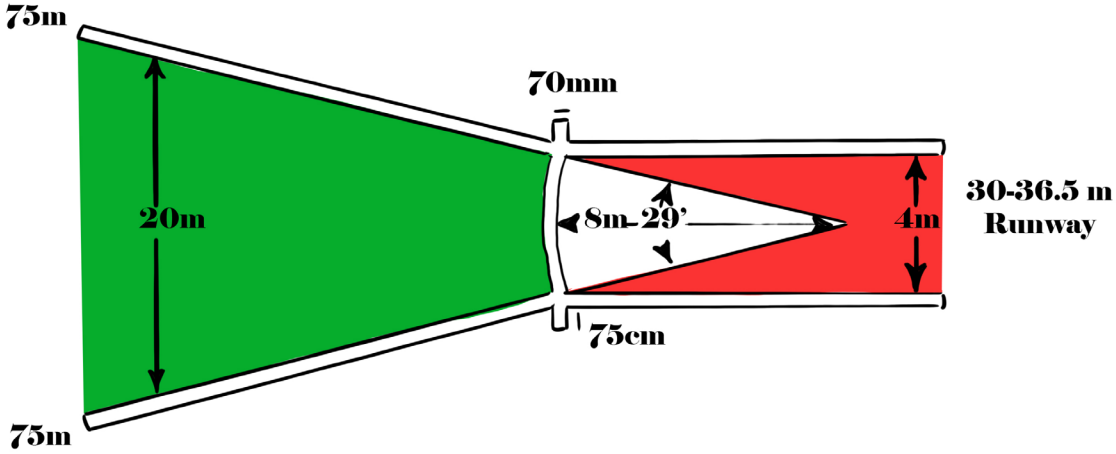

***Fig.4.15**: Javelin throwing field*

Application activity 4.2

Target throw challenge

The pupils take turns throwing the foam javelin toward cones or hoops placed at different distances.

The teacher gives points for:

- **Accuracy** (landing near or inside the target).
- ***Technique*** (good run-up, proper grip and release).
- ***Distance*** (optional).

Rotate roles:

The pupils can take turns being throwers, measurers and helpers to collect equipment.

Activity 4.14: Discus throw

General observations to consider during throwing discus:

Body alignment in discus throw

The teacher should explain to pupils that in a discus throw, they have to make sure that the chest, right knee and right toe line up during setup. This gives a stable base for turning and generating power. It helps transfer energy smoothly from the lower body through the hips, torso and arm. This alignment improves the throw.

* ***Discus grip***

The teacher request pupils to do the following:

- Hold the discus in their throwing hand with their fingers spread out.
- Rest their knuckles on the top edge and keep the discus flat in their palm. Their thumb should lightly touch the discus, not grip it.

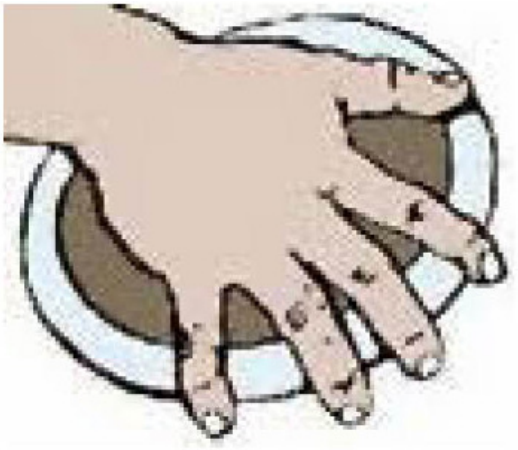

Fig.4.16: *Holding the discus*

Fig.4.17: *Holding a discus in hand*

The teacher should remind pupils to follow these key steps while executing discus throw:

- Feet shoulder-width apart, balanced and facing forward.
- Take a small step forward with the right foot (for right-handed throwers).
- Place 80% of body weight on the right leg in a low, athletic stance.

- Extend the throwing arm behind the body and use the non-throwing arm for balance.
- Rotate the hips and shoulders smoothly, releasing the discus at a 35–45° angle with the index finger.
- Finish the motion without crossing the throwing line.

During the activity the teacher should:

- Demonstrate each step before practice.
- Let pupils practise one step at a time.
- Ensure safety, such as clearing the area and only throwing in the designated direction.

**** Discus release technique***

The teacher should tell pupils to:

- Keep their palms facing down.
- Gently squeeze the discus out, like sliding a bar of soap.
- Remind them that the discus should spin off your index finger. For right-handed throwers, the discus spins clockwise. Follow through by letting their arm continue across their body.

Practice time

The teacher should let pupils perform the full discus throw, focusing on:

- Correct grip.
- Balanced stance and alignment.
- Smooth rotation.
- Proper release and follow-through.

The teacher observes and gives feedback based on safety, posture and release form.

Safety measures

- Keep the activity area clear of obstacles and hazards.
- Ensure equipment is age-appropriate and in good condition.
- Wear proper shoes and comfortable clothing.
- Perform warm-ups before exercises.
- Use correct techniques and maintain good posture.
- Stay aware of surroundings and other learners.
- Be prepared for emergencies with first aid knowledge.

Cool-down exercises

The PES the teacher explains why cool-downs are important after sport. The teacher shows how to do the cool-down, then asks pupils to follow along. While they do it, the teacher gives praise like "Well done!" and sets a time limit for the cool-down.

Under the teacher's guidance, pupils do the following exercises:

- Slow walking and deep breathing.
- Gentle stretching of arms, shoulders, legs and back.
- Relaxing the body after the throwing activity.

Summary and reflection

The PES the teacher reviews what pupils did in the lesson, asks how they feel and finds out what they enjoyed most. One or two pupils share their ideas. The teacher thanks everyone and ends the lesson.

Reflection questions

- **What was difficult for you during today's lesson?** It was hard to throw the discus far while keeping balance. Controlling the spin and direction of the discus was tricky.
- **How can you use the discus throwing skills in other sports or in daily life?** They help improve arm strength and coordination for other throwing activities.

Keywords

The teacher reads them aloud, explains them and tells the pupils to repeat after him/her: ***javelin*** *(a long, light spear thrown for distance in athletics),* ***discus*** *(a heavy, flat disc thrown for distance in athletics),* ***shot put*** *(a heavy ball pushed or "put" forward for distance in athletics),* ***hammer*** *(a ball attached to a wire and handle, swung and thrown for distance in athletics),* ***gripping*** *(how you hold an object, like a javelin or discus, to throw it properly).*

Talent Watch

During this unit, the teacher should help pupils discover their sports talents by watching how they perform, encouraging them, helping them join school teams or clubs and guiding them to improve.

4.7. End of unit practical assessment

The PES teacher observes the pupils during the activity or game and gives positive feedback like “Good job!”, “Well done!” or “That’s great!”. She/he helps pupils who are struggling or need support. She/he should remind pupils to be careful, slow down or try harder if needed and praises the whole group for their effort and participation.

Warm-up and stretching exercises

Under the teacher’s guidance, pupils do the following exercises:

- Warm-up exercises
- Light jogging around the field.
- High knees and heel kicks.
- Short approach runs.
- Gentle throwing movements with a partner.

Stretching exercises

- Arm swings and shoulder rotations.
- Leg swings and gentle lunges.
- Trunk twists and side stretches.
- Wrist and ankle rotations.

Activity 4.15

Javelin throw demonstration

The pupils perform a javelin throw focusing on:

- Proper grip (American, Finnish or V).
- Run-up technique.
- Delivery and follow-through.
- Respect of safety rules and boundary lines.

Discus throw demonstration

The pupils perform a discus throw, demonstrating:

- Proper grip and stance.
- Body rotation and weight transfer.
- Controlled release and correct spin direction.

Triple jump demonstration

The pupils perform triple jump demonstrating:

- Run up and hop.
- Arm action.
- Landing the hop.
- The step.
- The jump.

Observation criteria (the teacher's checklist):

- Proper body alignment and posture.
- Use of correct grip technique.
- Safe and effective release mechanics.
- Balance and follow-through.
- Respect for safety and instructions.
- Distance performed by pupils during throwing.
- Performance of hop-step-jump phases during triple jump.

Cool-down exercises

Under the teacher's guidance, pupils do the following exercises:

Slow walking and deep breathing.

Gentle stretching of arms, shoulders, legs and back.

Relaxing the body after the assessment.

Sample of an assessment checklist

Criteria	Yes	No	Comments
Understands and follows athletics rules and safety instructions.			
Uses the correct grip technique for javelin and discus throws.			
Demonstrates proper body posture and alignment during performance.			
Performs a correct run-up and prepares well before throwing or jumping.			
Uses effective throwing techniques with controlled release and follow-through.			
Demonstrates correct body rotation and weight transfer during discus throw.			

Performs the hop-step-jump phases correctly in triple jump.			
Maintains balance during landing and follow-through.			
Achieves good distance in throwing and jumping activities.			
Respects safety zones, boundaries and instructions.			

Sample of an Assessment Rubric

Criteria	Excellent	Good	Satisfactory	Needs improvement
Javelin throw technique	Uses correct grip, run-up, delivery and follow-through with excellent control.	Uses correct technique with minor mistakes.	Performs the throw but needs improvement in grip or movement.	Has difficulty applying the correct technique.
Discus throw technique	Demonstrates correct grip, rotation, weight transfer and controlled release.	Performs most techniques correctly with few errors.	Shows basic understanding but needs more practice.	Has difficulty controlling the discus throw technique.
Triple jump technique	Performs hop-step-jump phases correctly with good rhythm and landing.	Performs phases with minor mistakes.	Performs some phases but needs support.	Has difficulty coordinating the phases.
Body control and balance	Maintains excellent posture, balance and follow-through.	Maintains good control with few errors.	Sometimes loses balance or body position.	Frequently loses control and balance.
Safety and respect for instructions	Always follows safety rules and instructions.	Usually follows safety rules with few reminders.	Sometimes needs reminders to follow rules.	Does not consistently follow safety instructions.
Performance distance	Achieves a very good distance compared to expected level.	Achieves a good distance.	Achieves a moderate distance with improvement needed.	Achieves a short distance and needs more practice.

4.8. Additional activities

4.8.1. Remedial activities

The teacher asks pupils to do the following

Activity 4.16: Running (Sprints)

High-knee walks and slow-motion sprints (10–15m).

- *Focus:* Arm-leg coordination, posture balance.
- *Tools:* Cones for short distances, ladder exercises.

Activity 4.17: Jumping

Standing long jump into sandpit or marked zones.

- *Focus:* Take-off foot placement, swinging arms and landing safely.
- *Tools:* Marker lines or hoops on ground.

Activity 4.18: Throwing

Beanbag throws or soft ball overhead throws.

- *Focus:* Body rotation, grip and release technique.
- *Tools***:** Beanbags, foam javelins soft balls.

4.8.2. Consolidation activities

The teacher asks pupils to do the following

Activity 4.19: Running (Middle distance or relay)

4x50m relay with baton passing exercises.

- *Focus:* Speed endurance, pacing and teamwork.
- *Tools:* Batons, cones and marked lanes.

Activity 4.20: Jumping

Practice approach run + jump (long/high) using a soft target.

- *Focus:* Rhythm in approach, take-off angle, landing control.
- *Tools:* Sandpit, measuring tape and hurdles for rhythm exercises.

Activity 4.21: Throwing

Target throwing (hula hoop or mat zone).

- *Focus:* Accuracy, consistency in technique.
- *Tools:* Medicine balls, foam javelins and discs.

4.8.3. Extension activities

The teacher asks pupils to do the following

Activity 4.22: Running (Speed and endurance)

Sprint starts with reaction exercises. + 600m pacing run.

- *Focus:* Explosive start split timing, race strategy.
- *Tools:* Stopwatch, start signal (whistle or flag).

Activity 4.23: Jumping

Competition-style jump events with peer judging.

- *Focus:* Personal best improvement, technical precision.
- *Tools:* Measuring equipment, jump bars or mats and peer scoring sheets.

Activity 4.24: Throwing

Progressive weighted throws (light to heavy).

- *Focus:* Power, technique under pressure and max distance.
- *Tools:* Real equipment (with proper safety) or competitive format.

UNIT 5

BASIC FOOTBALL TACTICS

Key Unit Competence

Develop Football skills and apply techniques and tactics of kicking, passing the ball and using appropriate parts of the body during game situation.

At the end of this unit, the pupil should be able to:
Knowledge and understanding • Explain the basic rules of Football. • Identify when and why to use specific techniques or parts of the body during the game.
Skills • Make simple tactical decisions, such as when to pass, shoot or dribble. • Apply correct body positioning on the field. • Control the ball effectively during play.
Attitudes and values • Demonstrate confidence while playing. • Show respect and fairness toward teammates and opponents. • Communicate effectively with teammates. • Cooperate well during team activities.

5.1. Prerequisite (Knowledge and understanding, skills, attitude and values)

Pupils will perform better in this unit if they:

- Can apply basic Football techniques and tactics to improve performance.
- Are developing individual technical skills (e.g: ball control, shooting and dribbling).
- Can evaluate their performance in Football.
- Show teamwork, team spirit, fair play and respect for the rules.

5.2. Guidance on introductory activity

The teacher should introduce the Football unit, lead a warm-up and run the "team circle pass" to promote teamwork. Pupils pass the ball while naming teammates, with more balls added to increase the challenge. The teacher discusses the importance of teamwork and football tactics before starting the main activity.

Opening discussions

The teacher organises pupils into small groups based on the number of footballs and available space. Discuss the body parts commonly used in Football: feet for kicking and controlling the ball, head for headers and chest for cushioning the ball during control.

Warm-up and stretching exercises

Warm-up starts with jogging, increasing speed and intensity. Pupils practise Football skills like heading, passing and directional runs. Activities include skipping, turning, sprinting and quick starts and stops.

The teacher may lead or assign a pupil to lead, while supervising to ensure proper stretching.

5.3. Generic Competencies

- **Critical thinking and problem-solving:** Analyse Football game situations, make appropriate decisions and apply kicking, passing, ball control and tactical skills effectively during matches.
- **Cooperation, interpersonal management and life skills**: Work with teammates, apply team strategies, respect opponents, follow Football rules and demonstrate teamwork, discipline and fair play.
- **Communication in the official language:** Communicate with teammates, give and follow instructions, discuss Football tactics and techniques and encourage others during training and games.

5.4.Basic Values

- **Solidarity and democracy:** Working cooperatively with teammates, communicating effectively, applying team tactics, sharing responsibilities and supporting others during Football games.
- **Justice:** Respecting Football rules, accepting decisions fairly, playing honestly and applying tactics without unfair actions during game situations.
- **Dignity and integrity:** Showing respect to teammates, opponents and officials, using skills responsibly, caring for equipment and demonstrating fair play during Football activities.

5.5. Cross Cutting Issues

- **Gender Equality:** Developed through encouraging equal participation of boys and girls in Football skills, tactics and team activities without discrimination.
- **Peace and Values Education:** Developed through promoting teamwork, respect, discipline, fair play, responsibility and self-control while applying Football techniques and tactics.
- **Inclusive Education:** Developed through adapting Football activities to support pupils with different abilities and ensuring equal participation and cooperation among all players.

5.6. List of lessons and learning objectives

#	Lesson title	Learning objectives	Number of periods
1	Kicking a moving or stationed ball.	To perform technical Football exercises that focus on shooting.	2
2	Exercises in heading the ball.	To perform technical Football exercises that focus on heading.	2
3	Playing a Football game by following the instructions.	To perform technical Football exercises that focus on game situations.	4
4	End of unit practical assessment.	To assess pupils' abilities of applying learned techniques and tactics for kicking, passing and using appropriate parts of the body in Football game situation.	2

Lesson 1: Kicking a moving or stationed ball

a. Learning objectives

By the end of this lesson, the pupil should be able to perform individually technical Football exercises that focus on shooting.

b. Teaching and learning resources

Playground or Football field, Footballs, cones, sticks, narrow band, bibs, whistles and a stopwatch. In limited conditions, the teacher encourages creativity by using everyday materials like banana fibre balls, etc.

c. Prerequisites (Knowledge and understanding, skills, attitude and values)

Pupils will perform better in this lesson if they already know how to:

- Kick a stationary ball.
- Execute a positioned ball kick (e.g: corner kick, free kick and penalty kick).
- Use different parts of the foot when kicking.

d. Introduction

The teacher should continue with the main part of the lesson, hence opening discussion, warm-up and stretching exercises have been done in the introductory activity.

e. Main activity

Description of a new skill

The PES the teacher asks pupils to listen carefully and gives clear instructions. The teacher or some pupils show how to do the activity. Then, the pupils start with a set time. The teacher moves around to help, gives praise to the pupils. If needed stop the game or exercise 1 minute and remind instructions to pupils and then continue the game or exercise.

The teacher should explain to the pupils that football techniques include skills like kicking, dribbling, passing and heading. Tell them that they are going to focus on kicking techniques. This involves shooting a stationary ball, like during a free kick, as well as kicking a moving ball during play. Mastering both is essential to becoming a skilled player.

Activity 5.1: Football kicks

The teacher teaches pupils to kick using the inside, instep and toe of the foot, focusing on body balance, keeping eyes on the ball and a proper follow-through. Demonstrate only if confident or ask a skilled pupil to help.

Punt kick: The teacher should explain to the pupils that it is usually used by goalkeepers. The ball is dropped from the hands and kicked before it touches the ground. She/he reminds them to focus on timing, balance and kicking with the laces.

Fig.5.1: *Pupil doing punt kick*

Hook kick: The teacher should explain to the pupils that it is used to curve the ball or change direction quickly. The kicking leg swings in a curved motion across the body.

Fig.5.2: *Pupil doing hook kick*

Push kick: The teacher should explain to the pupils that it is a short, controlled pass using the inside of the foot. It is ideal for accurate ground passes between teammates. Great for beginners to learn ball control

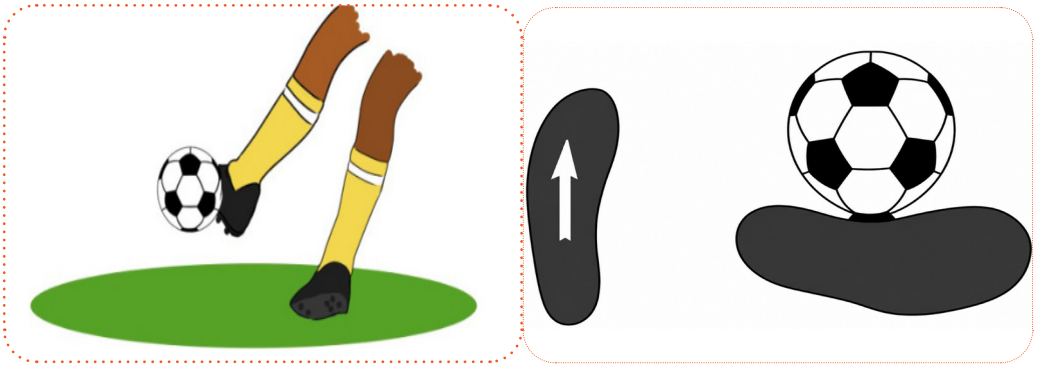

Fig.5.3: *Pupil doing push kick*

Instep kick (inner side kick): The teacher should explain to the pupils that it is one of the most powerful kicks. It is used while striking the ball with the top of the foot (laces). It is commonly used for long passes or shooting at the goal.

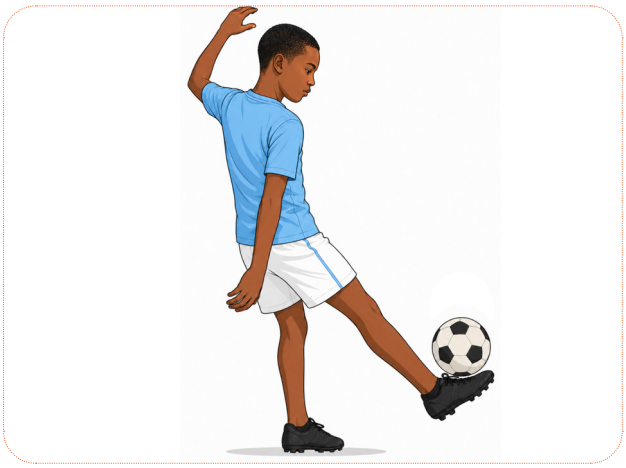

Fig.5.4: *Pupil doing inner side or instep kick*

Outside kick

The teacher should tell the pupils that:

The ball is kicked with the outside of the foot. It is used for surprise passes or curved shots. It allows quick direction changes without full leg movement.

Fig.5.5: *Pupil doing outside kick*

Back heel kick

The teacher explains to the pupils that:

- The ball is struck with the heel, usually while facing away from the direction of the pass or shot.
- Often used for short, quick passes in tight spaces.

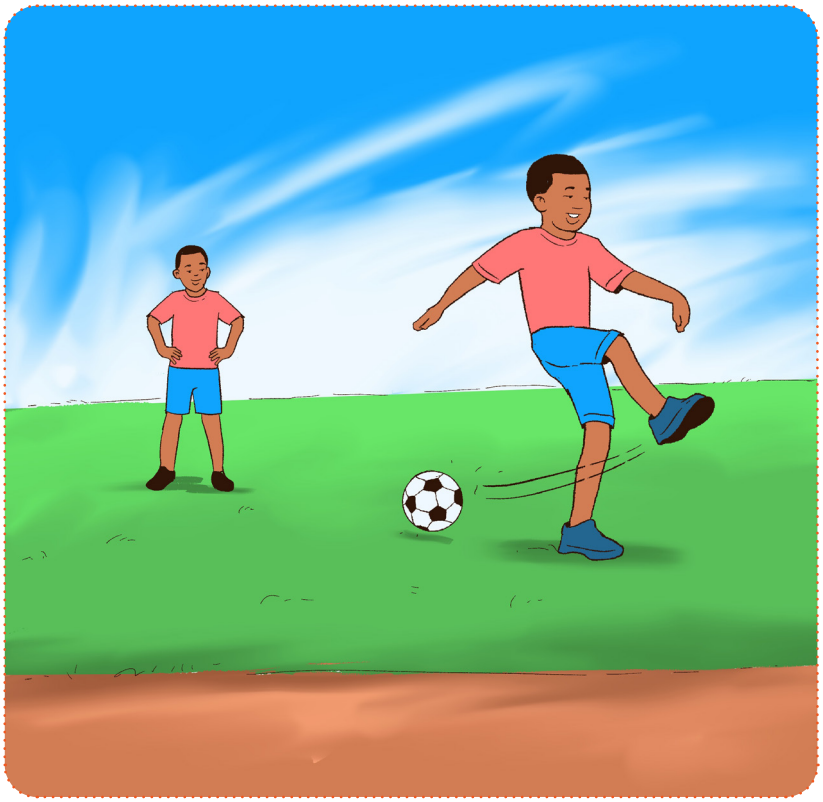

Fig.5.6: *Pupil doing back heel kick*

Application activity 5.1

The teacher should let pupils perform the different kicking techniques individually or in groups. *The teacher encourages the following:*

- Accuracy over power.
- Trying both dominant and non-dominant feet.
- Group feedback and peer correction, where appropriate.

Cool-down exercises

The PES the teacher explains why cool-downs are important after sport. The teacher shows how to do the cool-down, then asks pupils to follow along. While they do it, the teacher gives praise like "Well done!" and sets a time limit for the cool-down.

The teacher guides the pupils in cooling down the body and gives exercises for stretching the muscles, especially the legs, thighs, hips and lower back, used during kicking.

Summary and reflection

The PES the teacher reviews what pupils did in the lesson, asks how they feel and finds out what they enjoyed most. One or two pupils share their ideas. The teacher thanks everyone and ends the lesson.

Reflection questions

- **Which type of kick was easiest or hardest for you, and why?** The easiest kick was using the inside of the foot because it was more controlled. The hardest kick was using the laces for a long kick because it needed more power.
- **How does using different parts of your foot change how the ball moves?** The inside of the foot makes the ball go straight and accurate. The laces or outside of the foot make the ball go farther or curve.
- **How can you use today's kicking skills when playing real football games?** To pass accurately to teammates. To shoot goals or clear the ball from your side safely.

Keywords

The teacher reads them aloud, explains them and tells the pupils to repeat after him/her: ***punt kick*** *(kicking the ball after dropping it from your hands, usually to pass or clear),* ***hook kick*** *(kicking the ball with a curved motion to change its direction),* ***push kick*** *(kicking the ball gently to move it short distances or pass),* ***instep kick*** *(kicking the ball with the top part of your foot for power and distance),* ***outside kick*** *(kicking the ball with the outer side of your foot to curve it),* ***back heel kick*** *(kicking the ball backward using your heel, often to surprise opponents).*

Lesson 2: Exercises in heading the ball

a. Learning objective

By the end of this lesson, the pupil should be able to perform individually technical Football exercises that focus on heading.

b. Prerequisites (Knowledge and understanding, skills, attitude and values)

Pupils will learn better if they can perform basic kicking exercises such as:

- Kicking a motionless ball.
- Kicking from set positions (penalty, free kick and corner kick).
- Work in pairs or groups cooperatively.

c. Teaching and learning resources

Playground or football field, footballs, cones, sticks, bibs, narrow band, whistles and stopwatch. In limited conditions, the teacher is encouraging creativity by using local materials/resources like banana fibre balls, etc.

d. Introduction

Opening discussions

When organising pupils, consider class size and available resources for effective groupings. Maximise resources by focusing on fundamental skills and rotating groups for better engagement. In Football, key body parts like legs (for dribbling and shooting) and feet (for passing) are essential. The head is important for scoring, passing and clearing, as it adds control and precision to aerial plays.

Warm-up and stretching exercises

The PES the teacher should explain why warming up and stretching are important before sports. The teacher shows how to do the warm-up and stretching, then explains it again. Pupils watch and try it slowly and carefully. The teacher checks if they understand, encourages them with kind words and sets a time limit for the warm-up and stretching.

The session includes jogging at a gradually increasing speed, followed by functional Football warm-ups like passing, heading and agility exercises (skipping, turning, sprinting, stopping and running sideways or backwards). Stretching exercises target the neck, shoulder flexibility for heading, as well as leg/thigh muscles to aid movement and balance. These exercises enhance overall coordination and muscle readiness.

e. Main activity

The PES the teacher asks pupils to listen carefully and gives clear instructions. The teacher or some pupils show how to do the activity. Then, the pupils start with a set time. The teacher moves around to help, gives praise to the pupils. If needed stop the game or exercise 1 minute and remind instructions to pupils and then continue the game or exercise.

The teacher should explain to the pupils that heading in Football is when a player uses his/her forehead to hit the ball, often for passing, shooting or defending. Power comes from neck muscles, not just body movement. Players compete for position during goal kicks, corners and long passes to win a header.

Activity 5.2: Heading the ball

The teacher tells pupils to:

- Use their foreheads (between eyebrows and hairline) to strike the ball, not let it bounce off.
- Engage their back and core muscles to move their upper body toward the ball.
- Arch their back slightly before impact, then lean forward as they head the ball.
- Keep their neck stiff and eyes open, focusing on the ball at all times.
- Bend their knees for balance and time their jump and contact carefully.

For a defensive header, the teacher explains to the pupils that:

A defensive football technique used to clear the ball from danger, especially during set pieces or aerial threats. Emphasis is on kicking the ball with height and distance rather than aiming accuracy

For attacking/offensive headers, the teacher explains to the pupils that:

A header is used to score or pass, often after a set piece, requiring timing, accuracy and jumping.

The teacher demonstrates the following:

- Demonstrate correct body positioning under the ball, eyes open, mouth closed and using the forehead to strike.
- Show how to time the jump and use neck muscles to generate power for effective headers.
- Let pupils practice stationary and jumping headers with a partner for skill reinforcement.

***Fig.5.7**: Pupil heading a ball*

For the heading technique, the teacher requests pupils to do the following:

- In the partner heading exercise, one pupil tosses the ball while the other practices heading it back, then they switch roles after 10 turns.
- The attacking and defensive heading exercise involves two teams taking turns as attackers and defenders.
- Additional pupils cross balls from the sidelines or corner zones into the field.
- Defenders aim to clear the ball with defensive headers, while attackers try to score.
- After 10 repetitions, roles are reversed to ensure balanced practice.

Cool-down exercises

The PES the teacher explains why cool-downs are important after sport. The teacher shows how to do the cool-down, then asks pupils to follow along. While they do it, the teacher gives praise like "Well done!" and sets a time limit for the cool-down.

The teacher guides the pupils through a cool-down routine and provides stretching exercises targeting the muscles, especially the neck, shoulders, back and legs, heavily involved in heading the ball.

Summary and reflection

The PES the teacher reviews what pupils did in the lesson, asks how they feel and finds out what they enjoyed most. One or two pupils share their ideas. The teacher thanks everyone and ends the lesson.

Reflection questions

- **What part of your body do you use to head the ball correctly?** The forehead is used to hit the ball safely and accurately. Keep your neck and eyes steady while heading the ball.
- **What was the hardest part about learning to head the ball?** Timing the jump to meet the ball was difficult. Controlling the ball's direction after heading was tricky.
- **When can you use heading skills in a real Football game?** To score goals from crosses or passes. To clear the ball from your goal area while defending.

Keywords

The teacher reads them aloud, explains them and tells the pupils to repeat after him/her: ***defensive header*** *(using my head to hit the ball away from my goal to stop the opponent from scoring),* ***offensive header*** *(using my head to try to score a goal or pass to a teammate),* ***forehead*** *(the front part of my head used to hit the ball safely and accurately).*

Lesson 3: Play a Football game by following Instructions

a. Learning objectives

By the end of this lesson, the pupil should be able to play Football by using learned technical and tactical skills in the game situation.

b. Prerequisites (Knowledge and understanding, skills, attitude and values)

The pupils will learn more effectively in this lesson if they can follow rules and focus on safety, teamwork and enjoyment. Having developed good habits, such as making smart choices and demonstrating leadership, will also support their learning.

c. Teaching and learning resources

Football field or playground, Footballs, whistle, red and yellow cards, cones or other markers. In limited conditions, the teacher encourages creativity by using everyday materials like banana fibre balls, etc.

d. Introduction

Opening discussions

The teacher check the pupils' readiness and ensure they are wearing proper sports uniform (sports uniform, shoes, etc). Ask the pupils to form teams with equal numbers and gender balance.

The pupils discuss the importance of rules in Football for fairness, safety and enjoyment. Provide clear game instructions before starting, such as fouls, throw-ins and goal restarts.

Warm-up and stretching exercises

The PES the teacher should explain why warming up and stretching are important before sports. The teacher shows how to do the warm-up and stretching, then explains it again. Pupils watch and try it slowly and carefully. The teacher checks if they understand, encourages them with kind words and sets a time limit for the warm-up and stretching.

The teacher selects a pupil to lead the warm-up and stretching exercises. Warm-up exercises will include: jogging, 20-meter sprints and stretching (legs, back, arms). The teacher gives feedback and ensures proper posture throughout the activities.

e. Main activity

The PES the teacher asks pupils to listen carefully and gives clear instructions. The teacher or some pupils show how to do the activity. Then, the pupils start with a set time. The teacher moves around to help, gives praise to the pupils. If needed stop the game or exercise 1 minute and remind instructions to pupils and then continue the game or exercise.

Activity 5.3: Game situation

The teacher divides the class into 3 teams (A, B and C) with equal numbers and gender balance, marking the pitch boundaries together.
In the three matches, each team takes turns playing and refereeing.
Review basic rules, teach fair decision-making and hand signals and encourage safe, respectful play while mediating any rule conflicts.

The teacher explains to the pupils that Football game is played by 11 players and shows them different positions of players during the Football.

Goalkeeper

- Stays near the goal to stop the ball from going in.
- Can use hands inside the penalty area.

Defenders

- Centre-backs: Stay near the goalkeeper and block attackers.
- Full-backs: Play on the left and right sides, stop wingers and help attack sometimes.

Midfielders

- Central midfielders: Control the game by passing, keeping possession and helping both defence and attack.
- Wingers: Stay wide on the left or right side to run fast, cross and create chances.
- Defensive midfielder: Protects defenders and breaks opponent's attacks.
- Attacking midfielder: Creates scoring chances, supports strikers.

Forwards (strikers or attackers)

- Play near the opponent's goal to score.
- Centre forward: Main goal scorer.
- Second striker: Helps the main striker and makes plays.

Match rotation and referee roles:

Match 1: team A vs team B: team C serves as referees or officials.

Match 2: team A vs team C: team B serves as the referees.

Match 3: team B vs team C: team A serves as the referees.

Cool-down exercises

The PES the teacher explains why cool-downs are important after sport. The teacher shows how to do the cool-down, then asks pupils to follow along. While they do it, the teacher gives praise like "Well done!" and sets a time limit for the cool-down.

The teacher guides pupils in cooling down the body and leads them through stretching exercises, especially for the legs, lower back and arms.

Summary and reflection

The PES the teacher reviews what pupils did in the lesson, asks how they feel and finds out what they enjoyed most. One or two pupils share their ideas. The teacher thanks everyone and ends the lesson.

Reflection questions

- **How did you feel playing by all the rules?** I felt fair and happy because everyone followed the same rules. It made the game more fun and safe for everyone.
- **What was difficult about being the referee?** It was hard to watch all players at the same time. Making quick and fair decisions was sometimes tricky.
- **What did you learn about fair play and respect while playing Football?** Playing honestly helps everyone enjoy the game. Respecting others' turns and decisions keeps the game friendly.

Keywords

The teacher reads them aloud, explains them and tells the pupils to repeat after him/her: ***fair play*** *(playing honestly and respecting others),* ***referee*** *(the person who makes sure players follow the rules),* ***rules*** *(instructions that players must follow during the game),* ***team*** *(a group of players working together to win),* ***fouls*** *(actions that break the rules, like pushing or handling the ball incorrectly).*

Talent Watch

During this unit, the teacher should help pupils discover their sports talents by watching how they perform, encouraging them, helping them join school teams or clubs and guiding them to improve.

5.7. End of unit practical assessment

The PES teacher observes the pupils during the activity or game and gives positive feedback like "Good job!", "Well done!" or "That's great!". She/he helps pupils who are struggling or need support. She/he should remind pupils to be careful, slow down or try harder if needed and praises the whole group for their effort and participation.

Activity 5.4

*** Individual technical demonstration**

The teacher requests that each pupil perform the following:

- Kicking a stationary ball (accuracy and form).
- Heading the ball from a gentle throw (timing and correct technique).
- Passing the ball to a target using both short and long passes.

Assessment criteria: proper contact, posture, ball control and balance

*** Group tactical performance (Mini-match assessment)**

Pupils are grouped into small teams (e.g: 5 vs 5). They play a short game where the teacher observes:

- Application of Football rules (throw-ins, fouls and restarts).
- Use of proper techniques (kicking, passing and heading) during play.
- Team cooperation, communication and fair play.
- Respect for roles (players, referees) if rotating officiating duties.

Teams and referee roles should be rotated, following the approach used in lesson 3.

Assessment tools

- Observation checklist (skills, rule applicationand participation).
- Peer or self-evaluation for teamwork and attitude.
- The teacher feedback on strengths and areas for improvement.

Individual technical demonstration

Sample of an assessment checklist

Pupil name	Kicking accuracy and form	Heading technique	Passing (short and long)	Ball control and balance	Teacher comments
	Yes / No	Yes / No	Yes / No	Yes / No	

Sample of an assessment rubric

Criteria	Excellent	Good	Satisfactory	Needs improvement
Kicking accuracy and form	Ball goes to target consistently; posture correct.	Ball mostly accurate; minor posture errors.	Ball sometimes inaccurate; posture needs improvement.	Ball rarely reaches target; poor form.
Heading technique	Proper timing, technique, and control.	Mostly correct timing and technique.	Occasional errors in timing or technique.	Incorrect timing and technique.
Passing (short and long)	Accurate passes using correct technique both distances.	Mostly accurate with minor errors.	Sometimes inaccurate; technique inconsistent.	Inaccurate; poor technique.
Ball control and balance	Excellent control; maintains balance	Good control; minor balance issues	Inconsistent control; struggles with balance	Poor control; loses balance frequently

Group tactical performance (Mini-match assessment)

Sample of an assessment checklist

Team name	Rules application	Technique in Play	Team cooperation and communication	Fair play and respect for roles	Teacher comments
	Yes / No	Yes / No	Yes / No	Yes / No	

Sample of an assessment rubric

Criteria	Excellent	Good	Satisfactory	Needs improvement
Application of rules	Follows all rules consistently.	Follows most rules; minor mistakes.	Sometimes follows rules.	Rarely follows rules.
Technique in play	Correct kicking, passing, heading consistently.	Mostly correct techniques.	Occasionally correct techniques.	Poor or incorrect techniques.

Team cooperation and communication	Excellent teamwork, communicates effectively.	Good teamwork; minor communication gaps.	Inconsistent teamwork; poor communication.	No teamwork; poor communication.
Fair play and respect for roles	Always fair; respects all roles.	Mostly fair; minor lapses.	Sometimes fair; some role confusion.	Unfair play; disregards roles.

5.8. Additional activities

5.8.1. Remedial activities

The teacher asks pupils to do the following:

Shadow play

- Pupils walk through their positions and roles during common scenarios (e.g: goal kick, defending a corner).
- Coach stops and corrects positioning.

1vs1 and 2vs1 exercises

- Helps build decision-making: when to dribble, when to pass.
- Use cones to define small channels and goals.

Passing triangles

- Pupils pass in threes to practice angles and support movement.
- Focus on communication and the weight of the pass.

Follow-the-pass game

- Pass and follow to the next position to reinforce positioning, rotation and ball movement.

5.8.2. Consolidation activities

The pupils play Football game situation with the following changes:

Small-sided games (3vs3 or 4vs4)

- Emphasise creating space, staying wide and using support pupils.
- Add constraints (e.g: must pass twice before scoring).

Zoned possession game

- The teacher divides the pitch into zones. Pupils must stay in zones to encourage passing and spacing.
- He/she helps visualise formation and positional discipline.

Defend the gate

- Teams defend and attack a series of mini-goals or "gates" placed across the field.
- Reinforces defending shape and tactical pressing.

3-Goal game

- Team defends 1 goal and attacks 3 goals spaced across the end line.
- Teaches switching play and creating space.

5.6.3. Extension activities

The pupils play Football game situation with the following changes:

Conditioned full-sided games

- Include rules like: All players must touch the ball before scoring or goals only count from crosses.
- Encourages tactical discipline and teamwork.

Transition games (Attack to defence)

- Create 5vs3 or 6vs4 situations where the ball turns over quickly.
- Teaches quick recovery and shaping defensively after losing possession.

Formation switching

- Teams must switch between 4-3-3 and 3-2-2 formations mid-game on the coach's signal.
- Builds awareness and adaptability.

UNIT 6

BASIC VOLLEYBALL TACTICS

Key Unit Competence

Improve techniques of playing Volleyball tactically in the game situations.

At the end of this unit, the pupil should be able to:
Knowledge and understanding
• Explain simple tactics such as rotations and passing sequences. • Describe the importance of teamwork and coordination during the game
Skills
• Demonstrate basic team tactics during play. • Move quickly and efficiently on the field or court. • Position themselves correctly according to the game situation.
Attitudes and values
• Show team spirit during activities. • Work cooperatively with others. • Encourage fair play among peers. • Follow instructions carefully.

6.1. Prerequisite (Knowledge and understanding, skills, attitude and values)

Pupils will perform better in this unit if they can:

- Apply basic Volleyball skills and movements in structured play.
- Perform techniques such as accurate setting, spiking (hitting or smashing) the ball toward the opponent's court and blocking at the net.
- Show understanding of simple game rules and demonstrate safe, cooperative game play.

6.2. Guidance on introductory activity

In the introductory part of the unit, the teacher sets the stage by explaining the concept of volleyball tactics to help pupils understand the upcoming lessons. The goal is to prepare both mentally and physically. The practical activity, called "Ball over the net," begins with a warm-up and stretching exercises with a demonstration of basic passing (bump) and a simple over-the-net exchange. Pupils then pair up and practise passing the ball over a low net or rope. After the activity, the teacher encourages a discussion with two key questions:

- **What do we need to work together successfully in Volleyball?** Communication and cooperation. Understanding roles and good timing.
- **In what ways does passing the ball change when playing in a team setting compared to playing individually?** Pass accurately to teammates. Decide quickly and communicate during play.

After this session, the teacher continues with the main activity of lesson one.

6.3. Generic Competencies

- **Critical thinking and problem-solving:** Analyse Volleyball game situations, make appropriate decisions and apply tactical skills such as serving, passing, setting, attacking and defending effectively during games.
- **Cooperation, interpersonal management and life skills:** Work with teammates, apply team strategies, respect opponents, follow Volleyball rules and demonstrate teamwork, discipline and fair play.
- **Communication in the official language:** Communicate with teammates, give and follow instructions, discuss Volleyball tactics and techniques and encourage others during training and games.

6.4. Basic Values

- **Solidarity and democracy:** Working cooperatively with teammates, communicating effectively, applying team strategies, sharing responsibilities and supporting others during Volleyball games.
- **Justice:** Respecting Volleyball rules, accepting decisions fairly, playing honestly and applying tactics in a fair manner during game situations.
- **Respect for others and human rights:** Showing respect to teammates, opponents and officials, encouraging participation, using positive language and avoiding actions that may harm others.

6.5.Cross Cutting Issues

- **Gender equality:** Developed through encouraging equal participation of boys and girls in Volleyball techniques, tactical activities and team games.

- **Peace and values education:** Developed through promoting cooperation, respect, discipline, communication, fair play and self-control while applying Volleyball tactics.
- **Inclusive education:** Developed through adapting Volleyball activities to support pupils with different abilities and ensuring equal participation and teamwork among all pupils.

6.6. List of lessons and learning objectives

#	Lesson title	Learning objectives	Number of periods
1	Basics of setting and spiking the ball.	To refine the technical and tactical skills of service and spiking the ball.	2
2	Basics of blocking the ball.	To refine the technical and tactical skills of setting and blocking in Volleyball.	2
3	Playing Volleyball in the game situation.	To play Volleyball in the game situation, adhering to the instructions given.	4
4	End of unit practical assessment.	To assess pupils' abilities of playing Volleyball using learned basic techniques such as passing, blocking, setting and serving the ball and use these techniques in game situations.	2

Lesson 1: Basics of setting and spiking the ball

a. Learning objectives

By the end of this lesson, the pupil should be able to refine the technical and tactical skills of service and spiking the ball.

b. Teaching and learning resources

Playground, volleyballs, whistles, cones, chairs, bibs and sports uniforms.

c. Prerequisites (Knowledge and understanding, skills, attitude and values)

Pupils will learn better if they can already:

- Perform basic serves, passes, spikes, sets, digs and blocks
- Understand basic Volleyball rules and show teamwork

d. Introduction

The teacher should continue with the main part of the lesson, hence opening discussion, warm-up and stretching exercises have been done in the introductory activity.

e. Main activity

The PES the teacher asks pupils to listen carefully and gives clear instructions. The teacher or some pupils show how to do the activity. Then, the pupils start with a set time. The teacher moves around to help, gives praise to the pupils. If needed stop the game or exercise 1 minute and remind instructions to pupils and then continue the game or exercise.

Activity 6.1: Setting the ball

Hand position

The teacher should request pupils to:

- Bring hands above head, palms up.
- Form a triangle with thumbs and index fingers.
- Keep fingers open and curved.
- Create a "window" the size of a Volleyball.

Fig.6.1: *Pupil showing hand setting position*

Posture

The teacher should tell pupils to:

- Stand with feet shoulder-width apart.
- Slightly bend their knees.
- One foot slightly ahead.
- Elbows out, hands above forehead.

Fig.6.2: *Pupil showing setter posture*

Ball contact

The teacher should tell pupils to:

- Relax, hands, absorb the ball.
- Push the ball up using fingers and wrists.
- Fully extend arms during release.
- Follow through smoothly.

The teacher should remind pupils to respect the following:

- No spin.
- Avoid holding the ball (called a "lift").

Application activity 6.1: Setting exercise

Pupils pair up:

- One tosses, the other sets.
- Rotate partners, then practise in small groups.
- The teacher corrects especially hand position and follow-through.

Cool-down exercises

The PES the teacher explains why cool-downs are important after sport. The teacher shows how to do the cool-down, then asks pupils to follow along. While they do it, the teacher gives praise like "Well done!" and sets a time limit for the cool-down.

Under the teacher's guidance, pupils do the following exercises:

- Slow walking and deep breathing.
- Gentle stretching of arms, shoulders, legs and back.
- Relaxing the body after the Volleyball activity.

Summary and reflection

The PES the teacher reviews what pupils did in the lesson, asks how they feel and finds out what they enjoyed most. One or two pupils share their ideas. The teacher thanks everyone and ends the lesson.

Reflection questions

- **What did you find most challenging during the setting exercise?** It was hard to position my hands correctly to control the ball. Timing the ball's contact to make a good set was tricky.
- **What previous exercises should you practise to improve your setting skills?** Practise passing and ball control exercises. Practise jumping and hand positioning exercises.
- **In which situation can you apply a setting during a game?** To pass the ball to a teammate for a spike or attack. To control the ball after receiving it from the opponent.

Keywords

The teacher reads them aloud, explains them and tells the pupils to repeat after him/her: ***service*** *(hitting or serving the ball to start a play in Volleyball),* ***setting*** *(using your hands to pass the ball to a teammate for an attack),* ***attacking*** *(hitting or spiking the ball toward the opponent to try to score).*

Lesson 2: Basics of blocking the ball

a. Learning objectives

By the end of this lesson, the pupil should be able to refine the technical and tactical skills of setting and blocking in Volleyball game situation.

b. Teaching and learning resources

Volleyball court or playground, volleyballs, net (adjusted to pupils' height), cones, chairs, whistles and bibs.

c. Prerequisites (Knowledge and understanding, skills, attitude and values)

Pupils will perform better if they have already:

- Understand basic net play (spiking, setting).
- Know how to position themselves near the net.
- Can jump vertically with balance and land safely.

d. Introduction

Opening discussion

The teacher begins the lesson by checking pupils' readiness in terms of proper uniform, behaviour and mind set. He/she then makes a short explanation on how important blocking is in Volleyball.

Warm-up and stretching exercises

The PES the teacher should explain why warming up and stretching are important before sports. The teacher shows how to do the warm-up and stretching, then explains it again. Pupils watch and try it slowly and carefully. The teacher checks if they understand, encourages them with kind words and sets a time limit for the warm-up and stretching.

Under the teacher's guidance, pupils do the following exercises:

Warm-up exercises

- Light jogging around the Volleyball court.
- Skipping and side shuffles.
- Gentle jumping with hands raised above the head.
- Passing the ball with a partner.

Stretching exercises

- Arm swings and shoulder rotations.
- Leg swings and gentle lunges.
- Wrist rotations and body twists.

e. Main activity

The teacher explains to the pupils that:

Blocking is a defensive action where a player near the net jumps to stop or deflect the ball coming from an attacker (spiker) on the opposing team.

Fig.6.3: *Pupils performing blocking exercises*

Activity 6.2: Blocking the ball

Starting position

The teacher should explain to the pupils that:

- Feet shoulder-width apart, knees slightly bent.
- Hands in front of shoulders, palms open, elbows slightly bent.
- Eyes on the opponent.

Jumping

The teacher should request pupils to:

- Jump vertically using both feet.
- Raise both hands straight up with your fingers spread wide and firm.

Fig.6.4: *Pupils blocking the ball during a game situation*

Contact

The teacher should explain to the pupils that during contact with the ball:

- Their hands must reach over the net without touching it.
- They should try to block the ball back into the opponent's court.
- And make the timing of the jump to meet the ball just above the net.

Landing

The teacher should request pupils to:

- Land on both feet softly and balance.
- Reset position quickly.

Application activity 6.2: Blocking exercises

The teacher should let pupils do the following exercises

- **One-on-one exercise:** One pupil pretends to spike; the other practices the block.
- **Wall exercise:** Pupils jump and touch a mark on the wall with both hands (focus on timing and hand position).
- **Team rotation:** Pupils take turns blocking against light tosses or simulated spikes.
- **Normal game:** Pupils form teams and play a normal game, then practice blocking the ball.

Cool-down exercises

The PES the teacher explains why cool-downs are important after sport. The teacher shows how to do the cool-down, then asks pupils to follow along. While they do it, the teacher gives praise like "Well done!" and sets a time limit for the cool-down.

The teacher uses the following cool-down exercises to help pupils return their body to a normal state by focusing on:

- Gentle walking.
- Light stretching (arms, shoulders and legs).
- Deep breathing and relaxation.

Summary and reflection

The PES the teacher reviews what pupils did in the lesson, asks how they feel and finds out what they enjoyed most. One or two pupils share their ideas. The teacher thanks everyone and ends the lesson.

Reflection questions

- **What is the role of the net during blocking?** The net helps you judge where to place your hands to stop the ball. It acts as a barrier to prevent the opponent's attack from crossing.
- **Highlight previous exercises which can help you improve blocking techniques?** Practising jumping and timing exercises. Practising hand positioning and ball control exercises.
- **In which situation within the game is blocking applied?** When the opponent is trying to spike or attack the ball. To stop the ball from landing on your side and scoring for the opponent.

Keywords

The teacher reads them aloud, explains them and tells the pupils to repeat after him/her: ***blocking*** *(stopping the opponent's ball at the net using your hands),* ***spiker*** *(a player who hits the ball hard toward the opponent to score),* ***defence*** *(actions to stop the opponent from scoring),* ***attacking team*** *(the team trying to score points by hitting the ball over the net),* ***defending team*** *(the team trying to stop the opponent from scoring points).*

Lesson 3: Play Volleyball in the game situation, adhering to the instructions given

a. Learning objectives

By the end of this lesson, the pupil should be able to play Volleyball game by applying techniques and tactics learned and following rules of the game.

b. Teaching and learning resources

Volleyball court or marked playing area, Volleyballs, net (adjusted to pupil height), whistles, cones, red/yellow cards and bibs for teams.

c. Prerequisites (Knowledge and understanding, skills, attitude and values)

Pupils will perform better if they:

- Can perform basic Volleyball techniques (serve, set, spike and block).
- Understand and follow the basic rules of the game.
- Can cooperate and respect team roles and refereeing decisions.

d. Introduction

Opening discussions

The PES the teacher brings all pupils together and asks if they like playing games or doing physical exercises. Pupils give examples of games they play or physical exercises they do. The teacher explains that in this lesson, they will all play safely, share fairly and learn that games are good for both boys and girls.

The teacher should make sure that pupils are ready with the correct uniform, focus and a good attitude. The teacher explains why following the rules is important in games. Create fair teams and let pupils take turns as referees, line judges and scorers.

Warm-up and stretching exercises

The PES the teacher should explain why warming up and stretching are important before sports. The teacher shows how to do the warm-up and stretching, then explains it again. Pupils watch and try it slowly and carefully. The teacher checks if they understand, encourages them with kind words and sets a time limit for the warm-up and stretching.

The pupils begin with jogging (forward/backwards), high knees, side steps, and arm swings to raise heart rate. Follow with light ball control exercises like passing and setting in pairs to engage coordination. Finish with full-body stretching by focusing on arms, legs, wrists and shoulders to enhance flexibility.

e. Main activity

The PES the teacher asks pupils to listen carefully and gives clear instructions. The teacher or some pupils show how to do the activity. Then, the pupils start with a set time. The teacher moves around to help, gives praise to the pupils. If needed stop the game or exercise 1 minute and remind instructions to pupils and then continue the game or exercise.

Activity 6.3: Game situation

- The teacher divides the class into 3 or 4 teams, depending on size of class.
- She/he sets rules such as: maximum 3 passes before sending the ball over the net, rotate after every serve and no touching the net.
- He/she respects for the whistle and the referee's decisions.

The teacher explains to the pupils that Volleyball game is played by 6 players for each team and shows them different positions of players during Volleyball game.

- Setter: The setter touches the ball more than anyone else, usually the second touch and sets it up for a teammate to spike.
- Outside hitter: Plays in the front left. They attack, block and also help in defense when at the back.
- Opposite hitter: Plays in the front right. Strong attacker and blocker, usually opposite the setter.
- Middle blocker: Stays in the middle front. Main job is blocking the opponent's spikes and making quick attacks.
- Libero: A special defensive player who wears a different jersey. The libero cannot attack or block but is the best at receiving serves and digging balls.

Game Rotation Structure:

- **Game 1:** team A vs team B — team C is the referee.
- **Game 2:** team B vs team C — team A is the referee.
- **Game 3:** team C vs team A — team B is the referee.

- **Rotate roles:** players ↔ referees ↔ scorekeepers.
- The teacher monitors, corrects and provides encouragement

Cool-down exercises

The PES the teacher explains why cool-downs are important after sport. The teacher shows how to do the cool-down, then asks pupils to follow along. While they do it, the teacher gives praise like "Well done!" and sets a time limit for the cool-down.

The teacher leads cool-down exercises, focusing on:

- Gentle walking.
- Light stretching (arms, shoulders and legs).
- Deep breathing and relaxation.

Summary and reflection

The PES the teacher reviews what pupils did in the lesson, asks how they feel and finds out what they enjoyed most. One or two pupils share their ideas. The teacher thanks everyone and ends the lesson.

Reflection questions

- **How did it feel to play a full Volleyball game?** I felt excited and happy to play with my teammates. I felt tired but proud after finishing the game.
- **What was the hardest part of the game for you?** It was hard to keep track of the ball and move quickly. Some skills, like spiking or serving, were challenging.
- **How can teamwork and respect from today help you in sports or daily life?** They help everyone work together and achieve goals. They make games and daily activities friendly and fair.

Keywords

The teacher reads them aloud, explains them and tells the pupils to repeat after him/her: ***rules*** *(instructions that players must follow during the game),* ***fouls*** *(actions that break the rules, like pushing or handling the ball incorrectly),* ***penalties*** *(punishments or consequences for breaking the rules),* ***team*** *(a group of players working together to win),* ***referee/judge*** *(the person who makes sure players follow the rules),* ***fair play*** *(playing honestly and respecting others).*

Talent Watch

During this unit, the teacher should help pupils discover their sports talents by watching how they perform, encouraging them, helping them join school teams or clubs and guiding them to improve.

6.7. End of unit practical assessment

The PES teacher observes the pupils during the activity or game and gives positive feedback like "Good job!", "Well done!" or "That's great!". She/he helps pupils who are struggling or need support. She/he should remind pupils to be careful, slow down or try harder if needed and praises the whole group for their effort and participation.

Under the teacher's guidance, pupils do the following exercises:

Warm-up exercises

- Light jogging around the Volleyball court.
- Skipping and side shuffles.
- Passing and setting the ball with a partner.
- Gentle jumping and blocking movements at the net.

Stretching exercises

- Arm swings and shoulder rotations.
- Leg swings and gentle lunges.
- Wrist rotations and body twists.

Activity 6.4

*** Individual skill demonstration**

Each pupil will perform:

- *Setting* (hand position, ball contact and follow-through).
- *Spiking* (approach, jump, arm swing and contact).
- *Blocking* (starting position, timing, arm position and landing)

The teacher observes and scores based on correct form, control and effort.

* **Game-based assessment (team play)**

- Pupils are divided into equal teams.
- They play mini-matches (e.g: 3 vs 3 or 4 vs 4, depending on class size).
- Roles rotate: players, referees and scorekeepers.

Assessment criteria:

- Application of setting, spiking and blocking during the match
- Ability to follow rules and instructions.
- Teamwork, fair play and safe participation.

Assessment tools

- *Observation checklist* (per pupil and team).
- *Peer feedback* (optional, for teamwork and cooperation).
- *Self-reflection* (2 to 3 questions at the end of the session).

Cool-down exercises

Under the teacher's guidance, pupils do the following exercises:

- Slow walking and deep breathing.
- Gentle stretching of arms, shoulders, legs and back.
- Relaxing the body after the assessment.

Sample of an assessment checklist

Criteria	Yes	No	Comments
Performs setting correctly.			
Performs spiking correctly.			
Performs blocking correctly.			
Applies volleyball skills during the game.			
Follows rules and instructions.			
Shows teamwork and fair play.			
Participates safely and actively.			

Sample of an assessment rubric

Criteria	Excellent	Good	Satisfactory	Needs improvement
Volleyball skills	Performs setting, spiking and blocking correctly with good control.	Performs skills with minor errors.	Performs skills with some errors and needs support.	Has difficulty performing the skills.
Game application	Applies Volleyball skills effectively during the game.	Applies skills most of the time during the game.	Applies some skills during the game.	Rarely applies skills during the game.
Teamwork and fair play	Cooperates with teammates, respects rules and shows fair play.	Cooperates and follows rules most of the time.	Sometimes cooperates and follows rules.	Rarely cooperates or follows rules.
Effort and participation	Participates actively, safely and enthusiastically.	Participates actively most of the time.	Participates with some effort.	Shows little effort or participation.

6.8. Additional activities

6.8.1. Remedial activities

The teacher asks pupils to do the following:

Activity 6.5: Court positioning walkthrough

- Use cones or markers to walk through player positions (1 to 6) and basic rotations.
- Reinforce understanding of positions and where to move after a serve.

Activity 6.6: Catch and toss rally

- In pairs, pupils toss and catch the ball over the net while calling out "Mine!" and "Go!"
- Communication and court awareness.

Activity 6.7: Target passing

- Players pass to a target (hoop or cone) using underhand passes.
- Practise ball control and direction.

6.8.2. Consolidation activities

The teacher asks pupils to do the following:

Activity 6.8: Touch exercise

- In small groups (3 vs 3), practise bump-set-hit with a focus on using all 3 touches.
- Develop an understanding of cooperative attacking.

Activity 6.9: Serve and receive formation

- Practice receiving serves in a W-formation, calling "Mine" and passing to a setter.
- Focus: Serve-receive tactics and teamwork.

Activity 6.10: Mini-game with zones

- Play a half-court game where players are rewarded for hitting into unguarded zones.
- Goal: Encourage placement and reading opponents' positions.

6.8.3. Extension activities

The teacher asks pupils to do the following:

Activity 6.11: Game analysis and strategy

- Watch a short Volleyball clip (or observe another group's game) and discuss tactics used.
- **Focus**: Defensive formations, opponent weaknesses and transitions.

Activity 6.12: Quick attack practice

- Practice fast sets and quick spikes with a focus on timing.
- **Goal**: Develop advanced offensive plays and on-the-fly decision making.

Activity 6.13: Rotational scrimmage

- Full game with enforced rotation and roles (setter, libero, etc.). Teams must adjust their strategy per rotation.
- **Purpose**: Apply advanced positioning and adapt tactics based on team arrangement.

UNIT 7

BASIC BASKETBALL TACTICS

Key Unit Competence

Perform defensive and offensive techniques and tactics of Basketball in game the situations, using both individual and collective strategies.

At the end of this unit, the pupil should be able to:

Knowledge and understandin

- Explain the difference between individual actions (e.g: dribbling) and team actions (e.g: passing, zone defence).
- Identify examples of individual and team actions during play.

Skills

- Move effectively without the ball during the game.
- Pass the ball accurately to teammates using various passing techniques.

Attitudes and values

- Show respect to others.
- Demonstrate fair play during activities.
- Display confidence in performance.
- Exhibit team spirit in group activities

7.1. Prerequisite (Knowledge and understanding, skills, attitude and values)

Pupils will perform better in this unit if they have already:

- Understand basic Basketball skills: dribbling, passing, shooting and defending.
- Know how to move with and without the ball.
- Can follow basic rules of the game and show teamwork and respect.

7.2. Guidance on introductory activity

Before lesson one, the teacher introduces the unit by engaging pupils in an activity called "Find the open player", where they warm-up, then practise dribbling, passing and moving under pressure in small teams. The focus is on teamwork, decision-making and movement without the ball. Afterwards, pupils discuss key concepts before moving on to the main lesson activity.

Opening discussions

The teacher asks the following questions to the pupils:

- **What are Basketball tactics?** Basketball tactics are strategies used by players and teams to attack, defend and work together effectively during a game.
- **Which basic Basketball tactics do you know?** Some basic basketball tactics I know are passing and moving, creating space, defending an opponent, marking players and fast breaks.
- **Why are Basketball tactics important?** Basketball tactics are important because they help players make good decisions, improve teamwork, use skills effectively and increase the chances of winning a game.

Pupils discuss and share their ideas. The teacher explains to the pupils that basic Basketball tactics help them understand how to cooperate with teammates, attack and defend as a team and play according to the rules. The teacher guides the discussion and then leads pupils into warm-up and stretching exercises before practicing Basketball tactics.

Warm-up and stretching exercises

Under the teacher's guidance, pupils do the following exercises:

Warm-up exercises

- Light jogging around the Basketball court.
- Skipping and side movements.
- Passing and dribbling the ball with a partner.
- Simple attacking and defending movements.

Stretching exercises

- Arm swings and shoulder rotations.
- Leg swings and gentle lunges.
- Body twists and gentle stretches.

After this session, the teacher continues with the main activity of lesson one.

7.3. Generic Competencies

- **Critical thinking and problem-solving:** Analyse Basketball game situations, make appropriate decisions and apply offensive and defensive techniques and tactics using individual and team strategies.
- **Cooperation, interpersonal management and life skills:** Work effectively with teammates, apply collective strategies, respect opponents, follow Basketball rules and demonstrate teamwork, discipline and fair play.
- **Communication in the official language:** Communicate with teammates, give and follow instructions, discuss Basketball tactics and strategies and encourage others during training and games.

7.4. Basic Values

- **Solidarity and democracy:** Working cooperatively with teammates, communicating effectively, applying team strategies, sharing responsibilities and supporting others during Basketball games.
- **Justice:** Respecting Basketball rules, accepting decisions fairly, playing honestly and applying offensive and defensive tactics in a fair manner.
- **Dignity and integrity:** Showing respect to teammates, opponents and officials, demonstrating fair play, using skills responsibly and caring for Basketball equipment.

7.5. Cross Cutting Issues

- **Gender equality:** Developed through encouraging equal participation of boys and girls in applying Basketball techniques, offensive and defensive tactics and team strategies.
- **Peace and values education:** Developed through promoting teamwork, respect, discipline, fair play, communication and self-control while applying Basketball tactics during games.
- **Inclusive education:** Developed through adapting Basketball activities to support pupils with different abilities and ensuring equal participation, cooperation and support among all players.

7.6. List of lessons and learning objectives.

#	Lesson title	Learning objectives	Number of periods
1	Introduction to individual basic tactics.	To perform basic Basketball skills such as dribbling, passing, shooting and defending. They will practise these skills by themselves or in small groups.	2
2	Introduction to collective basic tactics.	To use simple tactics like passing and moving (give-and-go), helping each other in defence and changing positions. They will learn to play better by cooperating during the game.	2
3	Playing Basketball in the game situation.	In teams, pupils will be able to practise attacking and defending during a game, while following the rules.	4
4	End of unit practical assessment.	To assess pupils' abilities to show basic attacking and defending skills during games.	2

Lesson 1: Introduction to individual basic tactics

a. Learning objectives

By the end of this lesson, the pupil should be able to will learn and show basic Basketball skills such as dribbling, passing, shooting and defending. They should be able to practice these skills by themselves or in small groups.

b. Teaching and learning resources

Playground or court, basketballs, bibs, stopwatch and whistle.

c. Prerequisites (Knowledge and understanding, skills, attitude and values)

Pupils will understand this lesson better if they already know how to do basic passing, dribbling and shooting, both on their own and during a game.

d. Introduction

Consider the activities to be done as mentioned in the introductory activities.

e. Main activity

The PES the teacher asks pupils to listen carefully and gives clear instructions. The teacher or some pupils show how to do the activity. Then, the pupils start with a set time. The teacher moves around to help, gives praise to the pupils. If needed stop the game or exercise 1 minute and remind instructions to pupils and then continue the game or exercise.

Activity 7.1: Basic passing techniques

Chest pass: the teacher should explain to the pupils that the chest pass starts from the chest and goes straight to the teammate's chest. They hold the ball with both hands on the sides; thumbs behind the ball, then push the ball forward and turn their thumbs down when they release it. The ball should spin backwards in the air.

The teacher should remind pupils to:

- Face their partner with both feet shoulder-width apart.
- Hold the ball with two hands, thumbs behind the ball.
- Step forward and push the ball from their chest toward their partner.
- End with arms straight, thumbs pointing down.

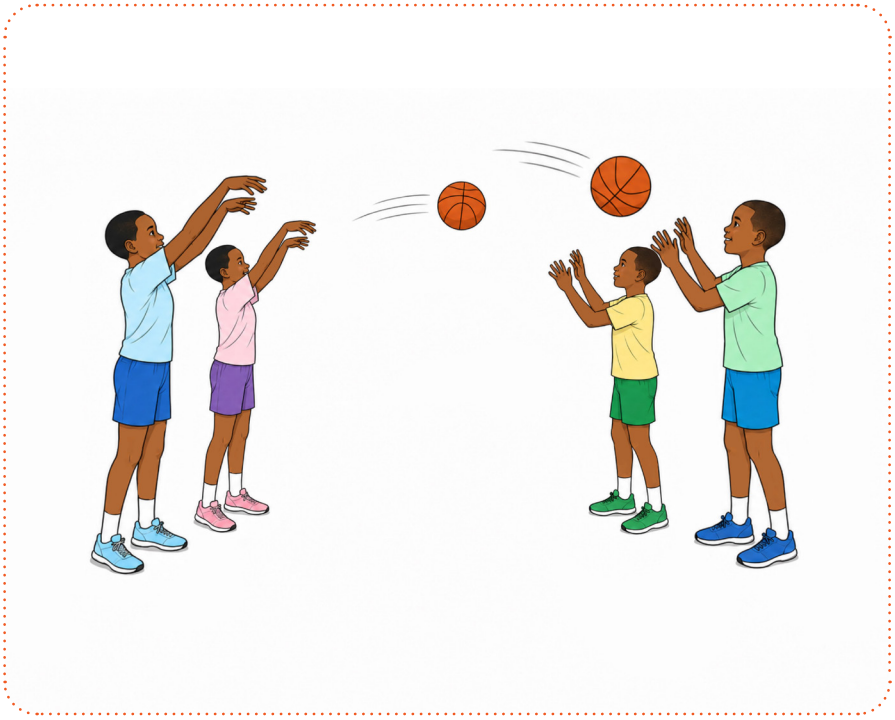

Fig.7.1: *Pupils performing chest pass*

Bounce pass: The teacher should explain to the pupils that the bounce pass is similar to the chest pass, but the ball is aimed at the floor. She/he tells them that it should bounce once and reach the receiver at waist height. A good starting point is to bounce the ball about three-quarters of the way to the teammate. A clean backspin helps control the pass and makes it easier to catch.

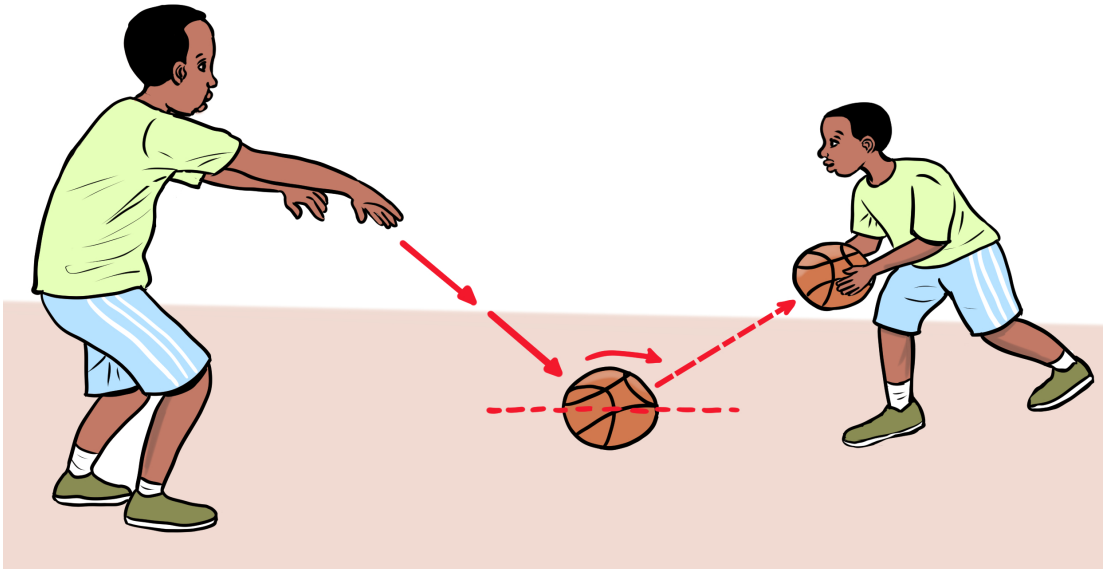

Fig.7.2: *The bounce pass exercises*

Overhead pass: The teacher should tell pupils that the overhead pass is often used to quickly pass the ball after a rebound or when under pressure. Hold the ball above the forehead with both hands on the sides, and then push it forward toward the teammate's chin area. Do not bring the ball behind the head because it is slower and easier to steal.

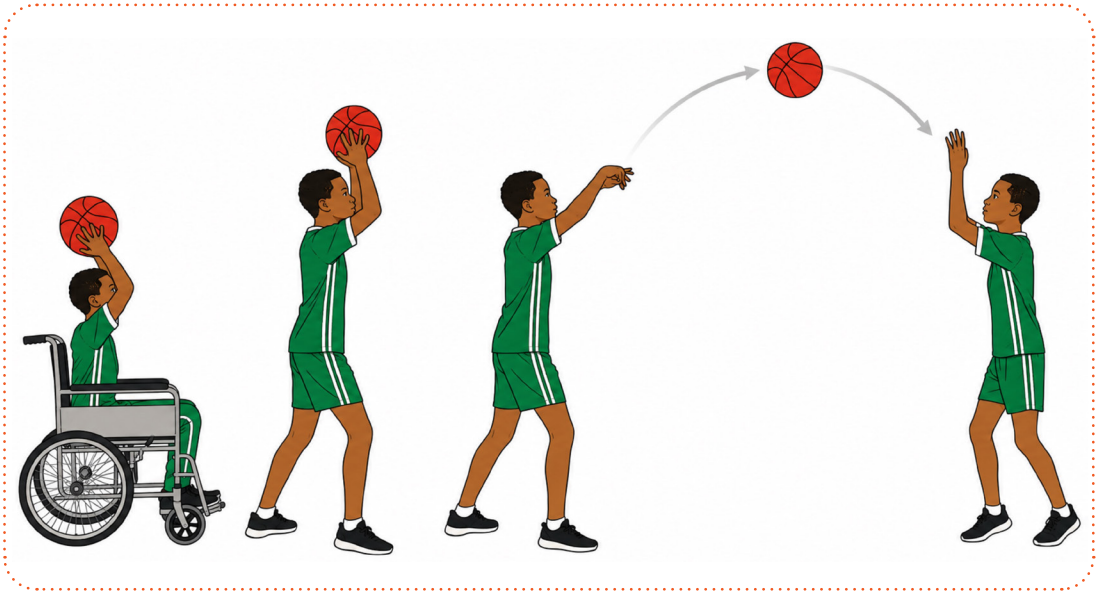

Fig.7.3: *Pupils practising overhead pass*

Baseball pass: The teacher should tell pupils that the baseball pass is a one-handed pass that looks like a baseball throw. It's useful for long, fast passes across the court. Step forward and throw with one arm while aiming at the teammate's chest.

Application activity 7.1

The teacher should let pupils practise different passes in groups by adjusting the distance to make accurate passes or in the game situation.

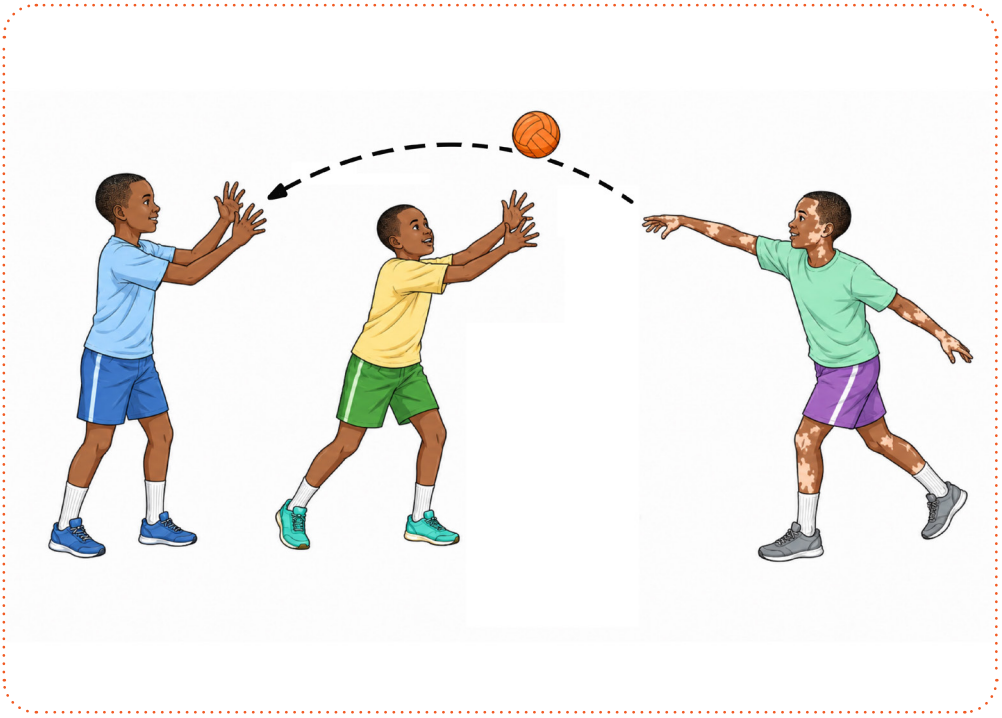

Fig.7.4: *Pupil practising baseball pass*

Activity 7.2: Cones dribbling

Instructions:

The teacher does the following:

- Line up pupils, each with a ball (if available).
- Place cones in a straight line with some space in between.
- Pupils dribble the ball through the cones one by one.
- As they improve, reduce the space between the cones to make it more challenging.
- Repeat the exercise several times and give feedback on control and hand position.

Fig.7.5: *Pupil dribbling through cones*

The teacher should remind pupils of the points to consider for individual tactics:

- **Offence:** Be ready to pass, dribble or shoot. Use fakes, quick moves and screens to get open. Protect the ball, move smartly and aim to score close to the basket.
- **Defence:** Stay low and close to your opponent. Help teammates, block shots, go for steals and stop rebounds by boxing out. Stay alert and react quickly.

* **Static dribbling**

The teacher should request pupils to:

- Stand still and dribble using the right and then the left hand
- Try low and high dribbles, switching hands every few seconds

Fig.7.6: *Pupil performing static dribbling*

Random dribbling

- Pupils move around the area while dribbling freely.
- On the whistle, they change direction or hand.
- Must avoid bumping into others.

***Focus**: space awareness, quick reaction and ball control*

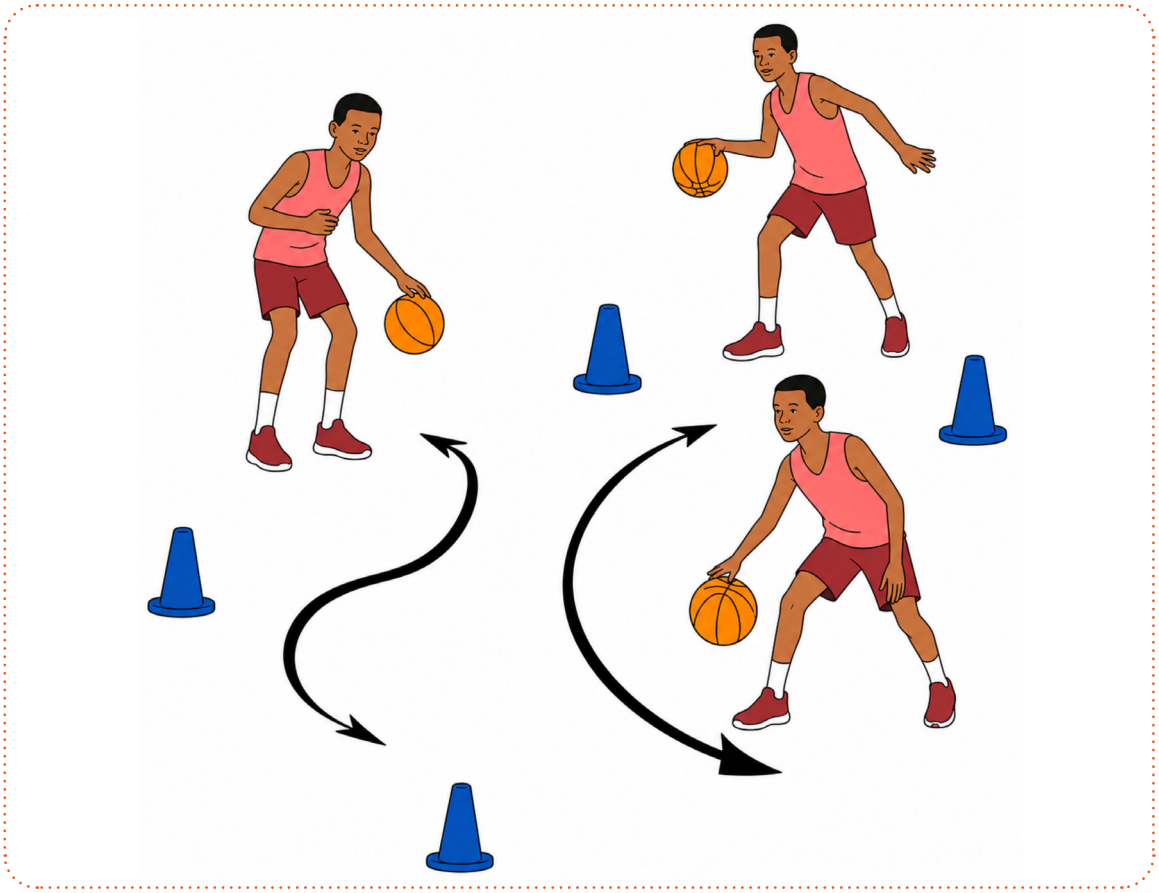

***Fig.7.7:** Pupil perform random dribbling*

Cool-down exercises

The PES the teacher explains why cool-downs are important after sport. The teacher shows how to do the cool-down, then asks pupils to follow along. While they do it, the teacher gives praise like "Well done!" and sets a time limit for the cool-down.

The teacher leads cool-down exercises, focusing on:

- Gentle walking.
- Light stretching (arms, shoulders and legs).
- Deep breathing and relaxation.

Or can use other relaxation exercises at his/her choice.

Summary and reflection

The PES the teacher reviews what pupils did in the lesson, asks how they feel and finds out what they enjoyed most. One or two pupils share their ideas. The teacher thanks everyone and ends the lesson.

Reflection questions

- **Which type of pass is easiest for you to do and why?** The chest pass is easiest because it is simple and goes straight to a teammate. The bounce pass is easy when passing to someone at a lower position.
- **What is the difference between a chest pass and a bounce pass?** Chest pass goes directly from your hands to your teammate's chest. Bounce pass hits the floor once before reaching your teammate.
- **What pass would you use if your teammate is far away?** Use a chest pass for a straight and fast throw. Or use a bounce pass if there are defenders in the way.

Keywords

The teacher reads them aloud, explains them and tells the pupils to repeat after him/her: ***dribbling*** *(bouncing the ball continuously with one hand while moving),* ***bounce pass*** *(passing the ball so it hits the floor once before reaching a teammate),* ***chest pass*** *(passing the ball directly from your hands to your teammate's chest),* ***overhead pass*** *(passing the ball from above your head to a teammate),* ***baseball pass*** *(a long, strong pass thrown like in baseball),* ***shooting*** *(trying to throw the ball into the basket to score points),* **defending** *(stopping the opponent from scoring or getting the ball).*

Lesson 2: Introduction to collective basic tactics

a. Learning objectives

By the end of this lesson, the pupil should be able to work together as a team by using simple tactics like passing and moving (give and go), helping each other in defence and changing positions. They should also be able to play better by cooperating during the game.

b. Teaching and learning resources

Basketballs, cones, bibs, whistle, stopwatch, court or open space.

c. Prerequisites (Knowledge and understanding, skills, attitude and values)

Pupils will perform better if they have already practised basic dribbling and passing skills, including cone dribbling and passing activities covered from the previous lesson.

d. Introduction

The PES the teacher brings all pupils together and asks if they like playing games or doing physical exercises. Pupils give examples of games they play or physical exercises they do. The teacher explains that in this lesson, they will all play safely, share fairly and learn that games are good for both boys and girls.

The teacher begins with a semi-circle discussion to review lesson one. She/he asks the following questions:

- **What passes and dribbles did you learn last time?** I learned chest pass, bounce pass and overhead pass. I learned dribbling with both hands, control dribble and speed dribble.

The teacher introduces today's goal. She/he sets classroom expectations and group pupils according to available equipment.

Pupils start warm-up like the following: light jogging, high knees, backwards running, then dribbling in all directions; follow with stretches focusing on arms, wrists, legs and ankles.

e. Main activity

The PES the teacher asks pupils to listen carefully and gives clear instructions. The teacher or some pupils show how to do the activity. Then, the pupils start with a set time. The teacher moves around to help, gives praise to the pupils. If needed stop the game or exercise 1 minute and remind instructions to pupils and then continue the game or exercise.

The teacher should explain to the pupils that team tactics are ways players work together to score points and stop the other team. It is about passing, moving, helping each other, and playing smart.

Activity 7.3: Key team tactics

*** Spacing**

The teacher should tell pupils to:

- Spread out on the court.
- Not all stand in one spot to help them make passing and scoring easier.

* **Pass and move**

The teacher should explain to the pupils that:

- After they pass, move to a new space. This keeps the defence guessing.

* **Give and go**

The teacher should request pupils to:

- Pass the ball and then run to the basket to get it back.

* **Pick and roll**

The teacher should request one pupil to:

- Block a defender (sets a screen). Then run to the basket to get a pass.

* **Help defence**

The teacher should explain to the pupils that:

- If a teammate gets beat, step in to help stop the ball.

* **Man-to-man and zone defence**

The teacher should explain to the pupils that:

- *Man-to-man:* You guard one player.
- *Zone:* You guard an area.

Dribbling with a passive defender

- Pair up pupils.
- One dribbles while the other acts as a light defender (hands up, light movement).
- Switch roles after 1 minute.

Focus: *protecting the ball, controlling under pressure*

Fig.7.8: *Pupils dribbling with a passive defender*

Application activity 7.2

The teacher lets pupils apply what they learned in the game situation.

Cool-down exercises

The PES the teacher explains why cool-downs are important after sport. The teacher shows how to do the cool-down, then asks pupils to follow along. While they do it, the teacher gives praise like "Well done!" and sets a time limit for the cool-down.

The teacher leads cool-down exercises, focusing on:

- Gentle walking.
- Light stretching (arms, shoulders and legs).
- Deep breathing and relaxation.

Summary and reflection

The PES the teacher reviews what pupils did in the lesson, asks how they feel, and finds out what they enjoyed most. One or two pupils share their ideas. The teacher thanks everyone and ends the lesson.

Reflection questions

- **How did you feel when dribbling with a partner or under pressure?** I felt focused and careful to keep the ball. I felt excited but a little nervous when defenders were close.
- **What was the most difficult part of dribbling today?** Keeping control while moving fast was hard. Dribbling around other players without losing the ball was tricky.
- **How is group dribbling different from dribbling alone?** You need to watch other players and avoid bumping into them. It requires more teamwork and awareness than dribbling alone.

Keywords

The teacher reads them aloud, explains them and tells the pupils to repeat after him/her: ***give and go*** *(passing the ball to a teammate and then moving to get it back),* ***tactics*** *(planned strategies to help your team win the game),* ***pass and move*** *(passing the ball and then running to a better position),* ***pick and roll*** *(a player blocks a defender (pick)* ***and then moves*** *(roll) to receive a pass),* ***man-to-man/zone defence*** *(man-to-man: each player guards a specific opponent; Zone: each player guards an area of the court).*

Lesson 3: Playing Basketball in a game situation

a. Learning objectives

By the end of this lesson, pupils in teams should be able to practise attacking and defending during a Basketball game, while following the rules.

b.Teaching and learning resources

Basketballs, cones, bibs, whistle, stopwatch, scoreboard (if available), marked playground or court.

c. Prerequisites (Knowledge and understanding, skills, attitude and values)

Pupils will perform better if they can already:

- Perform basic Basketball skills like passing, dribbling, shooting and defending.
- Show good teamwork and follow the rules explained in previous lessons.

d. Introduction

Opening discussions

Start in a semi-circle and talk about why it is important to follow rules and respect everyone. Make teams with the same number of players and a mix of boys and girls. Explain the rules: no pushing, listen to the teacher or referee, pass and dribble correctly and play as a team. The teacher or selected pupil conducts warm-up exercises by jogging and doing high knees around the court while passing and dribbling. Finish with simple stretching exercises for arms, legs, ankles and shoulders.

e. Main activity

The PES the teacher asks pupils to listen carefully and gives clear instructions. The teacher or some pupils show how to do the activity. Then, the pupils start with a set time. The teacher moves around to help, gives praise to the pupils. If needed stop the game or exercise 1 minute and remind instructions to pupils and then continue the game or exercise.

Activity 7.4: Game situation

- The teacher should divide the class into 3 or 4 equal teams

The teacher explains to the pupils that Basketball game is played by 5 players for each team and shows them different positions of players in Basketball game.

Point guard

- Often called the team leader.
- Brings the ball up the court and starts the attack.
- Makes quick passes to teammates.

Shooting guard

- Good at shooting the ball from far or near.
- Helps the point guard in passing and dribbling.
- Tries to score many points.

Small forward

- Very active and fast.
- Can dribble, pass and shoot.
- Helps in both attack and defence.

Power forward

- Strong player who plays near the basket.
- Good at rebounding (catching the ball after a missed shot).
- Scores close to the basket.

Center

- Tallest player in the team.
- Stays near the basket.
- Blocks shots, rebounds and scores inside.

- The teacher uses a mini-match rotation system:
  - Game 1: team A vs team B (team C referees).
  - Game 2: team B vs team C (team A referees), and so on
  - Games should be short (e.g: 5–7 minutes).
  - After each match, rotate teams and roles.
- The teacher observes performance and provides support, feedback, or rule corrections.

Cool-down exercises

The PES the teacher explains why cool-downs are important after sport. The teacher shows how to do the cool-down, then asks pupils to follow along. While they do it, the teacher gives praise like "Well done!" and sets a time limit for the cool-down.

Under the teacher's guidance, pupils do the following exercises:

- Slow walking and deep breathing.
- Gentle stretching of arms, legs and back.
- Relaxing the body after the Basketball game.

Summary and reflection

The PES the teacher reviews what pupils did in the lesson, asks how they feel and finds out what they enjoyed most. One or two pupils share their ideas. The teacher thanks everyone and ends the lesson.

Reflection questions

- **How did you feel playing the real Basketball game today?** I felt excited and happy to play with my team. I felt tired but proud after finishing the game.
- **What was easy or hard for you during the game?** Passing the ball to teammates was easy. Dribbling past defenders and shooting under pressure was hard.
- **How did the skills you learned earlier help you in the game?** Dribbling and passing skills helped me keep control of the ball. Shooting and defending skills helped me score points and stop the opponents.

Keywords

The teacher reads them aloud, explains them and tells the pupils to repeat after him/her: ***game*** *(an activity where players follow rules to compete or have fun),* ***rules*** *(instructions that players must follow during the game),* ***team*** *(a group of players working together to win),* ***referee*** *(the person who makes sure players follow the rules and plays fairly).*

Talent Watch

During this unit, the teacher should help pupils discover their sports talents by watching how they perform, encouraging them, helping them join school teams or clubs and guiding them to improve.

7.7. End of unit practical assessment

The PES teacher observes the pupils during the activity or game and gives positive feedback like "Good job!", "Well done!" or "That's great!". She/he helps pupils who are struggling or need support. She/he should remind pupils to be careful, slow down or try harder if needed and praises the whole group for their effort and participation.

Warm-up and stretching exercises

Under the teacher's guidance, pupils do the following exercises:

Warm-up exercises

- Light jogging around the Basketball court.
- Skipping and side movements.
- Passing and dribbling the ball with a partner.
- Simple shooting practice.

Stretching exercises

- Arm swings and shoulder rotations.
- Leg swings and gentle lunges.
- Wrist rotations and body twists.

Activity 7.5

*** Skills demonstration (Individual/pair-based assessment)**

Each pupil will perform:

- A chest pass, bounce pass or overhead pass.
- Dribbling control (static, random or against a passive defender).
- Basic shooting at a target (like a hoop or marked zone).
- Defensive stance and light movement in pairs.

The teacher checks for correct form, control and effort.

*** Team game assessment**

The teacher divides pupils into small teams. Let pupils play short games (3 vs 3 or 4 vs 4) and rotate roles (player, referee and time keeper).

The teacher should observe how pupils:

- Use of passing, dribbling, defending and shooting.
- Respect for rules and teammates.
- Develop teamwork and fair play.

Tools for assessment

- The teacher observation checklist.
- Peer feedback (optional).
- Self-reflection (2 to 3 short questions).

Cool-down exercises

Under the teacher's guidance, pupils do the following exercises:

- Slow walking and deep breathing.
- Gentle stretching of arms, shoulders, legs and back.
- Relaxing the body after the assessment.

Sample of an assessment checklist (individual assessment)

Pupil name	Chest pass	Bounce pass	Overhead pass	Dribbling control	Shooting accuracy	Defensive stance & movement	Teacher comments
	Yes / No	Yes / No	Yes / No	Yes / No	Yes / No	Yes / No	

Sample of an assessment rubric

Criteria	Excellent	Good	Satisfactory	Needs improvement
Passing (Chest, bounce, overhead)	Accurate, correct form, smooth execution.	Mostly accurate; minor form errors.	Sometimes inaccurate; needs improvement.	Incorrect technique; rarely accurate.
Dribbling control	Maintains control while moving and against defender.	Mostly controlled; minor mistakes.	Inconsistent control; struggles against defender.	Loses control frequently; poor technique.
Shooting accuracy	Hits target consistently.	Hits target most times.	Hits target sometimes.	Rarely hits target.

Defensive stance and movement	Correct stance; moves effectively.	Mostly correct; minor errors.	Sometimes incorrect stance; slow movement.	Incorrect stance; poor movement.

Sample of an assessment checklist (team game assessment)

Team name	Passing and dribbling	Shooting and defense	Respect for rules and teammates	Teamwork and fair Play	Teacher comments
	Yes / No	Yes / No	Yes / No	Yes / No	

7.8. Additional activities

7.8.1. Remedial activities

The teacher asks pupils to do the following:

Activity 7.6: Follow-the-leader defensive exercise

Pupils mirror the teacher or teammate's defensive stance and movement (sliding left/right, closing out). **Focus:** defensive positioning and footwork.

Activity 7.7: 2vs1 half-court decision-making

- Two offensive pupils vs one defender.
- Emphasise spacing, passing and cutting.
- Slows down tactical play for better understanding.

Activity 7.8: Shadow passing

- Pairs practise basic passing (chest, bounce) while staying in motion.
- Introduce simple "pass and cut" patterns.

Activity 7.9: Static screen and roll exercise

- One pupil sets a screen, the other dribbles around.
- Walk-through speed to understand the concept of pick-and-roll.

7.8.2. Consolidation activities

The teacher asks pupils to do the following:

Activity 7.10: 3vs3 half-court play

The teacher should:

- Use small-sided games to encourage tactical application: spacing, movement off the ball and defence.
- Rotate pupils often.

Activity 7.11: Off-ball movement circuit

The teacher should:

- Let pupils rotate through stations:
  - Give-and-go.
  - Backdoor cut.
  - V-cut into open space.
- Emphasise reading the defence.

Activity 7.12: Shell exercise (defensive positioning)

- 4 defenders vs. imaginary or passive offence.
- Practice helps defence, recovery and switching.

Activity 7.13: Controlled fast breaks

- Attackers vs 2 defenders.
- Focus: spacing, passing on the run and layups.

7.8.3. Extension activities

The teacher asks pupils to do the following:

Activity 7.14: Full-court 4vs4/5vs5 tactical games

- Teams implement basic offensive and defensive strategies (man to man, fast break and spacing).
- Allow time for team discussions and tactical planning.

Activity 7.15: Offence vs zone defence

- Teach basic zone concepts (e.g: 2-3 defence).
- Encourage players to find gaps, use ball reversals and make smart cuts.

Activity 7.16: Create-a-play challenge

In small groups, players design and demonstrate a simple offensive play using screens, cuts and passes.

Activity 7.17: Conditioned games (tactical focus)

Examples:

- Only score from assists.
- Extra point for successful screen and roll.
- Zone defence only quarter.

UNIT 8

BASIC HANDBALL TACTICS

Key Unit Competence

Use Handball techniques and tactics effectively in game situations.

At the end of this unit, the pupil should be able to:
Knowledge and understanding • Explain the basic rules of handball, including fouls, player positions and goal area restrictions. • Recognise common offensive and defensive tactics, such as passing to break the defence.
Skills • Apply team strategies during small-sided games. • Demonstrate basic tactical understanding by moving into space. • Support teammates effectively during play. • Defend actively and strategically.
Attitudes and values • Demonstrate fair play during activities. • Show respect to all participants. • Exhibit good sportsmanship in all situations. • Follow game rules consistently.

8.1. Prerequisite (Knowledge and understanding, skills, attitude and values)

Pupils will benefit more from this unit if they are already able to:

- Pass, dribble and bounce the ball.
- Perform basic throwing and shooting in Handball.
- Show basic understanding of Handball game play.

8.2. Guidance on introductory activity

The teacher introduces the Handball unit, focusing on tactics. Pupils warm-up, stretch, and play a short "pass and move relay" game in teams. Afterwards, the teacher asks questions about the importance of passing, moving, and using tactics. Then, the main lesson activity begins.

Opening discussions

The teacher asks the following questions to the pupils:

- **What are Handball tactics?** Handball tactics are strategies used by players and teams to attack, defend and work together effectively during a Handball game.
- **Which basic Handball tactics do you know?** Some basic Handball tactics I know are passing and moving, creating space, marking opponents, defending, supporting teammates and fast attacks.
- **Why are Handball tactics important?** Handball tactics are important because they help players make good decisions, improve teamwork, organize attacks and defence and play effectively according to the rules.

Pupils discuss and share their ideas. The teacher explains to the pupils that basic handball tactics help them cooperate with teammates, create scoring opportunities, prevent opponents from scoring and improve their performance during games. The teacher guides the discussion and then leads pupils into warm-up and stretching exercises before practicing Handball tactics.

Warm-up and stretching exercises

Under the teacher's guidance, pupils do the following exercises:

Warm-up exercises

- Light jogging around the Handball court.
- Skipping and side movements.
- Passing, receiving and dribbling the ball.
- Simple attacking and defending movements.

Stretching exercises

- Arm swings and shoulder rotations.
- Leg swings and gentle lunges.

Body twists and gentle stretches.After this session, the teacher continues with the main activity of lesson one.

8.3. Generic Competencies

- **Critical thinking and problem-solving:** Analyse Handball game situations, make appropriate decisions and apply offensive and defensive techniques and tactics such as passing, catching, shooting and positioning effectively during games.
- **Cooperation, interpersonal management and life skills:** Work effectively with teammates, apply team strategies, respect opponents, follow Handball rules and demonstrate teamwork, discipline, leadership and fair play.
- **Communication in the official language:** Communicate with teammates, give and follow instructions, discuss Handball tactics and techniques and encourage others during training and games.

8.4. Basic Values

- **Solidarity and democracy:** Working cooperatively with teammates, communicating effectively, applying team strategies, sharing responsibilities and supporting others during Handball games.
- **Justice:** Respecting Handball rules, accepting decisions fairly, playing honestly and applying offensive and defensive tactics in a fair manner.
- **Dignity and integrity:** Showing respect to teammates, opponents and officials, demonstrating fair play, using skills responsibly and caring for Handball equipment.

8.5. Cross Cutting Issues

- **Gender equality:** Developed through encouraging equal participation of boys and girls in applying Handball techniques, tactics and team strategies during games.
- **Peace and values education:** Developed through promoting teamwork, respect, discipline, fair play, communication and self-control while using Handball techniques and tactics.
- **Inclusive education:** Developed through adapting Handball activities to support pupils with different abilities and ensuring equal participation, cooperation and respect among all players.

8.6. List of lessons and learning objectives

#	Lesson title	Learning objectives	Number of periods
1	Introduction to the basics of individual tactics in Handball.	To perform individual Handball skills such as passing, dribbling and shooting.	2
2	Introduction to the basics of collective tactics in Handball.	To apply teamwork skills such as coordinated movement, passing combinations and basic defence.	2
3	Playing Handball in the game situation.	To perform technical and tactical exercises of Handball in the game.	2
4	End of unit practical assessment.	To assess pupils' abilities to perform basic technical skills of Handball in game situations.	2

Lesson 1: Introduction to basic individual tactics in Handball

a. Learning objectives

By the end of this lesson,the pupils should be able to perform individual Handball skills such as passing, dribbling and shooting.

b. Teaching and learning resources

Playground, stopwatch, whistles, cones, Handballs and bibs (for team identification).

c. Prerequisites (Knowledge and understanding, skills, attitude and values)

Pupils will understand this lesson better if they already know how to:

- Throw and bounce the ball.
- Perform basic throws (e.g: jump throw, stride throw and throw while falling).
- Catch and block the ball with hands, legs or body.

d. Introduction

The teacher should continue with the main part of the lesson, hence opening discussion, warm-up and stretching exercises have been done in the introductory activity.

e. Main activity

The PES the teacher asks pupils to listen carefully and gives clear instructions. The teacher or some pupils show how to do the activity. Then, the pupils start with a set time. The teacher moves around to help, gives praise to the pupils. If needed stop the game exercise 1 minute and remind instructions to pupils and then continue the game exercise.

During the lesson, pupils will practise the following types of passes: passing while standing, passing while running, passing with a jump (preliminary stride) and passing with a vertical jump.

Activity 8.1: Passing the ball

Key teaching points for passing the ball in Handball

The teacher should explain to the pupils that when passing with the left hand, they do the following:

- Step forward with the right leg.
- Hold the ball gently with the palm relaxed and the hand behind the ball.
- Distribute pressure evenly on the ball using the fingers and palm.
- Make the pass simple and quick, without extra movements.
- Pass the ball in front of the teammate, taking into account their running speed. Encourage pupils to pass while moving, rather than from a stationary position.

Application activity 8.1

The teacher should let pupils practise short and long passes depending on the position on the field. The teacher should let pupils perform passing techniques in pairs teams.

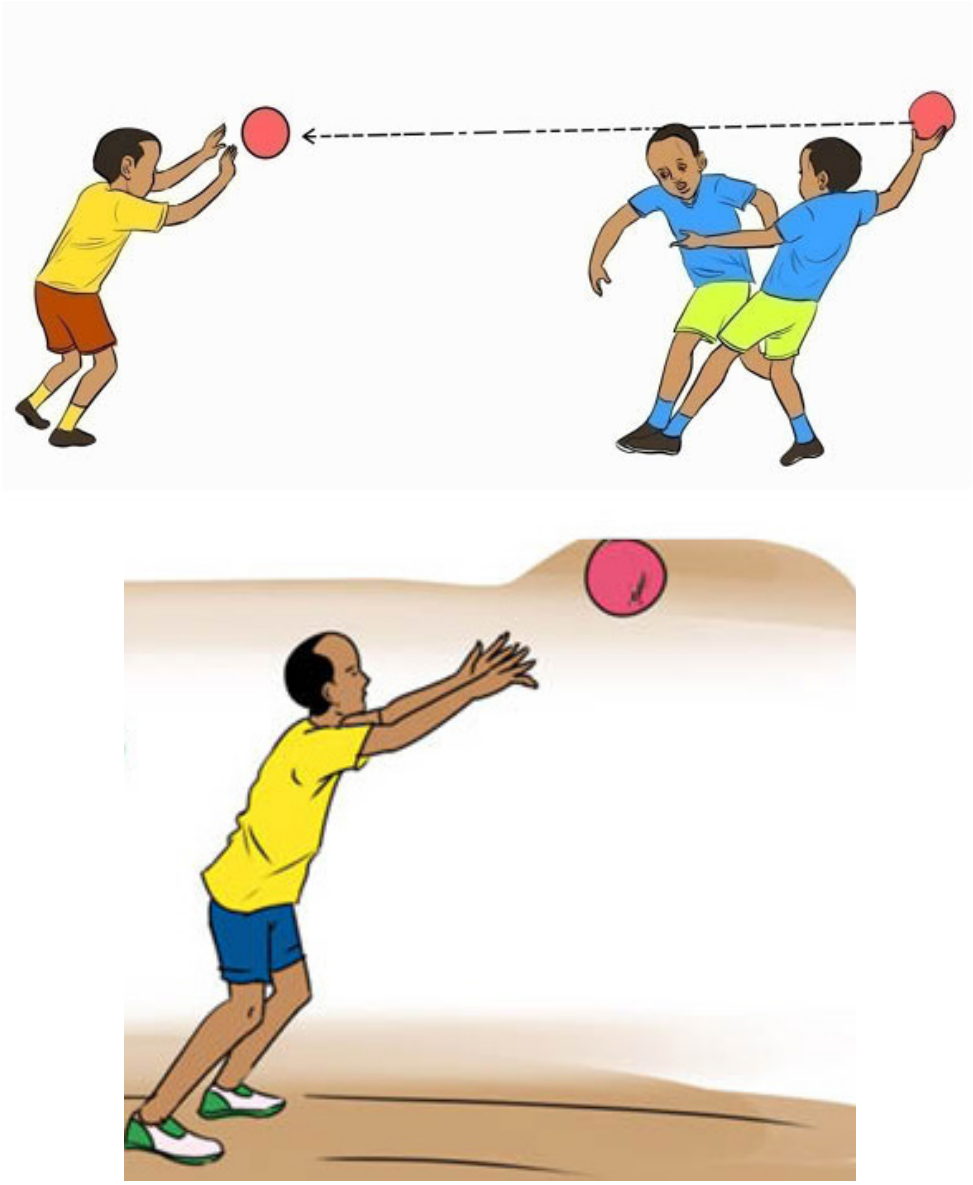

Fig.8.1: *Pupils passing techniques*

Activity 8.2: Receiving/catching the ball in Handball

Catching the ball correctly:

The teacher tells pupils that while receiving the ball:

- Always they use two hands to receive the ball for better control and safety.
- Adjust their catching technique depending on the height of the ball: If the ball is coming above the chest, raise their hands with fingers pointing up and forward.
- Keep their thumbs close together, forming a triangle shape to safely catch the ball.

Teaching tips

The teacher should demonstrate slowly, and then ask pupils to practise catching in pairs at different heights (low, chest and overhead). Remind them to keep their eyes on the ball and cushion it into their hands.

For low balls (close to the ground): Lower their hands. Their fingers point down and forward. Their little fingers close together to form a pocket for the ball.

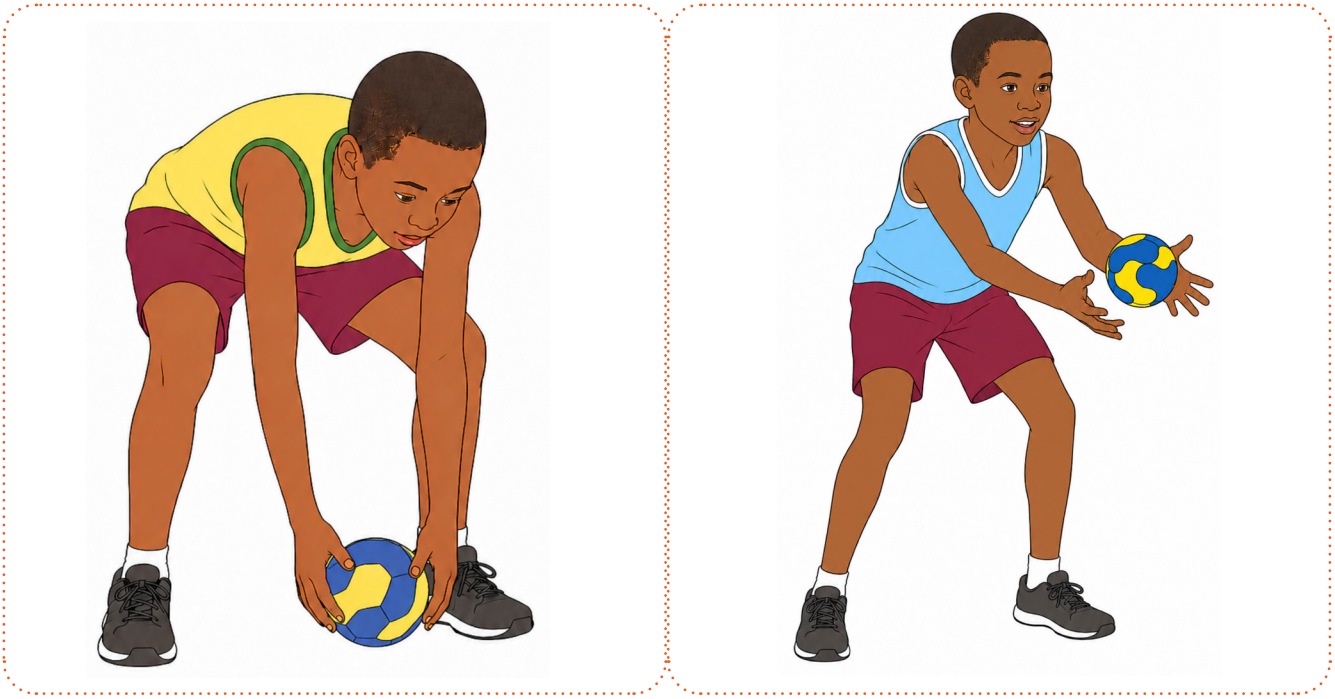

Fig.8.2: *Pupil catching the ball individually*

Application activity 8.2: Receiving the ball

The teacher should let pupils practice catching the ball:

- *Individually* (by tossing the ball against a wall and catching it).
- *In pairs* (one throws, the other catches).
- *In teams* (during passing exercises).

The teacher reminds pupils the following while catching the ball:

- Be soft and flexible when receiving the ball (bend their arms gently to absorb the ball).
- Use smooth arm movement (don't make stiff or sudden motions).
- After catching, practise good ball handling (keep control, prepare for a pass or movement).

Fig.8.3: *Pupils practising ball handling*

Cool-down exercises

The PES the teacher explains why cool-downs are important after sport. The teacher shows how to do the cool-down, then asks pupils to follow along. While they do it, the teacher gives praise like "Well done!" and sets a time limit for the cool-down.

Under the teacher's guidance, pupils do the following exercises:

- Slow walking and deep breathing.
- Gentle stretching of arms, shoulders, legs and back.
- Relaxing the body after individual Handball tactical exercises.

Summary and reflection

The PES the teacher reviews what pupils did in the lesson, asks how they feel and finds out what they enjoyed most. One or two pupils share their ideas. The teacher thanks everyone and ends the lesson.

Reflection questions

- **How did you feel playing the real Basketball game today?** I felt happy and excited to play with my teammates. I felt proud and energetic after finishing the game.
- **What was easy or hard for you during the game?** Passing the ball to teammates was easy. Dribbling past defenders and shooting under pressure was hard.
- **How did the skills you learned earlier help you in the game?** Dribbling and passing skills helped me keep control of the ball. Shooting and defending skills helped me score points and stop the opponents.

Keywords

The teacher reads them aloud, explains them and tells the pupils to repeat after him/her: ***passing*** *(giving the ball to a teammate),* ***receiving*** *(getting the ball from a teammate),* ***catching*** *(holding the ball safely after it comes to you).*

Lesson 2: Introduction to basic collective tactics in Handball

a. Learning objectives

By the end of this lesson, the pupils in groups should be able to perform basic collective tactics such as pass and move, give and go and supporting teammates in a game situation.

b. Teaching and learning resources

Sport facilities, stopwatch, cones, whistles, handball balls and bibs.

c. Prerequisites (Knowledge and understanding, skills, attitude and values)

Pupils will better understand this lesson if they can already pass, receive, dribble and shoot the ball effectively. They should also have a basic understanding of teamwork and spacing.

d. Introduction

Opening discussions

The PES the teacher brings all pupils together and asks if they like playing games or doing physical exercises. Pupils give examples of games they play or physical exercises they do. The teacher explains that in this lesson, they will all play safely, share fairly and learn that games are good for both boys and girls.

The teacher should ask pupils to explain how passing helps the team during a match.

Discuss the importance of teamwork and movement without the ball.

The teacher should set rules for group work and fair play.

Warm-up and stretching exercises

The PES the teacher should explain why warming up and stretching are important before sports. The teacher shows how to do the warm-up and stretching, then explains it again. Pupils watch and try it slowly and carefully. The teacher checks if they understand, encourages them with kind words and sets a time limit for the warm-up and stretching.

- Use light jogging, dynamic stretches and ball-handling warm-ups.
- Jog while passing in pairs.
- *Circle passing:* One pupil in the middle receives and passes to the outer pupils.
- *Stretching:* Same as unit one, lesson one (focus on arms, legs and shoulders).

e. Main activity

The PES the teacher asks pupils to listen carefully and gives clear instructions. The teacher or some pupils show how to do the activity. Then, the pupils start with a set time. The teacher moves around to help, gives praise to the pupils. If needed stop the game or exercise 1 minute and remind instructions to pupils and then continue the game or exercise.

Activity 8.3: Pass and move exercise

Set up:

- Pupils in groups of 4 to 6.
- One ball per group.
- Mark a playing area with cones.

How to play:

- Player A passes the ball to Player B.
- After passing, Player A immediately moves into a new open space.
- Player B then passes to another teammate (Player C).
- Each passer always moves after passing – no one stays still.
- Continue the sequence with constant passing and movement.

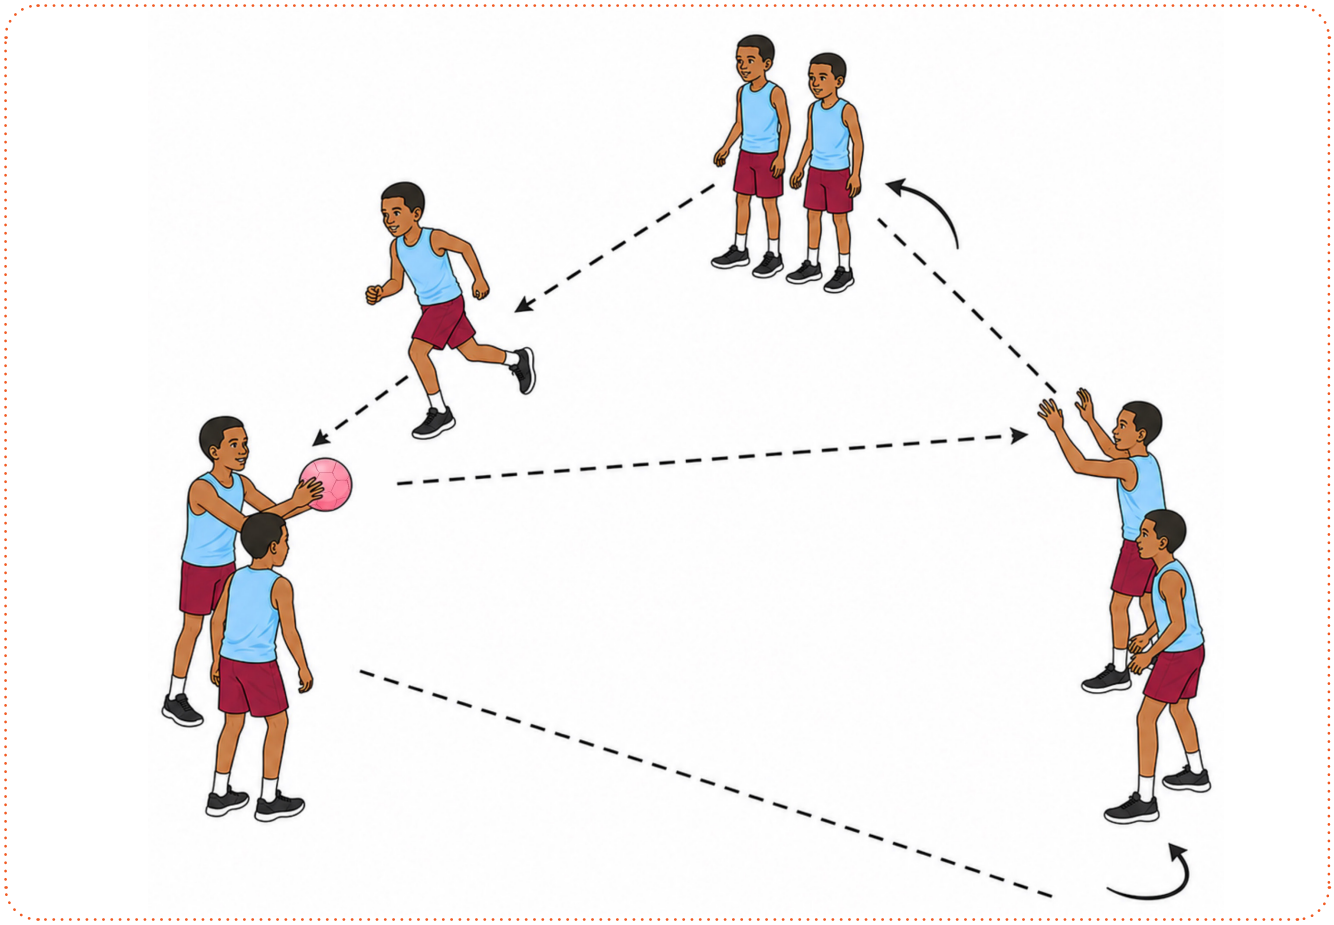

Fig.8.4: *Pupils practising pass and move exercise*

Activity 8.4: Give-and-go exercise

Set up:

- Pupils work in pairs or small groups.
- One ball per pair or group.
- Mark an area with cones.

How to play:

- Start with ball: Player A has the ball.
- Pass: Player A passes the ball to player B.
- Move: Immediately after passing, player A runs into an open space past Player B.
- Return Pass: Player B quickly passes the ball back to player A (now moving into space).
- Continue the sequence with different players taking turns.

Fig.8.5: *Pupils practising give and go exercise*

Activity 8.5: Support play in small groups

- Groups of 3 or 4 work together to keep possession while defenders apply light pressure.
- Focus on helping teammates by moving into open spaces to receive a pass.

Cool-down exercises

The PES the teacher explains why cool-downs are important after sport. The teacher shows how to do the cool-down, then asks pupils to follow along. While they do it, the teacher gives praise like "Well done!" and sets a time limit for the cool-down.

Under the teacher's guidance, pupils do the following exercises:

Slow walking and deep breathing.

Gentle stretching of arms, shoulders, legs and back.

Relaxing the body after collective Handball tactical activities.

Summary and reflection

The PES the teacher reviews what pupils did in the lesson, asks how they feel and finds out what they enjoyed most. One or two pupils share their ideas. The teacher thanks everyone and ends the lesson.

Reflection questions

- **What was the hardest part of moving after passing the ball?** It was hard to run to the right position quickly. Keeping an eye on the ball while moving was tricky.
- **How did working with your teammates help keep the ball?** We passed quickly to avoid losing the ball. We helped each other by calling for the ball and covering space.
- **How can you use what you learned about passing and moving in a real game?** To stay open and give teammates easy passes. To control the game and create chances to score.

Keywords

The teacher reads them aloud, explains them and tells the pupils to repeat after him/her: ***pass and move*** *(pass the ball to a teammate, then move to a better position),* ***give and go*** *(pass the ball to a teammate and quickly move to receive it back),* ***ball handling*** *(skills used to control, dribble and move the ball safely).*

Lesson 3: Playing Handball in the game situation

a. Learning objectives

By the end of this lesson, the Pupil should be able to play Handball in teams while respecting the rules, applying the techniques and tactics they have learned in previous lessons.

b. Teaching and learning resources

Playground, Handball balls, stopwatch, cones, bibs and whistles.

c. Prerequisites (Knowledge and understanding, skills, attitudes and values)

Pupils should be able to perform passing, shooting, dribbling and defensive techniques and understand the basic rules of Handball.

d. Introduction

Opening discussions

The teacher should ensure pupils are prepared with appropriate sportswear, are attentive and organised into groups. Remind them of safety guidelines and game rules. Create balanced teams using available resources and emphasise the importance of fair play, effective communication and understanding team roles.

Warm-up and stretching exercises

The teacher conducts warm-up and stretching exercises, or she/he can assign a pupil to lead it. Begin with jogging forward and backward to gradually raise the heart rate. Follow this with dynamic movements to activate major muscle groups. Then perform stretching exercises targeting the arms, shoulders, legs and wrists. This helps improve flexibility and prepare the body for physical activity.

e. Main activity

The PES the teacher asks pupils to listen carefully and gives clear instructions. The teacher or some pupils show how to do the activity. Then, the pupils start with a set time. The teacher moves around to help, gives praise to the pupils. If needed stop the game or exercise 1 minute and remind instructions to pupils and then continue the game or exercise.

The teacher should tell pupils that in this lesson, they will apply techniques and tactics in a real game.

Activity 8.6: Game situation

The teacher should,

- Organise pupils into two or more teams.

The teacher explains Handball game is played by 7 players and shows them different position of players during Handball game.

Goalkeeper

- Stays in the goal area.
- Main role: stop shots and protect the goal.

Left wing

- Plays on the far left side.
- Fast, good at quick runs and sharp-angled shots.

Right wing

- Plays on the far right side.
- Similar role as left wing, using speed and shooting from tight angles.

Left back

- Positioned behind the left wing.
- Strong shooter from a distance.

Right back

- Positioned behind the right wing.
- Also powerful at long shots.

Centre back/playmaker

- Stays in the middle, like the "brain" of the team.
- Organises play, passes and sets up attacks.

Pivot/circle runner

- Plays near the opponent's goal line.
- Works to create space, block defenders and receive passes close to goal.

- Set clear attacking and defensive systems (e.g: 6-0, 5-1, 4-2, 3-3).
- Alternate teams in attack and defence.
- Let them play short matches with guided support.
- Emphasise the use of passing, spacing, shooting, blocking and marking.
- Observe and correct techniques where needed.
- Encourage teamwork, communication and tactical decision-making.

Cool-down exercises

The PES the teacher explains why cool-downs are important after sport. The teacher shows how to do the cool-down, then asks pupils to follow along. While they do it, the teacher gives praise like "Well done!" and sets a time limit for the cool-down.

The teacher guides pupils through gentle jogging and static stretches, focusing on legs, shoulders and wrists.

Summary and reflection

The PES the teacher reviews what pupils did in the lesson, asks how they feel and finds out what they enjoyed most. One or two pupils share their ideas. The teacher thanks everyone and ends the lesson.

Reflections questions

- **What skills helped your team the most during the game?** Passing and dribbling helped keep control of the ball. Shooting and defending helped us score points and stop the opponents.
- **What was hard when attacking or defending?** Getting past defenders while attacking was difficult. Stopping fast attackers while defending was tricky.
- **How can today's tactics help you in other games or teamwork activities?** They teach you how to work together and plan actions. They help make decisions quickly and play smarter in any team activity.

Keywords

The teacher reads them aloud, explains them and tells the pupils to repeat after him/her: ***rules*** *(instructions that players must follow during the game),* ***techniques*** *(specific skills or ways of doing actions correctly in a game),* ***tactics*** *(planned strategies to help your team win the game),* ***fair play*** *(playing honestly and respecting others).*

Talent Watch

During this unit, the teacher should help pupils discover their sports talents by watching how they perform, encouraging them, helping them join school teams or clubs and guiding them to improve.

8.7. End of unit practical assessment

The PES teacher observes the pupils during the activity or game and gives positive feedback like "Good job!", "Well done!" or "That's great!". She/he helps pupils who are struggling or need support. She/he should remind pupils to be careful, slow down or try harder if needed and praises the whole group for their effort and participation.

Warm-up and stretching exercises

Under the teacher's guidance, pupils do the following exercises:

Warm-up exercises

- Light jogging around the Handball court.
- Skipping and side movements.
- Passing, receiving and dribbling the ball.
- Simple attacking and defending movements.

Stretching exercises

- Arm swings and shoulder rotations.
- Leg swings and gentle lunges.
- Wrist rotations and body twists.

Activity 8.7

*** Individual skills**

Passing and receiving: Perform accurate chest and bounce passes to a moving partner.

Dribbling: Demonstrate control while dribbling through cones.

Shooting: Shoot at the goal from a marked area using jump shots or stride shots.

Catching: Catch high and low passes with proper hand technique.

*** Group/team activities**

Pass and move exercise (3-pupils triangle): Pupils pass and move while maintaining formation.

Give and go exercise: Pupils pass and sprint to receive the ball back in motion.

Support play: In a small-sided match (e.g: 5vs5), demonstrate attacking with support movement and defending in zone or man-marking style.

*** Game situation**

The teacher should divide the pupils into teams and let them play a short match.

The teacher should observe the following:

- Correct application of rules.
- Use of basic tactics (spacing, marking and blocking).
- Communication and team cooperation.
- Respect for fair play and safety.

Cool-down exercises

Under the teacher's guidance, pupils do the following exercises:

- Slow walking and deep breathing.
- Gentle stretching of arms, shoulders, legs and back.
- Relaxing the body after the assessment.

Sample of an assessment checklist

Criteria	Yes	No	Comments
Performs passing and receiving correctly.			
Demonstrates good dribbling control.			
Performs accurate shooting.			
Catches the ball correctly.			
Applies basic tactics during the game.			
Shows teamwork and communication.			
Follows rules, fair play and safety.			

Sample of an assessment rubric

Criteria	Excellent	Good	Satisfactory	Needs improvement
Handball skills	Performs passing, receiving, dribbling, shooting and catching correctly with good control.	Performs skills with minor errors.	Performs skills with some errors and needs support.	Has difficulty performing the skills.
Game application	Applies skills and basic tactics effectively during the game.	Applies skills and tactics most of the time.	Applies some skills and tactics during the game.	Rarely applies skills or tactics during the game.
Teamwork and communication	Communicates well, supports teammates and works cooperatively.	Cooperates and communicates most of the time.	Sometimes cooperates and communicates.	Rarely cooperates or communicates.
Rules, fair play and safety	Consistently follows rules, demonstrates fair play and plays safely.	Follows most rules and plays fairly.	Follows some rules and needs reminders.	Rarely follows rules or plays safely.

8.8. Additional activities

8.8.1. Remedial activities

The teacher asks pupils to do the following

Activity 8.8: Shadow passing exercises

Objective: Improve spacing and timing in offensive positioning.

Activity: In groups of 3 to 4, pupils practice moving in formation without a ball, mimicking real passing positions.

Focus: Movement into space, simple cutting and replacing.

Activity 8.9: Target passing

Objective: Reinforce accurate and strategic passing.

Setup: Place cones in different zones. The pupil must pass to a moving teammate who arrives at the cone.

Variation: Call out a number or direction before passing.

8.8.2. Consolidation Activities

Activity 8.10: 3vs2 offensive advantage

Objective: understand numerical superiority in attack.

Exercise: attackers (3) versus defenders (2). Rotate roles after a few rounds.

Focus: quick passing, using the extra player effectively and shot selection.

Activity 8.11: *Zone defence Exercise*

Objective: practice switching between man-to-man and zone defence.

Setup: divide the court into zones. Defenders must stay in zones and work together to block attacking moves.

Activity 8.12: Game-like scenarios

- Use a full or half-court to simulate real game phases (fast break, set attack and defensive press).
- The teacher pauses play to give feedback, then resumes.

8.8.3. Extension activities

The teacher asks pupils to do the following:

Activity 8.13: Tactical challenges

- Scenario cards (e.g: "You are 1 goal down with 1 minute left", "Opponent is pressing high").
- The pupils must adapt tactics and discuss their strategy before executing it.

Activity 8.14: Positional rotation game

- The pupils switch positions every 2 minutes during game play.
- Encourages understanding of each tactical role (pivot, wing and backcourt).
